Contents

1 Introduction .......................................... 1
1.1 The Purpose of This Book ............................ 2
1.2 What Makes This Book Different ..................... 4
1.3 How Is This Book Structured? .......................... 5

2 Defining Lean Six Sigma .............................. 7
2.1 Setting the Stage: Why Six of These Sigma? ............ 7
2.2 Standard Deviation, Quality and Cost .................. 11
2.3 Quality Related Costs Elements ....................... 12
  2.3.1 Prevention Costs ................................ 13
  2.3.2 Appraisal Costs .................................. 13
  2.3.3 Failure Costs .................................... 14
  2.3.4 The Cost of Quality ............................... 15
2.4 Why Lean? ........................................... 17
  2.4.1 Early Production Developments .................... 18
  2.4.2 Scientific Management and Mass Production
      Developments ......................................... 18
  2.4.3 Principles of Mass Production ..................... 20
  2.4.4 “Lean” or “Flexible” Production Method ............ 22
2.5 Conclusion .......................................... 24

3 Framework and Methodology .......................... 25
3.1 Operational Definition of a Process .................... 25
3.2 Setting the Framework and Methodology ................. 27

4 “PDSA Initiate” Process Group ....................... 31
4.1 Identify Customers and Stakeholders ................... 33
  4.1.1 Develop a List of Customers and Stakeholders .... 34
  4.1.2 Analyze Stakeholders and Their Interests .......... 39
  4.1.3 Record Stakeholders Information .................. 42
4.2 Develop Project Charter .............................. 42
  4.2.1 Project Purpose or Justification ................... 43
  4.2.2 Project Success Criteria ........................... 44
  4.2.3 High-Level Description of the “Process to be Improved” . 44
  4.2.4 Conclusion ....................................... 45
Contents

4.3 Develop Preliminary Project Scope Statement .................. 49
  4.3.1 Defining the Project Objectives ................................. 50
4.4 Perform Phase Review ............................................. 51
5 “PDSA Plan” Process Group ........................................... 53
  5.1 The Purpose of Planning .......................................... 53
  5.2 The “PDSA Plan” Constituent Processes ........................... 54
6 Develop Project Management Plan ..................................... 57
  6.1 Elements of a “Process Improvement” Project Plan ................. 58
    6.1.1 Scope ................................................. 58
    6.1.2 Phases ............................................... 59
    6.1.3 Milestones ........................................... 59
    6.1.4 Activities .......................................... 60
    6.1.5 Tasks ............................................... 60
    6.1.6 Effort ............................................... 60
    6.1.7 Resources .......................................... 61
    6.1.8 Project Schedule ..................................... 61
    6.1.9 Project Risk ........................................ 61
  6.2 Collating the Materials ........................................... 62
7 Develop Project Management Scope ................................... 65
  7.1 Collect Requirements: V.O.B., V.O.C., & V.O.P. .................. 67
  7.2 Define Scope ................................................. 69
  7.3 Verify Scope ................................................ 71
  7.4 Control Scope ................................................. 72
    7.4.1 Scope Creep ......................................... 72
    7.4.2 Hope Creep ......................................... 73
    7.4.3 Effort Creep ......................................... 73
    7.4.4 Feature Creep ....................................... 73
8 Collecting V.O.C. Requirements ...................................... 75
  8.1 Plan V.O.C. Capturing ........................................... 75
    8.1.1 Identify V.O.C. Data and Clarify Goals ....................... 77
    8.1.2 Develop Operational Definitions and Procedures ........... 77
    8.1.3 Develop Sampling Strategy ................................ 89
    8.1.4 Validate Data Collection System ............................ 92
  8.2 Collect and Organize Data ........................................ 125
    8.2.1 Organize V.O.C. Data: Affinity Clustering ................... 125
  8.3 Analyze Data and Generate Customer Key Needs .................. 128
  8.4 Translate Customer Key Needs into CTXs .......................... 130
  8.5 Set Specifications for CTXs ..................................... 131
  8.6 Conclusion .................................................. 135

    14.4.1 Process Yield: Rolled Throughput Yield ............... 230
    14.4.2 Process Defect Rate ....................................... 231
    14.4.3 Process Capability & Process Performance Indices .. 233
  14.5 Characterize Process & Revise Process Quality Targets .... 241
    14.5.1 The Ideal State (No Failure) ............................. 242
    14.5.2 The Threshold State (Process Outcome Failure) .... 243
    14.5.3 The Brink of Failure (Process Failure) ................. 243
    14.5.4 The State of Total of Failure (Double Failure) ...... 244
    14.5.5 Summary of Process Characterization .................. 245
15 Experimental Study: Design of Experiments .......................... 247
  15.1 Designing and Conducting and Experimental Study ............ 247
  15.2 Basic Concepts .................................................. 249
    15.2.1 Replication ............................................... 249
    15.2.2 Extraneous Input Variables ............................... 249
16 Develop Cost Management Plan

16.1 Plan Cost Data Collection

16.1.1 Cost Classifications for Assigning Costs
16.1.2 Cost Classifications for Predicting Cost Behavior
16.1.3 Cost Classifications for Management and Operations
16.1.4 Cost Classifications for Quality
16.1.5 Cost Classifications for Buying and Selling
16.1.6 Cost Classifications for Project Economics
16.1.7 Cost Classifications for Decision Making

16.2 Collect Costs Data

16.2.1 Personnel Costs
16.2.2 Operating and Maintenance (O&M) Costs
16.2.3 Capital Costs
16.2.4 Overhead Costs
16.2.5 Additional Costs
16.2.6 Why Estimate Costs

