Contents

1. A Survey of Observers for Nonlinear Dynamical Systems .......... 1
   Wei Kang, Arthur J. Krener, Mingqing Xiao, and Liang Xu

   S. Lakshmivarahan and John M. Lewis

3. Markov Chain Monte Carlo Methods: Theory and Applications ..... 59
   Derek J. Posselt

4. Observation Influence Diagnostic of a Data Assimilation System ..... 89
   Carla Cardinali

5. A Question of Adequacy of Observations in Variational
   Data Assimilation ................................................. 111
   John M. Lewis and S. Lakshmivarahan

6. Quantifying Observation Impact for a Limited Area
   Atmospheric Forecast Model ....................................... 125
   Clark Amerault, Keith Sashegyi, Patricia Pauley, and James
   Doyle

7. Skewness of the Prior Through Position Errors and Its
   Impact on Data Assimilation ....................................... 147
   Daniel Hodyss and Alex Reinecke

8. Background Error Correlation Modeling with Diffusion
   Operators ............................................................. 177
   Max Yaremchuk, Matthew Carrier, Scott Smith, and Gregg
   Jacobs

9. The Adjoint Sensitivity Guidance to Diagnosis and Tuning
   of Error Covariance Parameters .................................... 205
   Dacian N. Daescu and Rolf H. Langland
10 Treating Nonlinearities in Data-Space Variational Assimilation .......... 233
Brian S. Powell

11 Linearized Physics for Data Assimilation at ECMWF ...................... 251
Marta Janisková and Philippe Lopez

12 Recent Applications in Representer-Based Variational Data Assimilation .............................................................. 287
Boon S. Chua, Edward D. Zaron, Liang Xu, Nancy L. Baker, and Tom Rosmond

13 Variational Data Assimilation for the Global Ocean ...................... 303
James A. Cummings and Ole Martin Smedstad

14 A 4D-Var Analysis System for the California Current: A Prototype for an Operational Regional Ocean Data Assimilation System .............................................................. 345
Andrew M. Moore, Christopher A. Edwards, Jerome Fiechter, Patrick Drake, Emilie Neveu, Hernan G. Arango, Selime Gürol, and Anthony T. Weaver

15 A Weak Constraint 4D-Var Assimilation System for the Navy Coastal Ocean Model Using the Representer Method .......... 367
Hans Ngodock and Matthew Carrier

16 Ocean Ensemble Forecasting and Adaptive Sampling .................... 391
Xiaodong Hong and Craig Bishop

17 Climate Change and Its Impacts on Streamflow: WRF and SCE-Optimized SWAT Models .............................................. 411
Shie-Yui Liong, Srivatsan V. Raghavan, and Minh Tue Vu

18 Entropic Balance Theory and Radar Observation for Prospective Tornado Data Assimilation ............................................. 429
Yoshi K. Sasaki, Matthew R. Kumjian, and Bradley M. Isom

19 All-Sky Satellite Radiance Data Assimilation: Methodology and Challenges .............................................................. 465
Milija Zupanski

20 Development of a Two-way Nested LETKF System for Cloud-resolving Model .............................................................. 489
Hiromu Seko, Tadashi Tsuyuki, Kazuo Saito, and Takemasa Miyoshi

21 Observing-System Research and Ensemble Data Assimilation at JAMSTEC .............................................................. 509
Takeshi Enomoto, Takemasa Miyoshi, Qoosaku Moteki, Jun Inoue, Miki Hattori, Akira Kuwano-Yoshida, Nobumasa Komori, and Shoozo Yamane
