Contents

1 Community Structure: An Introduction .......................... 1
  1.1 Network Science: An Emerging Discipline .................. 1
  1.2 Community Structure: An Salient Structural Characteristic
      of Networks ........................................... 2
  1.3 A Brief Review for Community Detection .................... 3
      1.3.1 What Is a Community? .............................. 4
      1.3.2 Community Detection .............................. 6
      1.3.3 Community Validity ................................ 11
  1.4 Concluding Remarks ....................................... 14
References ..................................................... 14

2 Detecting the Overlapping and Hierarchical Community Structure
   in Networks .................................................. 19
  2.1 Introduction .............................................. 19
  2.2 EAGLE: Detecting the Overlapping and Hierarchical Community
      Structure ................................................ 21
      2.2.1 The Algorithm ...................................... 21
      2.2.2 Applications ........................................ 25
  2.3 Extending Modularity to Quantify the Overlapping Community
      Structure ................................................ 29
      2.3.1 Quantifying the Overlapping Community Structure .... 30
      2.3.2 Identifying the Overlapping Community Structure .... 32
      2.3.3 Discussions ........................................ 36
      2.3.4 Results ............................................ 37
  2.4 Conclusions and Discussions ................................ 42
References ..................................................... 42

3 Multiscale Community Detection in Networks with Heterogeneous
   Degree Distributions ........................................ 45
  3.1 Introduction .............................................. 45
  3.2 Preliminaries ............................................. 46
      3.2.1 Principal Component Analysis ........................ 46

xiii
3.2.2 Graph Partitioning and the Laplacian Matrix ........ 48
3.2.3 Community Structure and the Modularity Matrix ...... 49
3.3 Framework for Detecting Multiscale Community Structure .. 50
3.3.1 Our Framework .................................. 51
3.3.2 Covariance Matrices of Networks .................. 51
3.3.3 Detection of Community Structure as PCA ........... 53
3.3.4 Detection of Multiscale Community Structure .......... 56
3.4 Heterogeneity Problem and the Rescaling Transformation .. 60
3.5 Experimental Results .................................. 62
3.5.1 Tests on Synthetic Benchmark Networks ............. 63
3.5.2 Tests on Real World Networks ..................... 66
3.6 Conclusions ........................................... 69
References .................................................. 69

4 Community Structure and Diffusion Dynamics on Networks .. 73
4.1 Introduction ............................................ 73
4.2 Diffusion Dynamics on Networks ......................... 74
4.2.1 Diffusion Process on Networks ...................... 74
4.2.2 Network Conductance and Community Structure ....... 78
4.3 Comparative Analysis of Spectral Methods for Community Detection ........................................... 81
4.3.1 The Matrices for Spectral Analysis ................... 82
4.3.2 Tests on Benchmark Networks ....................... 88
4.4 Conclusions ............................................ 90
References .................................................. 91

5 Exploratory Analysis of the Structural Regularities in Networks 93
5.1 Introduction ............................................ 93
5.2 Regularity Exploration in Networks with Only Positive Links 94
5.2.1 Background ......................................... 94
5.2.2 The Stochastic Blockmodel .......................... 95
5.2.3 Comparison with Other Models ...................... 99
5.2.4 Experimental Results .............................. 101
5.2.5 Summary ............................................ 105
5.3 Regularity Exploration in Signed Networks ................ 105
5.3.1 Background ......................................... 106
5.4 Extended Mixture Model for Network Exploration .......... 106
5.4.1 Comparison with Other Models ...................... 110
5.4.2 Experimental Results ................................ 111
5.5 Conclusions ............................................ 115
References .................................................. 116
Community Structure of Complex Networks
Shen, H.-W.
2013, XIV, 117 p., Hardcover
ISBN: 978-3-642-31820-7
