Contents

1 Introduction: The Importance of Radiation Protection in Nuclear Medicine .......................... 1
   Sören Mattsson

Part I Measurements

2 Dose Quantities and Units for Radiation Protection ............... 7
   Sören Mattsson and Marcus Söderberg

Part II Radiation Biology

3 Radiobiology for Radiation Protection .............................. 21
   Peter Bernhardt
4 Radiobiology and Radiation Dosimetry for the Lens of the Eye ... 33
   Günther Dietze

Part III Radiation Dose Estimations

5 Radiation Exposure of the Embryo/Foetus and the Newborn Child 49
   Marie Claire Cantone

Part IV Quality Assurance and Quality Control

6 Quality Control of Gamma Cameras, SPECT/CT and PET/CT Units .................................. 71
   Jenny Oddstig, David Minarik, and Mikael Gunnarsson
Part V  Occupational Exposure

7  Occupational Exposure: With Special Reference to Skin Doses in Hands and Fingers ................................. 93
   Adela Carnicer, Mercè Ginjaume, Marta Sans-Merce, Laurent Donadille, Ilona Barth, and Filip Vanhavere

8  Radiation Doses from Patients to Staff Members, Comforters and Caregivers and to the General Population .............. 109
   Dejan Žontar

9  Examples of Shielding Calculations for a PET/CT Installation .... 129
   Markus N. Lonsdale

Part VI  Exposure of the Public

10 Release of Patients After Radionuclide Therapy: Radionuclide Releases to the Environment from Hospitals and Patients ....... 139
    Sören Mattsson and Christian Bernhardsson

Part VII  Rules of Thumb for Radiation Protection in Nuclear Medicine

11 Rules of the Thumb and Practical Hints for Radiation Protection in Nuclear Medicine ........................................ 151
    Sören Mattsson and Martin Andersson

Index ........................................................................................................ 161
Radiation Protection in Nuclear Medicine
Mattsson, S.; Hoeschen, C. (Eds.)
2013, VIII, 168 p., Hardcover
