

Contents

1	Introduction	1
1.1	Systems Analysis	2
1.2	What is a System?	4
1.3	What is a Model?	7
1.4	The Formation of Models in Natural Science	9
1.5	Questions and Problems	13
2	Mathematical Models: A First Look	15
2.1	From System to Model	15
2.2	Static Models	16
2.3	Dynamic Models	23
2.4	Discrete Time Models	26
2.5	Spatially Continuous Models	27
2.6	Stochastic Models	27
2.7	Questions and Problems	31
3	Static Models	33
3.1	Equilibrium Distribution Between Water and Air	34
3.2	Equilibrium Distribution Between Water and Sediment	35
3.3	Multi-dimensional Static Models	37
3.4	Questions and Problems	39
4	Linear Models with One Variable	43
4.1	The Linear One-Box Model as a Balance Equation	44
4.2	Linear Models with Constant Coefficients	47
4.3	Time-Dependent Coefficients	59
4.4	Questions and Problems	75
5	Linear Models with Several Variables	81
5.1	Linear Models with Two System Variables	81
5.2	Linear Models with Several System Variables	113
5.3	Questions and Problems	120

6	Nonlinear Models	125
6.1	Nonlinear Models with One System Variable	126
6.2	Nonlinear Box Models with Several System Variables	143
6.3	Questions and Problems	160
7	Time-Discrete Models	165
7.1	Time-Discrete Models with One Variable	165
7.2	Time-Discrete Models with Several Variables	180
7.3	Questions and Problems	186
8	Models in Time and Space	189
8.1	Mixing and Transformation	189
8.2	Advection, Diffusion and Exchange	192
8.3	Steady-State Transport/Transformation Models	202
8.4	Time-Dependent Solutions of the Transport/ Transformation Equation	213
8.5	Questions and Problems	221
A	List of Symbols	227
B	Dimensions and Units	231
B.1	Dimensions	231
B.2	Units	232
C	Formulary	233
C.1	Linear Inhomogeneous First-Order Differential Equation	233
C.2	System of Two Linear First-Order Differential Equations	234
C.3	General Solution of the Linear Second-Order Differential Equation with Constant Coefficients	235
C.4	Solution of Linear Differential Equations with Imaginary Eigenvalues	237
D	Eigenvalues	239
D.1	The n-Dimensional System	239
D.2	Explicit Solution for the Two-Dimensional System	240
E	Time-Dependent Diffusion Equation	243
E.1	The Normal or Gaussian Distribution	243
E.2	The Error Function	244
E.3	The Principle of Linear Superposition	244
	Bibliography	247
	Index	249

Introduction to Systems Analysis

Mathematically Modeling Natural Systems

Imboden, D.M.; Pfenninger, S.

2013, VIII, 252 p., Hardcover

ISBN: 978-3-642-30638-9
