Contents

Micromechanical Modelling of Void Healing ....................... 1
Shireen Afshan, Daniel Balint, Jianguo Lin and Didier Farrugia

Surface Viscoelasticity and Effective Properties of Materials and Structures ........................................... 9
Holm Altenbach and Victor A. Eremeyev

High-Temperature Inelastic Behavior of the Austenitic Steel AISI Type 316 ...................................................... 17
Holm Altenbach and Yevgen Gorash

Finite Element Modelling of the Thermo-Mechanical Behaviour of a 9Cr Martensitic Steel ........................................ 31
R. A. Barrett, P. E. O’Donoghue and S. B. Leen

Enhanced Global Digital Image Correlation for Accurate Measurement of Microbeam Bending ................................ 43
L. I. J. C. Bergers, J. Neggers, M. G. D. Geers and J. P. M. Hoefnagels

An Investigation of the Mechanical Properties of Open Cell Aluminium Foam Struts: Microtensile Testing and Modelling ........ 53
Charles Betts, Daniel Balint and Jianguo Lin

Victor Birman, Yanxin Liu, Stavros Thomopoulos and Guy M. Genin

Some Consequences of Stress Range Dependent Constitutive Models in Creep ..................................................... 77
James T. Boyle
Micro-Mechanical Numerical Studies on the Stress State Dependence of Ductile Damage .................................................. 87
Michael Brünig, Steffen Gerke and Vanessa Hagenbrock

Characterization of Load Sensitive Fatigue Crack Initiation in Ti-Alloys Using Crystal Plasticity Based FE Simulations ............. 97
P. Chakraborty and S. Ghosh

Creep Crack Growth Modelling in 316H Stainless Steel ............. 109
Catrin M. Davies and Ali Mehmanparast

On the Non Saturation of Cyclic Plasticity Law: A Power Law for Kinematic Hardening ..................................................... 121
Rodrigue Desmorat

Micromechanical Studies of Deformation, Stress and Crack Nucleation in Polycrystal Materials .............................. 133
F. P. E. Dunne and C. Sweeney

Modelling of Coupled Dissipative Phenomena in Engineering Materials .................................................. 141
Halina Egner and Władysław Egner

Damage Deactivation of Engineering Materials and Structures .................................................. 153
Artur Ganczarski and Marcin Cegielski

Effect of Orientation and Overaging on the Creep and Creep Crack Growth Properties of 2xxx Aluminium Alloy Forgings ......................... 165
Elisabetta Gariboldi and Antonietta Lo Conte

Dislocation-Induced Internal Stresses ........................................ 177
Peter Geantil, Benoit Devincre and Michael E. Kassner

A Strain Rate Sensitive Formulation to Account for the Effect of γ’ Rafting on the High Temperature Mechanical Properties of Ni-Based Single Crystal Superalloys ......................... 189
Jean-Briac le Graverend, Jonathan Cormier, Serge Kruch, Franck Gallerneau and José Mendez

An Overview of Small Specimen Creep Testing ....................... 201
T. H. Hyde, W. Sun and C. J. Hyde
Kelvin Modes Based Cubic Plasticity and Induced Anisotropic Damage: Application to Creep of AM1 Single Crystal .......................... 217
Roxane Marull and Rodrigue Desmorat

A Grand Master Curve Approach for Off-Axis Creep Rupture Behavior of Orthotropic Fiber Composites at Different Temperatures .......................... 229
Masamichi Kawai

Recent Advances in the Processing and Properties of Ultrafine-Grained Metals Prepared Using Severe Plastic Deformation ........................................ 241
Terence G. Langdon

Macro/Micro Elastic-Viscoplastic Analysis of Woven Composite Laminates with Misaligned Woven Fabrics .......................... 251
Tetsuya Matsuda, Shinya Kanamaru, Naoya Honda and Nobutada Ohno

A Masing-Type Modelling Concept for Cyclic Plasticity at Elevated Temperature ........................................ 263
Thomas Mayer, Edoardo Mazza and Stuart R. Holdsworth

Phase-Field Simulation of Microstructural Evolution in Nickel-Based Superalloys During Creep and in Low Carbon Steels During Martensite Transformation .................. 275
Yoshinori Murata, Yuhki Tsukada and Toshiyuki Koyama

Viscoplastic Constitutive Model to Divide Inelastic Strain into Time-Independent and Time-Dependent Strains ...................... 285
Ken-ichi Ohguchi and Katsuhiko Sasaki

Multiaxial Low Cycle Fatigue for Ni-Base Single Crystal Super Alloy at High Temperature ........................................ 297
Masao Sakane, Shengde Zhang, Akira Yoshinari, Noriaki Matsuda and Nobuhiro Isobe

Mechanics of Materials for Microelectronic Components and Packages .................................................. 307
Vadim V. Silberschmidt

Constitutive Models for the Description of Creep and Plasticity of Cast and Wrought Mg-Al and Mg-Zn Alloys ...................... 317
Stefano Spigarelli, Mohamad El Mehtedi and A. Di Salvia
Deformation and Failure of Various Alloys Under Creep-Fatigue Loading and Their Modelling .......................... 327
Yukio Takahashi

The Effect of Temperature on Interfacial Gradient Plasticity in Metallic Thin Films .................................... 337
George Z. Voyiadjis and Danial Faghihi

A Cyclic Crystal Viscoplastic Model Considering Both Dislocation Slip and Twinning ................................. 351
Chao Yu, Guozheng Kang, Qianhua Kan, Otto T. Bruhns and Chuanzeng Zhang
Advanced Materials Modelling for Structures
Altenbach, H.; Kruch, S. (Eds.)
2013, XXII, 361 p. 239 illus., 60 illus. in color., Hardcover
ISBN: 978-3-642-35166-2
