Part I Introduction

1	General Introduction	3
1.1	Introduction	3
1.2	Research Problem, Importance, Relevance and Method	3
1.3	Objectives, Hypotheses and Questions of the Research	8
1.4	Structure of the Research	11
	References	12
2	Economic Development Challenges in Sudan and the Need for Skill Upgrading and Technological Development	15
2.1	Introduction	15
2.2	Economic Characteristics and Strategic Problems for Development in Sudan	17
2.2.1	General Political Context and Socio-Economic Characteristics of Sudan	17
2.3	Overview on the Importance and Impact of Oil in Sudan	20
2.3.1	Overview on the Importance and Historical Background About Oil in Sudan	20
2.3.2	The Role of China in the Exploration, Production and Export of Sudanese Oil	23
2.3.3	Overview on the Oil Impact, Opportunities and Challenges for Development in Sudan	25
2.4	Structural Problems of Labour in Sudan	44
2.4.1	Demographic Structure, Participation Rate and the Declining Productivity of Labour and Economic Growth in Sudan	44
2.4.2	The Low Skill Level and Brain Drain Problem in Sudan	49
2.4.3	The Unemployment, Youth Unemployment and Skill Mismatch at the Macro Level in Sudan	55

2.5 Overview on the Recent Restructuring and Challenges for Development in Sudan 68

2.6 Conclusions 69

References 72

Part II Conceptual and Theoretical Framework

3 Technological Change and Human Capital: Conceptual Framework, Theoretical and Empirical Literature 77

3.1 Introduction 77

3.2 Conceptual Framework: Technological Change and Human Capital 78

3.3 Theoretical Framework: Technological Change, Human Capital and Economic Growth 80

3.3.1 Economic Growth Theory and Exogenous Technical Change 80

3.3.2 Economic Growth Theory and Endogenous Technical Change 81

3.3.3 Human Capital and Economic Growth 83

3.3.4 The Relationship Between Technological Progress, Human Capital (Skill) and Skill Upgrading 88

3.4 Measurement of Technological Change and Human Capital 91

3.4.1 Measurement of Science and Technology Indicators 91

3.4.2 Measurement of Technological Change 94

3.4.3 Measurement of Human Capital (Human Skills) 96

3.5 Endogenous Growth and Public Policy 100

3.6 Conclusions 106

References 107

Part III Empirical Application

4 Research Methodology and Methods of Data Collection 115

4.1 Introduction 115

4.2 Motivation and Selection of a Case Study 116

4.3 The Selection of the Sample and Composition of the Surveys 126

4.4 Structure and Design of the Questionnaire 133

4.5 Conclusions 136

References 137

5 Assessment of Skill and Technology Indicators 139

5.1 Introduction 139

5.2 Causes and Consequences of Deficient Educational System 140

5.2.1 Causes of Deficiency in the Educational System 140

5.2.2 Consequences of the Deficient Educational System 143

5.2.3 Consequences of the Low Educational Qualifications of Unskilled Workers at the Micro/Firm Level 151

5.3	The Impacts of Skill Upgrading and Technological Upgrading: Micro–Macro Views	164
5.4	Conclusions	167
	References	168
6	Assessment of Science and Technology Indicators and the Need for Science and Technological Development in Sudan	171
6.1	Introduction	171
6.2	General Socio-Economic Characteristics of Sudan and S&T Indicators	173
6.3	S&T Indicators in Sudan	174
	6.3.1 Governance of S&T	175
	6.3.2 Human and Financial Input Indicators	176
	6.3.3 Science and Technology Output Indicator and Impact	192
6.4	Conclusions	209
	References	211
7	Relationship Between Skill, Technology and Input–Output Indicators	215
7.1	Introduction	215
7.2	Data, Definition of Variables and General Characteristics of Firms	218
	7.2.1 Data and Definition of Variables	218
	7.2.2 General Characteristics of Firms	220
7.3	Differences in Skill Level and Requirements and the Implications Across Firms	223
	7.3.1 Differences in Skill Level and Requirements (Education and Experience) Across Firms	224
	7.3.2 The Implications of Low Skill Levels Across Firms	228
7.4	Upskilling, Improving Industrial Performance and Relationships Between Required Education (Occupation), Attained/Actual Education, Experience and Average Wages	246
	7.4.1 Upskilling and Improving Performance of Manufacturing Industrial Firms	246
	7.4.2 Relationships Between the Required Education (Occupation), Attained/Actual Education, Experience and Average Wages	251
7.5	Skill, Upskilling (ICT Training), Technology (ICT) and Input–Output Indicators	262
	7.5.1 Skill and the Share of Spending on Technology (ICT) and Upskilling (ICT Training)	263
	7.5.2 The Use of Technology, ICT, Skill and the Demand for Skilled Workers Across Firms	265

7.5.3	The Share of Spending on ICT and Input–Output Indicators	272
7.6	Conclusions	277
	References	278
8	The Importance (Impacts) of Knowledge at the Macro–Micro Levels	281
8.1	Introduction	281
8.2	Definition, Importance, Sources and Measurement of Knowledge in the Growth Literature	282
8.3	The Hypothesis, Stylised Facts and Data	285
8.3.1	The Importance (Impacts) of Knowledge at the Micro–Macro Levels in Sudan	285
8.3.2	Definition of Data and Variables	286
8.4	The Empirical Results	287
8.5	Conclusions	306
	References	307
Part IV Policy Recommendations, Summary and Conclusions		
9	Education, Training and Skill Development Policies in Sudan: Macro–Micro Overview	313
9.1	Introduction	313
9.2	Characteristics of Educational Policies in Sudan: Supply, Demand, Quality and Impacts	316
9.2.1	Characteristics of Educational Policies in Sudan	316
9.2.2	The Supply Side of Educational Policies: Financial and Human Resources	317
9.2.3	The Demand Side of Educational Policies: The Demand for and Enrolment in Education	336
9.2.4	Return, Efficiency and Quality of Educational Policies	358
9.2.5	The Impacts of Educational Policies on Literacy and Access to Schooling (School Life Expectancy)	372
9.3	Characteristics of Training Policies and The Impact of Educational Policies on Training Policies: Large Mixed and Private Firms and Public Policies of Training and Skills Upgrading in Sudan	374
9.3.1	Characteristics of Training Policies in Sudan	374
9.3.2	The Impact of Educational Policies on Training Policies: Large Mixed and Private Firms and Public Policies of Training and Skills Upgrading	375
9.4	Plans and Policies and Mechanisms for Skill Development: The Macro–Micro Views	382
9.4.1	Plans for Skill Development: The Macro–Micro Views	382
9.4.2	Policies and Mechanisms for Skill Development: The Macro–Micro Views	391

9.5	Conclusions	399
	References	403
10	Summary and Conclusions	409
10.1	Research Problem, Methodology and Major Findings	409
10.2	Relevance and Contribution of the Research	418
10.3	Policy Recommendations	425
10.4	Direction for Future Research	429
	References	429
	Appendices	431
	Appendix A: Questionnaire of the Firm Survey (2010)	431
	Appendix B: Questionnaire of the Macro Survey (2010)	459
	Appendix C: Questionnaire of the R&D Survey (2010)	473
	About the Author	477
