1	Introduction	1
Part I Experimental Philosophy and Causality		
2	Causality: Epistemological and Cognitive Considerations	47
2.1	Introduction	47
2.2	Epistemological Questions	49
2.3	The Perception of Causal Relations	51
2.4	Developmental and Cross-Cultural Findings	52
2.5	Epistemological Reflections and Implications	54
2.6	How Epistemology Identifies a Causal Relation	61
2.7	How Cognitive Science Identifies a Causal Relation	63
2.8	Concluding Remarks on Scientific Causal Reasoning	65
3	Cognitive Reasons for Causal Realism	69
3.1	Introduction	69
3.2	Overcoming the Humean Impossibility of A Priori Causal Inference	70
3.3	Mackie's Humean Bias	73
3.4	Cognitive Mechanisms of Causal Thinking	74
3.5	Different Realisms	76
3.6	Can Causal Realism Be Justified by Causal Cognition?	81
3.6.1	Naturalistic Justification	82
3.6.2	Perceptual Justification 1	83
3.6.3	Perceptual Justification 2	84
3.6.4	Evolutionary Justification	87
Part II Cognitive Rationality of Science		
4	Deductive Rationality and Cognition	93
4.1	Towards the Naturalisation of Rationality?	93
4.2	Schizophrenic Reasoning and Logic	96

4.3	Some Theoretical Difficulties in the Traditional Model of Deductive Rationality	98
4.4	Some Empirical Falsifications of the Traditional Model of Deductive Rationality	101
5	Cognitive Theory of Scientific Rationality or of Scientific Reasoning?	113
5.1	From the Rationality of Science to that of the Scientist	113
5.2	The Limited Horizon of Instrumental Rationality	117
5.3	The “Reflective Equilibrium” of Reason Generates Monsters . . .	118
5.4	Falsification or Confirmation Bias?	120
5.5	Bayesian Reasoning: Conservatives or Revolutionaries?	121
5.6	Causal Inference or Magical Thought?	129
5.7	The Unsustainable Lightness of Cognitive Rationality	133
6	The Bridge Between Society and Behaviour in Science	139
6.1	An Example of Methodological Cognitivism in the Social Study of Science	139
6.2	The Statistical Relevance Model	143
6.3	The Erotetic Model	146
6.4	The Causal Model	147
6.5	What Mental Event? The Candidatures of “Folk Psychology” and Cognitive Science	152
7	The Socio-Cognitive Character of Decision Making in Science . . .	161
7.1	The Decision-Maker	161
7.1.1	The Social Actor	162
7.1.2	The Socio-Cognitive Dimension	165
7.2	The Stages of Decision-Making	169
7.2.1	Input	170
7.2.2	Processing	172
7.2.3	Output	182
7.3	Epistemological Attributes	183
7.3.1	Rationality	184
7.3.2	Realism	190
7.3.3	Pragmatism	193
8	Art and Science: Some Neurocognitive Remarks on Creativity . . .	197
8.1	Epistemological Affinities	198
8.2	Creativity and Problem-Solving	203
8.3	Problem Solving at Different Levels of Creativity	204
8.4	The Neurocognitive Base of Artistic Creativity	208

