Contents

1 Introduction ........................................ 1
   1.1 History of Superconductivity .................. 1
   1.2 Introduction to Cuprates ..................... 4
       1.2.1 The Crystal Structure of Cuprates ....... 4
       1.2.2 The Phase Diagram of Cuprates .......... 5
       1.2.3 Electronic Structure of Cuprates [27] ... 7
       1.2.4 Summary to the Study of Cuprate Superconductors ... 9
   1.3 ARPES Study on Cuprate Superconductors .... 9
       1.3.1 The Fermi Surface of Bi2212 .......... 10
       1.3.2 ARPES Study on the Many-Body Effect of Cuprate Superconductors ..................... 10
       1.3.3 Superconducting Gap and Pseudogap by ARPES ........ 12
       1.3.4 Summary to the Study of Cuprate Superconductors by ARPES ..................... 13
References ......................................... 14

2 Angle-Resolved Photoemission Spectroscopy ....... 19
   2.1 Introduction .................................. 19
   2.2 The Principle of ARPES [3] .................. 19
       2.2.1 Brief Description of ARPES .......... 20
       2.2.2 Single Particle Spectral Function .... 22
   2.3 Ultra-Violet Laser-Based ARPES ................ 23
       2.3.1 VUV Laser Light Source .............. 25
       2.3.2 Spectroscopy System ................. 28
       2.3.3 Performance of the System [2] .......... 32
   2.4 The Development of Spin-Resolved ARPES, Time-of-Flight ARPES and Tunable Laser ARPES Systems ........ 38
       2.4.1 The Development of Spin-Resolved ARPES ... 39
       2.4.2 The Development of Time-of-Flight ARPES System .... 44
       2.4.3 Tunable Laser-Based ARPES System ....... 46

## 3 Growth of $\text{Bi}_2\text{Sr}_2\text{Ca}_{1-x}\text{Dy}_x\text{Cu}_2\text{O}_{8+\delta}$ Single Crystals

### 3.1 Introduction

$\text{Bi2212}$

### 3.2 $\text{Bi2212}$

### 3.3 Single Crystal Growth by the Traveling Solvent Floating Zone Method

- **3.3.1** Principle of TSFZ and TSFZ Furnace
- **3.3.2** Steps of Single Crystal Growth

### 3.4 Growth of $\text{Bi}_2\text{Sr}_2\text{Ca}_{1-x}\text{Dy}_x\text{Cu}_2\text{O}_{8+\delta}$ Single Crystals

### 3.5 Annealing of Bi2212 in High Pressure Oxygen

### 3.6 Summary

### References

## 4 Nodal Electron Coupling in the $\text{Bi}_2\text{Sr}_2\text{Ca}_1\text{Cu}_2\text{O}_{8+\delta}$

### 4.1 Introduction

### 4.2 Experiments

### 4.3 Nodal Electronic State at Low Temperature

### 4.4 Momentum Dependence of the Dispersion and Self-energy

### 4.5 MDC Dispersion and the Quasiparticle Scattering Rate

### 4.6 Temperature Dependence of the Electron Self-energy

### 4.7 TheSuperconducting Sensitivity of Nodal Electronic State

### 4.8 Summary

### References

## 5 High Energy Dispersion in $\text{Bi}_2\text{Sr}_2\text{Ca}_1\text{Cu}_2\text{O}_{8+\delta}$

### 5.1 Introduction

### 5.2 Tight-Binding Band Structure Calculation [23]

### 5.3 Electron-Phonon Coupling Simulation

### 5.4 Experiment

### 5.5 MDC and EDC Analysis

### 5.6 The ARPES Spectra in Nodal and Antinodal Region

### 5.7 The MDC and EDC Analysis

### 5.8 Summary

### References

## 6 Normal Electron Self-energy and Pairing Self-energy in $\text{Bi}_2\text{Sr}_2\text{Ca}_2\text{Cu}_2\text{O}_8$

### 6.1 Introduction

### 6.2 The Simulation of the Single Particle Function in Superconducting State

### 6.3 The Particle-Hole Mixture Presented in MDC

### 6.4 Experiment

### 6.5 Particle-Hole Mixture at High Temperature

### 6.6 Direct Observation of Particle-Hole Mixture in MDC
