## Contents

1 Introduction ................................................. 1  
1.1 Motivation ............................................. 2  
1.2 Methodology ........................................... 4  
1.3 Outline of the Dissertation, Major Contributions and Reference to Prior Publications ........................................... 5  
References .................................................. 9  

2 Limiting Obstacles to Success of RFID and the EPCglobal Network in Logistics ............................................. 11  
2.1 Historical Development .................................... 12  
2.2 Radio-Frequency Identification: Technical Fundamentals .......... 13  
2.3 Present and Future RFID Market Development ................. 18  
2.3.1 Aberdeen Group .................................... 20  
2.3.2 ABI Research ....................................... 24  
2.3.3 BMWI: Bundesministerium für Wirtschaft und Technologie ............................................. 26  
2.3.4 Deutsche Bank Research ................................ 27  
2.3.5 FTK: Forschungsinstitut für Telekommunikation e.V. ......... 29  
2.3.6 Gartner ............................................. 30  
2.3.7 IDTechEx ........................................... 31  
2.3.8 IIG: Institut für Informatik und Gesellschaft .............. 34  
2.3.9 Juniper Research .................................... 35  
2.3.10 Analysis Summary .................................. 35  
2.4 The EPCglobal Architecture Framework ........................ 36  
2.5 The Business Model of the EPCglobal Architecture Framework ............................................. 42  
2.6 The Vision of the Internet of Things .......................... 44  
2.7 Summary of Limiting Obstacles to Success of RFID and the EPCglobal Architecture ............................................. 51  
References .................................................. 51
### 3 Electronic Information Sharing in Supply Networks

- **3.1** Similarities and Differences Between EDI, RFID and the EPCglobal Architecture
- **3.2** Growing Complexity in n-to-m Information Sharing
- **3.3** The Agile Internet of Things Enabled Right-Time Enterprise
- **3.4** Semiotics and the Internet of Things
- **3.5** Information Deficiencies and Uncertainty in the Internet of Things
- **3.6** Summary of Electronic Information Sharing in Supply Networks

References

### 4 Performance Measurement and Cost Benefit Analysis for RFID and Internet of Things Implementations in Logistics

- **4.1** Measuring Costs and Benefits of RFID Implementations
  - **4.1.1** Costs of RFID and Internet of Things Adoption
  - **4.1.2** Benefits of RFID and the Internet of Things
- **4.2** Example of Uneven Cost Benefit Allocation in the Beverage Supply Chain
- **4.3** Cost Benefit Sharing and Its Limitations
- **4.4** Summary Performance Measuring As Well As Cost Benefit Sharing Approaches and Deduction of an Alternative Market Driven Approach

References

### 5 Preconditions for Creating Economic Value Through Market-Driven Information Pricing and Billing in B2B Scenarios

- **5.1** Separating the Value of Information from Other Value Carrying Offerings
- **5.2** Differences in Product and Information Pricing
- **5.3** Requirements for Payment Systems in B2B Information Sharing
- **5.4** Summary of Findings

References

### 6 Modelling and Prototyping an Integration of Billing Mechanisms into the EPCglobal Network Architecture

- **6.1** Technical Integration Options of Billing-Solutions
  - **6.1.1** Subscriber Identification at Hardware Level
  - **6.1.2** Subscriber Identification at Software (EPCIS) Level
  - **6.1.3** Comparison and Discussion
- **6.2** Choosing an Appropriate Billing Solution for a Technical Prototype
- **6.3** A Technical Framework for a Billing Integrated EPCglobal Network