16.3 Allocate Costs to Activities

16.3.1 Make or Buy Analysis
16.3.2 Planned Value of Project Activities

16.4 Control Spending

16.4.1 Choose Control Subject
16.4.2 Establish Standard Performance
16.4.3 Plan and Collect Appropriate Data
16.4.4 Summarize Data and Establish Actual Performance
16.4.5 Compare Actual Performance to Standard
16.4.6 Validate Control Subject
16.4.7 Take Action on Difference

17 Develop Procurement Management Plan

17.1 When to Develop a Procurement Plan?

17.2 Developing the Procurement Management Plan

17.2.1 Plan Procurement
17.2.2 Plan Contracting
17.2.3 Invite Tenders
17.2.4 Select Optimal Suppliers
17.2.5 Administer Contracts
17.2.6 Close Contracts
18 Develop Communication Management Plan ........................................ 363
  18.1 Project Communication .................................................. 363
  18.2 Project Communication Management ................................. 365
      18.2.1 Communications Planning ......................................... 366

19 Develop Risk Management Plan ............................................. 381
  19.1 Understanding the Nature of Risk ...................................... 381
  19.2 Characterizing Risk .......................................................... 383
  19.3 Characterizing Project Risk Management ............................... 385
  19.4 Develop Risk Management Planning .................................... 387
  19.5 Identify Project Risks ..................................................... 390
      19.5.1 Project Risks Classification ......................................... 391
      19.5.2 Risk Description ...................................................... 395
      19.5.3 Project Risks Data Collection ....................................... 396
  19.6 Perform Risk Assessment .................................................. 407
      19.6.1 Likelihood of Occurrence of a Risk Event .......................... 407
      19.6.2 Effect of Occurrence of a Risk Event: Risk Impact ............... 409
      19.6.3 Risk Matrix: Importance or Ranking of Risks .................... 410
      19.6.4 Risk Prioritization .................................................. 412
  19.7 Develop Risk Response Planning ....................................... 413
      19.7.1 Planning Responses .................................................. 414
      19.7.2 Developing a Response Plan ........................................ 419
  19.8 Monitor and Control Risk .................................................. 423
      19.8.1 Choose Control Subject ............................................. 423
      19.8.2 Establish Standard Performance .................................... 423
      19.8.3 Plan and Collect Appropriate Data .................................. 424
      19.8.4 Summarize Data and Establish Actual Performance ............... 425
      19.8.5 Compare Actual Performance to Standard ......................... 426
      19.8.6 Validate Control Subject ............................................ 426
      19.8.7 Take Action on Difference .......................................... 426

20 Conduct the Project Retrospective ......................................... 429
  20.1 Understanding the Reflection Process ................................... 429
  20.2 When to Start the Reflection Process? ................................. 430
  20.3 Layers of Reflection ...................................................... 431
  20.4 Facilitating Learning and Continuous Innovation ...................... 432

21 Assess Overall Plan and Implementation ................................ 435
  21.1 Perform Planning Phase Review ......................................... 435
  21.2 Identify and Document Lessons Learned ................................ 436

22 Conclusion to “PDSA Plan” .................................................. 439

23 “PDSA Do” Process Group .................................................. 443
  23.1 The “PDSA Do” Constituent Processes .................................. 443
24 Build Deliverables .................................................. 447
   24.1 Identify and Quantify Assignable Causes of Variations .... 447
      24.1.1 Process Behavior Charts ................................. 448
      24.1.2 Interviews .................................................. 449
      24.1.3 Types of Interviews ....................................... 453
   24.2 Conclusion .................................................... 454

25 Explore Cause-and-Effect Relationship ............................ 455
   25.1 Ishikawa’s Cause-and-Effect Diagram ...................... 455
      25.1.1 Drawing Ishikawa’s Cause-and-Effect Diagram ....... 457
   25.2 Fault Tree Diagram (FTD) ..................................... 458
      25.2.1 Drawing Fault Trees: Gates and Events ............... 459

26 Verify Identified Assignable Causes .............................. 463
   26.1 Plan Assignable Causes Data Capturing ..................... 463
      26.1.1 Identify Assignable Causes Data and Clarify Goals ... 464
      26.1.2 Develop Operational Definitions and Procedures .... 464
      26.1.3 Develop Sampling Strategy ............................... 466
      26.1.4 Validate Data Collection System ....................... 467
   26.2 Collect Cause-and-Effect Relationship Data ............... 467
      26.2.1 Design and Conduct Experiments ....................... 468
      26.2.2 Design and Conduct Observational Studies .......... 468
   26.3 Analyze Collected Data ....................................... 469
      26.3.1 Summarize Data & Display Patterns ................... 470
      26.3.2 Analyze Cause-and-Effect Relationship Data ....... 471

27 Analyze Process Steps and Tasks ................................ 483
   27.1 Identify Goal .................................................. 485
   27.2 Explore Constraints .......................................... 486
   27.3 Is Goal Carried Out to a Satisfactory Standard? ......... 486
   27.4 Examine Operation ........................................... 488
      27.4.1 Generate Hypotheses .................................... 489
      27.4.2 Examine Resources-Task Interaction ................... 497
      27.4.3 Analyze Cognition Within the Discrete Element Context .......................... 505
      27.4.4 Estimate Cost-Benefits of Hypotheses: Value Added . 507
   27.5 Examine Goals by Re-description .................................. 508
   27.6 Summarize Data & Display Value Stream Diagram ........ 509
      27.6.1 Summarize Data .......................................... 509
      27.6.2 Display Maps and Flowcharts Diagrams ................ 510

28 Generate Improvement Solutions .................................. 519
   28.1 Brainstorm Using Available Data Generated So Far ....... 519
   28.2 Prioritize Potential Solutions ................................ 522
   28.3 Develop Prototype, Assess Risk & Pilot Solution(s) ...... 523
      28.3.1 Develop Prototype ....................................... 524
