Contents

Part I  Basic Concept

1 Introduction .................................................. 3
  1.1 Relaxation Time Approximation (RTA) and Current
      Vertex Correction (CVC) ................................. 3
  1.2 Non-Fermi-Liquid-Like Transport Phenomena
      in Cuprate High-$T_c$ Cuprates .......................... 5
  1.3 Non-Fermi Liquid Transport Phenomena in CeMIn$_5$
      ($M =$ Co, Rh, or Ir) and $\kappa$-(BEDT-TTF) ............. 8
  1.4 Fermi Liquid or Non-Fermi Liquid? ........................ 9

References .................................................. 10

2 Fluctuation Theory .......................................... 15
  2.1 Phenomenological Spin Fluctuation Model ................. 15
  2.2 Model Hamiltonian and FLEX Approximation ............... 16
  2.3 Hot/Cold-Spot Structure and $T$-Linear Resistivity
      in Nearly AF Metals ...................................... 20
  2.4 Validity of the Spin Fluctuation Theories .................. 24

References .................................................. 25

3 Anomalous Transport Phenomena in Nearly
   AF Fermi Liquids .......................................... 27
  3.1 Boltzmann Transport Theory and RTA ...................... 27
  3.2 The Variational Principle and CVC ....................... 31
  3.3 Analysis of the CVC Based on the Fermi Liquid Theory .. 33
  3.4 CVC and Ward Identity .................................. 40
  3.5 CVC in Nearly AF Fermi Liquids .......................... 44

References .................................................. 48
### 4 Anomalous Hall Effect (AHE) and Spin Hall Effect (SHE)
- 4.1 Relation Between AHE and SHE
- 4.2 AHE in Two-Orbital Tight-Binding Model
- 4.3 General Expression for the AHC and SHC

#### Part II Recent Advances

#### 5 Transport Phenomena in Cuprate HTSCs Above $T^*$
- 5.1 FLEX+CVC Approximation
- 5.2 Resistivity and Hall Coefficient
- 5.3 Magnetoresistance
- 5.4 Thermoelectric Power
- 5.5 Comments on Over-Doped HTSCs and Other Transport Coefficients
- 5.6 Summary of This Chapter

#### References

#### 6 Transport Phenomena in HTSCs Below $T^*$
- 6.1 Mechanism of Pseudo-Gap Phenomena: Suppression of $\rho$, $R_H$ and $S$ Below $T^*$
- 6.2 Enhancement of Nernst Coefficient and Magnetoresistance Below $T^*$
- 6.3 Fermi Arc Picture and Transport Phenomena
- 6.4 Summary and Future Problems

#### References

#### 7 AC Transport Phenomena in HTSCs
- 7.1 AC Hall Effect in Hole-Doped Systems
- 7.2 AC Hall Effect in Electron-Doped Systems

#### References

#### 8 Impurity Effects in Nearly AF Metals
- 8.1 Hall Coefficient in the Presence of “Weak” Local Impurities
- 8.2 Effect of “Strong” Local Impurities Near AF QCP

#### References

#### 9 Anomalous Transport Behaviors in Heavy Fermions and Organic Superconductors
- 9.1 CeMIn$_5$ ($M =$ Co, Rh, Ir)
- 9.2 $\kappa$-(BEDT-TTF)
