

# Contents

<b>1 Basic Principles of QCM-D</b> . . . . .	1
References . . . . .	7
<b>2 Conformational Change of Grafted Polymer Chains</b> . . . . .	9
2.1 Introduction . . . . .	9
2.2 Temperature-induced Conformational Change of Grafted PNIPAM Chains with a Low Grafting Density . . . . .	10
2.3 Temperature-induced Conformational Change of Grafted PNIPAM Chains with a High Grafting Density . . . . .	13
2.4 Solvency-induced Conformational Change of PNIPAM Brushes . . . . .	15
2.5 pH-induced Conformational Change of Grafted Polyelectrolytes . . . . .	18
2.6 Salt Concentration and Type-induced Conformational Change of Grafted Polyelectrolytes . . . . .	23
2.7 Conclusion . . . . .	28
References . . . . .	29
<b>3 Grafting Kinetics of Polymer Chains</b> . . . . .	33
3.1 Introduction . . . . .	33
3.2 Pancake-to-Brush Transition . . . . .	34
3.3 Mushroom-to-Brush Transition . . . . .	38
3.4 Conclusion . . . . .	43
References . . . . .	43
<b>4 Growth Mechanism of Polyelectrolyte Multilayers</b> . . . . .	45
4.1 Introduction . . . . .	45
4.2 Roles of Chain Interpenetration and Conformation in the Growth of PEMs . . . . .	47
4.3 Specific Ion Effect on the Growth of PEMs . . . . .	54
4.4 Effects of Chain Rigidity and Architecture on the Growth of PEMs . . . . .	61
4.5 Conclusion . . . . .	66
References . . . . .	66

<b>5</b>	<b>Interactions between Polymers and Phospholipid Membranes . . . .</b>	<b>71</b>
5.1	Introduction . . . . .	71
5.2	Role of Hydrophobic Interaction in the Adsorption of PEG on Lipid Membrane Surface . . . . .	72
5.3	Effect of Length of Hydrocarbon End Group on the Adsorption of PEG on Lipid Membrane Surface . . . . .	77
5.4	Conclusion . . . . .	80
	References . . . . .	80
