# Contents

## Part I  Basic Principles of Research

1  **Introduction** .................................................. 3  
   1.1 Understanding Your Motivation ............................... 3  
   1.2 The Ph.D. Challenge ........................................ 6  
   1.3 What This Book Is About ..................................... 9  
   1.4 Further Reading ............................................. 10  

2  **Information Systems Research as a Science** ................. 11  
   2.1 Principles of Scientific Inquiry ............................ 11  
   2.2 The Scientific Method ....................................... 15  
   2.3 Essential Concepts in Information Systems Research ...... 18  
   2.4 Further Reading ............................................. 21  

## Part II  Conducting Research

3  **The Research Process** .................................. 25  
   3.1 Research Questions .......................................... 25  
      3.1.1 Motivation ............................................... 28  
      3.1.2 Specification of Problem Statement .................... 29  
      3.1.3 Justification ............................................ 29  
   3.2 Research Design .............................................. 30  
      3.2.1 Observation, Induction, and Deduction ............... 30  
      3.2.2 Selecting a Research Design ........................... 33  
   3.3 Research Methodology ....................................... 36  
   3.4 The Role of Literature in the Research Process .......... 39  
   3.5 Further Reading ............................................. 42  

4  **Theorising** .................................................. 45  
   4.1 What Is Theory? .............................................. 45  
      4.1.1 Definition of Theory .................................... 46  
      4.1.2 Building Blocks of Theory ............................. 47
