</table>
Precise Determination of GNSS Trajectory in the Antarctic
Airborne Kinematic Positioning ........................................ 95
Yan Xu, Yuanxi Yang and Guochang Xu

Experimentation Research and Analysis of Application
of Beidou Satellite Navigation System in Civil Aviation Aircraft .... 107
Hong Sun, Nengjie Yu, Fengshan Zhang and Hong Liang

Operating Mode and Method on Information Collection Systems
of GPS Close-Range Photogrammetry ............................ 117
Da Wang, Jin-zhong Bei, Shou-zhou Gu and Ren-qi Nie

Passive Radar System Based on GNSS Signal Illumination ......... 125
Bao Li, Kejin Cao, Jiangning Xu and Fangneng Li

Automatic Recognition Method of Operation Status
for Agricultural Machinery Based on GNSS Data Mining ......... 135
Yaping Cai, Caicong Wu, Mengjia Luo, Lianjun Ding and Huaihong Su

Research on the Establishment of Navigation Service under
Cloud Computing ...................................................... 147
Yang Cui, Zhiping Lu, Zhengsheng Chen and Yupu Wang

A Primary Research on Marine Magnetic Disturbance Correction
Method Using Dual Frequence GNSS .............................. 157
Xiaowen Luo, Jinyao Gao, Xianglong Jin, Jiabiao Li and Fengyou Chu

Research on Concept and Computation of Service Performance
of Satellite Navigation System ........................................ 165
Guozhong Li, Jianwen Li, Qingming Gui and Songhui Han

Performance Analysis of BeiDou Satellite Navigation System
(4IGSO + 3GEO) in Standard Positioning and Navigation ......... 177
Zhouzheng Gao, Hongping Zhang, Zhigang Hu and Jun-huan Peng

GPS-R Vegetation Scattering Model Study Using SMEX02 Data .... 187
Xuerui Wu, Ying Li and Chuanlong Li

Study on the Positional Stability of GPS Reference
Stations in TJCORS .................................................. 195
Ying Xu, Hui Liu, Yanfen Zhang and Yantong Feng
Contents

Model and Method of Establishing Horizontal Velocity Field in Mainland China ........................................ 205
Xing Chen, Pengfei Cheng and Yingyan Cheng

Application of GNSS in School Bus Safety Monitoring ............... 215
Tao Han, Xiaochun Lu and Decai Zou

Research on AutoNav-Guiding Technology for Airplane Taxiing .......... 225
Hai-Tao Wu, De-Cai Zou, Tao Han and Xiao-Chun Lu

A Conceptual Design of Regional Search and Rescue System .......... 235
Lijuan Xu, Jianghua Qu, Hong Yuan and Songchuan Liu

Soil Moisture Measuring on the Basis of GNSS Reflected Signals ....... 245
Xuezhong Song, Aigong Xu, Dongkai Yang, Derong Liu and Jiayong Wan

Part II Satellite Navigation Model and Method

Lunar High Frozen Orbit Relay Satellite Constellation and Its Deployment and Maintenance ............... 257
Yi Lu, Yi-kang Yang, Xue Li, Zhi-yong Zhu, Hai-tao Li and Guang-liang Dong

Study and Establishment of Regional Elastic Block Strain Model Based on GPS Data .................. 267
Wei Qu, Qin Zhang, Shuang-Cheng Zhang, Li Wang, Qin-Liang Wang and Zhen-Hong Li

Design and Implementation of GNSS-R Software Receiver Based on FFT ........................................ 277
MingLi Li, DongKai Yang, WeiQiang Li, Yi Huang and YiQiang Zhang

The NLOS Error Mitigation Joint Algorithm in Hybrid Positioning System Combining DTMB and GPS .......... 287
Hong Wu, Yao Chen, Nan Zhang, Zhen Zhang and Kun Xiang

The Impact of Tohoku-Oki Earthquake on “CMONOC” Stations ...... 297
Kejie Chen, Rongxin Fang, Min Li and Chuang Shi
Continuous Monitoring of Landslide and Atmospheric Water Vapor Using GPS: Application in Pubugou Hydropower Resettlement Zone .......................... 305
Ruya Xiao, Xiufeng He and Linhong Li

Study on Secular Influence Factors of Station’s Vertical Displacement ......................... 315
Xinhui Zhu and Fuping Sun

Stochastic Model of GPS/BD Combined Standard Single Point Positioning ..................... 325
Wenkun Yu, Wujiao Dai, Xiaoli Ding, Wentao Yang and Xiao Gao

A Study of Ionospheric Scintillation Effects on Differential GNSS ...................... 335
Dun Liu, Zhongxin Deng, Jian Feng and Weimin Zhen

A Method to Estimate DCB of COMPASS Satellites Based on Global Ionosphere Map .................. 347
WenHai Jiao, ChangJiang Geng, YinHu Ma, XiaoRui Huang,
HongPing Zhang, Min Li and ZhiGang Hu

The Preliminary Design of Return Link in the Global Satellite Search and Rescue System .................. 355
Chunyang Zhi, Zhaodong Xing and Lu Huang

Estimation of Compass Satellite Differential Code Biases Using Combined GPS/Compass Observation .................. 365
Long Tang, Xiaohong Zhang, Xiaojing Lin and Yuyang Chen

The Study of Electromagnetic Scattering in the Problem of Detecting a Moving Target Above a Ground Using GNSS Reflected Signals ................. 373
Lei Kuang, Wen-Chao Xu, Zheng-Qi Zheng and Da-Nan Dong

Medium-Range Kinematic Positioning Constraint by Ionospheric Pseudo-Observation with Elevation-Dependent Weight .................. 381
Yihe Li and Yunzhong Shen

