Contents

1 Introduction: The World of Bats ........................................... 1
Heinz Mehlhorn

2 Bats: A Glimpse on Their Astonishing Morphology and Lifestyle .... 7
Volker Walldorf and Heinz Mehlhorn

3 Bats as Potential Reservoir Hosts for Vector-Borne Diseases ........ 25
Christian Melaun, Antje Werblow, Markus Wilhelm Busch,
Andrew Liston, and Sven Klimpel

4 Bat Endoparasites: A UK Perspective ................................. 63
Jennifer S. Lord and Darren R. Brooks

5 Macroparasites of Microchiroptera: Bat Ectoparasites of Central and South America ............................................ 87
Raphael Frank, Julian Münster, Julia Schulze, Andrew Liston, and
Sven Klimpel

6 Parasitic Bat Flies (Diptera: Streblidae and Nycteribiidae):
Host Specificity and Potential as Vectors ............................... 131
Carl W. Dick and Katharina Dittmar

7 No Myth But Reality: Blood Licking Bats ............................. 157
Heinz Mehlhorn

8 Vampirism in Medicine and Culture ................................... 161
Peter Mario Kreuter and Heinz Schott

9 Unsolved and Solved Myths: Chupacabras and
“Goat-Milking” Birds ....................................................... 173
Heinz Mehlhorn
Bats (Chiroptera) as Vectors of Diseases and Parasites
Facts and Myths
Klimpel, S.; Mehlhorn, H. (Eds.)
2014, XII, 187 p. 35 illus., 33 illus. in color., Hardcover
ISBN: 978-3-642-39332-7