Part III Research Policy and Social Epistemology

9 Social Epistemology and Cognition 219

9.1 Introduction 219

9.1.1 Epistemological Evaluation of the Social Production of Knowledge 220

9.1.2 Sources of Legitimacy 223

9.1.3 Criteria of Justification 228

9.2 Nihilism 228

9.3 Pragmatism 229

9.3.1 Clues of Truth 231

9.3.2 Cognitive Realism 237

10 Cognitive Realism and Science Policy 245

10.1 The Competitive Epistemological Market 245

10.1.1 Elitist Legitimacy of the Rules of Game 248

10.2 Epistemological Landslides in Contemporary Science 253

10.2.1 Second Academic Revolution 253

10.2.2 Science and Politics 255

10.3 Bureaucratic Distortion of Epistemological Competition 260

10.4 The Neoacademism and the Always Fashionable Value of Truth 263

11 Behaviours and Values that Prompted Permanent Innovation 267

11.1 Introduction 267

11.2 Perception of Incentives and Innovative Behaviour 268

11.3 The Growing Returns of Scientific Culture: The First C 270

11.3.1 Appert’s Champagne Bottles and Pasteur’s Microbes 270

11.3.2 Why Does the Scientific Explanation of an Invention Generate More Innovation? 272

11.3.3 Outside the “Black Box” of Knowledge in the First Industrial Revolution 273

11.3.4 Inside the Black Box of Knowledge in the Second Industrial Revolution 275

11.3.5 Organisational Change: Edison’s Invention Factory 278

11.3.6 Innovation Based on University 281

11.3.7 Conclusions 282

11.4 The Selective Pressure of Competition: The Second C 283

11.4.1 The Innovation of the Mizzenmast with a Lateen Sail and the Opening of New Markets 283

11.4.2 The Innovative Superiority of Small Companies 286

11.4.3 The Competitive Advantage of Science 287

11.4.4 Conclusion 289

11.5	Greater Opportunities for Capital: The Third C	291
11.5.1	From the £3,000 of the First Factories to the Growing Need for Capital	291
11.5.2	Joint-Stock Companies and the Stock Market	292
11.5.3	The Growing Divergence Between Financial Behaviour and Company Reality	293
11.5.4	Conclusion	295
11.6	Summary and General Conclusions	296

Part IV Knowledge Transfer and Innovation

12	Tacit “Knowledges”	305
12.1	Introduction	305
12.2	Different Types of Tacit Knowledge	307
12.3	Cultural Diversity of Implicit Cognitive Rules	314
12.4	Dynamics of Tacit Knowledge	318
12.5	Tacit Knowledge as an Explicative Factor for Technology Transfer	321
13	Tacit and Codified Knowledge in Economics	325
13.1	Introduction: the “Codification Debate”	325
13.2	Different Types of Knowledge	326
13.3	Codifying Codification	328
13.4	What is “Tacit Knowledge”?	332
13.5	The Relevance of Tacit Knowledge in Human Activities	336
13.5.1	Historical Evidence	336
13.5.2	Evidence from Neurosciences	336
13.5.3	The Cognitive Account of Scientific Knowledge	337
13.6	Different Types of Tacit Knowledge and the Economics of Codification	338
14	Knowledge Driven Capitalization of Knowledge	345
14.1	Introduction	345
14.2	Analytical Mode of Ontic Knowledge	347
14.3	Cognitive Mode of Ontic Knowledge	350
14.4	Deontic Knowledge: Background Knowledge and Cognitive Rules	353
14.5	Epistemological and Cognitive Determinants of the Capitalization of Knowledge	356
	Appendix: Is Capitalization of Knowledge a Threat to Academic Life?	362

15	Different Cognitive Styles in R&D Labs	367
15.1	Introduction: The Need for Academy-Industry Relations	367
15.2	Relation Between Background Knowledge and Cognitive Rules	370
15.3	Obstacles to Knowledge Transfer: Norms	371
15.3.1	Social Norms	372
15.3.2	Operational Norms	373
15.4	Obstacles to Knowledge Transfer: Cognition	375
15.4.1	Language	375
15.4.2	GROUP	377
15.4.3	Thinking	379
15.4.4	Problem Solving	380
15.4.5	Reasoning	382
15.4.6	Decision Making	385
16	Complexity and the Triple Helix	391
16.1	Introduction	391
16.2	Obstacles to Public Planning	392
16.2.1	Agency Effect	394
16.2.2	Bounded Rationality Effect	395
16.2.3	Complexity Effect	396
16.3	From Single Helix to Triple Helix	398
16.3.1	The Single Helix	399
16.3.2	The Double Helix	400
16.3.3	The Triple Helix	401
16.4	Evolutionary Triple Helix	402
16.5	What Complex Adaptive System (CAS) Can Teach to Triple Helix	405
	Appendix: The Support for ETH from Some Regional Case Studies	410
	References	417
	Index	441
	About the Author	445

Methodological Cognitivism

Vol. 2: Cognition, Science, and Innovation

Viale, R.

2013, XIX, 447 p. 7 illus., 1 illus. in color., Hardcover

ISBN: 978-3-642-40215-9