Stochastic Model of GPS Doppler: Evaluation, Modeling and Performance .................. 395
Zebo Zhou, Yunzhong Shen and Bofeng Li
Multi-GNSS System Time Offset Determination and Its Effect on Positioning Performance ........................................ 407
Yue Jiao, Yanhong Kou and Dongyang Xu

The Impact of a Non-Tidal Ocean Loading Model of High Temporal Resolution on Geodetic GPS Height Time Series ............. 417
Jianghui Geng and Simon D. P. Williams

Effects of the MW 9.0 Tohoku Earthquake on GPS Position Time Series in China .......................................................... 429
Xiaoming Wang, Yingyan Cheng, Zhihao Jiang and Li Liu

Evaluation of Ionospheric Correction Models in the Middle Latitude .................................................. 441
JiaHong Bi, Yun Tang, XiaoLi Wu, JiDong Cao and Min Ma

Ionosphere TEC Short-Term Forecast Based on Frequency Spectrum Analysis .............................................. 447
Chuanhua Zhao, Yamin Dang, Jinzhong Bei and Huifang Yin

Analysis and Modeling of GLONASS Broadcast Ephemeris Errors ........................................ 455
ChenXi Zhang, QianXin Wang, YaMin Dang, ZhiGang Yu and Jing Zhao

An Improved Inverse Distance Weighted Method for Interpolating ZTD Based on Regional GPS Network ............................................. 463
Huifang Yin, Yamin Dang, Shuqiang Xue, Qianxin Wang and Hui Yi

Analysis of the Tidal Effect on GNSS Kinematic and Static Positioning .......................................................... 473
Xiaohui Liu, Qianxin Wang, Yamin Dang, Xiaoguo Yang and Jing Zhao

Performance Analysis for Time Synchronization with Compass Satellite Common-View ............................................. 483
Guifen Tang, Li Liu, Jidong Cao, Ranran Su and Xin Shi

Part III Integrated Navigation and New Methods

A Real-Time Maximum Correlation Matching Based on Approximated Local Gravity Map ............................................. 493
Yu-de Tong, Shao-feng Bian and Bing Ji
Robust Unscented Transformation Based Terrain-Aided Inertial Navigation Algorithm .................................................. 505
Long Zhao

Research on Angles-Only/SINS/CNS/GNSS Relative Position and Attitude Determination Algorithm for Uncooperative Target ........ 515
Lijun Zhang, Shifeng Zhang and Shan Qian

Analysis on Pulsar Based Inter-Satellite Link Autonomous Navigation .............................................................. 531
Yue Mao, Xiaoyong Song, Xiaolin Jia, Xianbing Wu and Yisong Gong

Performance Improvement of Attitude Estimation via X-Ray Pulsar for the Spin-Stabilized Spacecrafts ......................... 541
Nan Luo and Luping Xu

Application of Pressure Sensor in Chinese Area Positioning System ................................................................. 551
Lirong Zhang, Lihua Ma, Xiaolan Wang, Haifu Ji and Zhengqun Hu

RSSI System Based on Differential Barometric Altimetry: Research and Analysis ...................................................... 559
Zhengqun Hu, Lirong Zhang, Huli Shi, Jun Pei and Xiaolan Wang

Performance Analysis of Carrier Loop on the Deep Coupling of Low Cost INS/GNSS .................................................. 569
Wang Qian and Gao Feng

The Quick Search Algorithm of Pulsar Period Based on Unevenly Spaced Timing Data ............................................. 581
Qingyong Zhou, Hongfei Ren, Fumei Wu, Jianfeng Ji, Zhenhe Zhai and Bohao Ban

Ultra Miniature MEMS/Satellite Integrated Navigation System ...... 595
Peisheng Wang, Lidong Lan, Yifei Han and Chongfei Shen

MAP Pulse Phase Estimation of X-ray Pulsars ......................... 605
Hua Zhang, Luping Xu and Dajun Feng

A Deeply Coupled GPS/INS Integrated Navigation System Suitable for High Dynamic Environments ..................... 617
Huan Che, Peng Liu, Fengshan Zhang and Qin Wang
Bispectra-Mellin Transform and Its Application in Doppler-Distorted Pulsar Signals ................................................................. 627
Zhe Su, Lixin Zhang, Xiaoping Qian, Qibing Xu and Yisong Li

An Algorithm for Integrated Navigation Based on Multi-Loop Adaptive Switching ................................................................. 637
Yuan Gao, Feng Liu and Teng Long

Comparison of Two Algorithms on Improving GPS/INS Positioning Accuracy During GPS Outage ................................................. 647
Wanliang Hao, Fuping Sun and Po Chen

Study on the Coordinate Reference Frame of the Indoor/Outdoor Seamless Positioning System .................................................. 653
Cheng Liu, Huli Shi, Ziping Lv and Zhongliang Deng

Rapid Water-Sky-Line Detecting Algorithm in Marine Celestial Navigation .................................................................................. 661
Chonghui Li, Yong Zheng, Yulei Yuan and Yufei Yang

An Integrated MEMS IMU/Camera System for Pedestrian Indoor Navigation Using Smartphones ................................................... 669
Shuang Du, Bei Huang and Yang Gao

Simulation Analysis for the Influences of Vehicle Maneuvers to the Attitude Estimations of GNSS/INS Navigation Systems ........... 679
You Li, Qijin Chen, Xiaoji Niu and Chuang Shi
China Satellite Navigation Conference (CSNC) 2012 Proceedings
Sun, J.; Liu, J.; Yang, Y.; Fan, S. (Eds.)
2012, XX, 696 p., Hardcover
