1	The Classification Theorem: Informal Presentation	1
1.1	Introduction	1
1.2	Informal Presentation of the Theorem	4
	References	20
2	Surfaces	21
2.1	The Quotient Topology	21
2.2	Surfaces: A Formal Definition	23
	References	25
3	Simplices, Complexes, and Triangulations	27
3.1	Simplices and Complexes	27
3.2	Triangulations	32
	References	35
4	The Fundamental Group, Orientability	37
4.1	The Fundamental Group	37
4.2	The Winding Number of a Closed Plane Curve	42
4.3	The Fundamental Group of the Punctured Plane	45
4.4	The Degree of a Map in the Plane	46
4.5	Orientability of a Surface	47
4.6	Surfaces with Boundary	48
	References	51
5	Homology Groups	53
5.1	Finitely Generated Abelian Groups	53
5.2	Simplicial and Singular Homology	57
5.3	Homology Groups of the Finite Polyhedra	73
	References	77
6	The Classification Theorem for Compact Surfaces	79
6.1	Cell Complexes	79
6.2	Normal Form for Cell Complexes	83

- 6.3 Proof of the Classification Theorem 94
- 6.4 Connected Sums and the Classification Theorem 95
- 6.5 Other Combinatorial Proofs 97

A Guide to the Classification Theorem for Compact
Surfaces

Gallier, J.; Xu, D.

2013, XII, 178 p. 78 illus., 20 illus. in color., Hardcover

ISBN: 978-3-642-34363-6
