Contents

Application of NMR and Molecular Docking in Structure-Based Drug Discovery ................................................................. 1
Jaime L. Stark and Robert Powers

NMR as a Unique Tool in Assessment and Complex Determination of Weak Protein–Protein Interactions ............................... 35
Olga Vinogradova and Jun Qin

The Use of Residual Dipolar Coupling in Studying Proteins by NMR .................................................................................. 47
Kang Chen and Nico Tjandra

NMR Studies of Metalloproteins ................................................................. 69
Hongyan Li and Hongzhe Sun

Recent Developments in $^{15}$N NMR Relaxation Studies that Probe Protein Backbone Dynamics ........................................ 99
Rieko Ishima

Contemporary Methods in Structure Determination of Membrane Proteins by Solution NMR ............................................... 123
Tabussom Qureshi and Natalie K. Goto

Protein Structure Determination by Solid-State NMR ....................... 187
Xin Zhao

Dynamic Nuclear Polarization: New Methodology and Applications .... 215
Kong Hung Sze, Qinglin Wu, Ho Sum Tse, and Guang Zhu

Index ........................................................................................................... 243
