1 Diffraction and the X-Ray Powder Diffractometer .......................... 1
  1.1 Diffraction ............................................. 1
      1.1.1 Introduction to Diffraction ......................... 1
      1.1.2 Bragg’s Law ........................................ 3
      1.1.3 Strain Effects .................................... 6
      1.1.4 Size Effects ....................................... 6
      1.1.5 A Symmetry Consideration ......................... 8
      1.1.6 Momentum and Energy .............................. 9
      1.1.7 Experimental Methods ............................ 10
  1.2 The Creation of X-Rays .................................. 12
      1.2.1 Bremsstrahlung .................................... 13
      1.2.2 Characteristic Radiation .......................... 15
      1.2.3 Synchrotron Radiation ............................ 20
  1.3 The X-Ray Powder Diffractometer ............................. 22
      1.3.1 Practice of X-Ray Generation ...................... 22
      1.3.2 Goniometer for Powder Diffraction .................. 24
      1.3.3 Monochromators, Filters, Mirrors .................. 27
  1.4 X-Ray Detectors for XRD and TEM ............................ 29
      1.4.1 Detector Principles ............................... 29
      1.4.2 Solid State Detectors ............................. 31
      1.4.3 Position-Sensitive Detectors ....................... 33
      1.4.4 Charge Sensitive Preamplifier ..................... 34
      1.4.5 Other Electronics ................................. 35
  1.5 Experimental X-Ray Powder Diffraction Data ...................... 37
      1.5.1 * Intensities of Powder Diffraction Peaks .......... 37
      1.5.2 Normals of Diffracting Planes ..................... 37
      1.5.3 Slit Width ....................................... 38
      1.5.4 Lorentz Factor .................................... 38

1 In section titles, the asterisk, “*,” denotes a more specialized topic. The double dagger, “‡,” warns of a higher level of mathematics, physics, or crystallography.
2 The TEM and Its Optics .................................. 59
  2.1 Introduction to the Transmission Electron Microscope ........ 59
  2.2 Working with Lenses and Ray Diagrams ...................... 63
      2.2.1 Single Lenses .................................. 63
      2.2.2 Multi-Lens Systems .............................. 67
  2.3 Modes of Operation of a TEM .............................. 68
      2.3.1 Dark-Field and Bright-Field Imaging ................ 68
      2.3.2 Selected Area Diffraction ........................ 73
      2.3.3 Convergent-Beam Electron Diffraction .............. 77
      2.3.4 Nanobeam Diffraction ............................ 78
      2.3.5 High-Resolution Imaging .......................... 79
  2.4 Practical TEM Optics ................................... 82
      2.4.1 Electron Guns .................................... 82
      2.4.2 Illumination Lens Systems ......................... 85
      2.4.3 Imaging Lens Systems ............................ 86
  2.5 Glass Lenses .......................................... 88
      2.5.1 Interfaces ........................................ 88
      2.5.2 Lenses and Rays .................................. 89
      2.5.3 Lenses and Phase Shifts ........................... 92
  2.6 Magnetic Lenses ....................................... 93
      2.6.1 Focusing .......................................... 93
      2.6.2 Image Rotation ................................... 96
      2.6.3 Pole Piece Gap .................................. 98
  2.7 Lens Aberrations and Other Defects ......................... 98
      2.7.1 Spherical Aberration .............................. 98
      2.7.2 Chromatic Aberration ............................. 99
      2.7.3 Diffraction ....................................... 100
      2.7.4 Astigmatism ...................................... 101
      2.7.5 Gun Brightness .................................. 104
  2.8 Resolution ............................................ 106
  2.9 Further Reading ....................................... 108
  2.10 Problems ............................................. 109

6.2.4 Equivalence of the Laue Condition and Bragg’s Law .. 247
6.2.5 Reciprocal Lattices of Cubic Crystals ............... 248
6.3 Diffraction from a Lattice with a Basis ................. 249
6.3.1 Structure Factor and Shape Factor .................... 249
6.3.2 Structure Factor Rules ................................ 251
6.3.3 Symmetry Operations and Forbidden Diffractions ...... 256
8 Diffraction Contrast in TEM Images

8.1 Contrast in TEM Images

8.2 Diffraction from Crystals with Defects

8.2.1 Review of the Deviation Parameter, \( s \)

8.2.2 Atom Displacements, \( \delta r \)

8.2.3 Shape Factor and \( t \)

8.2.4 Diffraction Contrast and \( \{ s, \delta r, t \} \)

8.3 Extinction Distance

8.4 The Phase-Amplitude Diagram

8.5 Fringes from Sample Thickness Variations

8.5.1 Thickness and Phase-Amplitude Diagrams

8.5.2 Thickness Fringes in TEM Images

8.6 Bend Contours in TEM Images

8.7 Diffraction Contrast from Strain Fields

8.8 Dislocations and Burgers Vector Determination

8.8.1 Diffraction Contrast from Dislocation Strain Fields

8.8.2 The \( g \cdot b \) Rule for Null Contrast

8.8.3 Image Position and Dislocation Pairs or Loops

8.9 Semi-Quantitative Diffraction Contrast from Dislocations

8.10 Weak-Beam Dark-Field (WBDF) Imaging of Dislocations

8.11 Fringes at Interfaces

8.11.1 Phase Shifts of Electron Wavelets Across Interfaces

8.11.2 Moiré Fringes

8.12 Diffraction Contrast from Stacking Faults

8.12.1 Kinematical Treatment

8.12.2 Results from Dynamical Theory

8.12.3 Determination of the Intrinsic or Extrinsic Nature of Stacking Faults

8.12.4 Partial Dislocations Bounding the Fault

8.12.5 An Example of a Stacking Fault Analysis

8.12.6 Sets of Stacking Faults in TEM Images

8.12.7 Related Fringe Contrast

8.13 Antiphase (\( \pi \)) Boundaries and \( \delta \) Boundaries

8.13.1 Antiphase Boundaries

8.13.2 \( \delta \) Boundaries

8.14 Contrast from Precipitates and Other Defects

8.14.1 Vacancies

8.14.2 Coherent Precipitates

8.14.3 Semicohherent and Incoherent Particles

8.15 Further Reading

8.16 Problems
Transmission Electron Microscopy and Diffractometry of Materials
Fultz, B.; Howe, J.M.
2013, XX, 764 p., Hardcover
