8 **Brief Overview of FGOALS CMIP5 Experiments**  
Tianjun Zhou, Lijuan Li, Qing Bao, Pengfei Lin, Bo Wu,  
Wenmin Man and Fengfei Song

---

**Part II Model Evaluation and Analyses**

9 **Overview of FGOALS Contribution to International Climate Modeling Community During Past Years**  
Yongqiang Yu

10 **Long-Term Trends of Two Versions of FGOALS2**  
Pengfei Lin and Hailong Liu

11 **Tropical Biases**  
Xiangcui Liu, Hailong Liu, Pengfei Lin and Yongqiang Yu

12 **The Diurnal Rainfall Cycle in FGOALS**  
Weihua Yuan

13 **Monsoon Intra-Seasonal Variability in Boreal Summer**  
Wenting Hu and Anmin Duan

14 **ENSO and PDO in Two Versions of FGOALS**  
Yongqiang Yu, Lin Chen and Yale Zhang

15 **Seasonal Evolution of the Subtropical Anticyclones Simulated in FGOALS-s2**  
Yimin Liu, Jun Hu, Bian He, Qing Bao, Anmin Duan and Guoxiong Wu

16 **Monsoon Regimes in FGOALS**  
Bo Wu, Lixia Zhang and Weipeng Zheng

17 **Stratospheric Circulation and its Changes in FGOALS-s2**  
Rongcai Ren, Yang Yang, Guoxiong Wu and Ming Cai

18 **The Atlantic Meridional Overturning Circulation, Atlantic Multi-Decadal Oscillation, and North Atlantic Oscillation in Three Climate System Models**  
Jie Zhang and Tianjun Zhou
19 Mascarene High, Australian High, and Antarctic Oscillation
Simulated by FGOALS-s2. ........................................... 153
Dan Sun, Tianjun Zhou and Feng Xue

20 Spring Persistent Rainfall in a Grid-Point and a Spectral
Atmospheric General Circulation Models ......................... 161
Jie Zhang and Tianjun Zhou

21 The Silk Road Teleconnection Pattern in SAMIL2.0 ........... 169
Fengfei Song and Tianjun Zhou

22 The East Asian Subtropical Jet, East Asian Polarfront Jet,
and Transient Activities in FGOALS. .............................. 179
Fengfei Song and Tianjun Zhou

23 Preliminary Evaluations of ENSO-Related Cloud
and Water Vapor Feedbacks in FGOALS ......................... 189
Lin Chen and Yongqiang Yu

24 The Twentieth Century Historical Climate Simulation
of FGOALS .......................................................... 199
Tianjun Zhou and Fengfei Song

25 Climate Extremes in FGOALS ...................................... 207
Liwei Zou

26 Climate Sensitivity of the Flexible Global
Ocean–Atmosphere–Land System Model ......................... 217
Xiaolong Chen, Zhun Guo and Tianjun Zhou

27 A Preliminary Diagnosis of High Climate Sensitivities
simulated by FGOALS-s2 in CMIP5 Historical
and RCP4.5 Scenarios ........................................... 225
Bian He, Yimian Liu, Tianjun Zhou, Guoxiong Wu, Qing Bao,
Pengfei Lin and Fengfei Song

28 Decadal Climate Prediction of FGOALS ......................... 233
Bo Wu and Bin Wang

29 Last Millennial Climate Simulation of FGOALS .............. 239
Wenmin Man and Tianjun Zhou

30 Thermal Expansion-Induced Sea Level Increase Determined
by Flexible Global Ocean–Atmosphere–Land System Model .... 249
Lu Dong and Tianjun Zhou
31 Indian Ocean Warming During 1950–2005 Determined by Flexible Global Ocean–Atmosphere–Land System Model (FGOALS) ............................................ 259
Lu Dong and Tianjun Zhou

32 Representative Concentration Pathway (RCP) Projection of Climate Change by FGOALS ................................. 267
Tianjun Zhou and Fengfei Song

33 Paleoclimate Simulations by FGOALS ................................. 275
Weipeng Zheng and Yongqiang Yu

34 Simulation of Snow Cover Fraction Over Eurasia Determined by FGOALS .................................................. 285
Kun Xia, Bin Wang, Lijuan Li, Si Shen, Wenyu Huang, Shiming Xu, Li Dong and Li Liu

35 Evaluation of Land–Atmosphere Coupling Over Eastern China in the Two Versions of FGOALS .......................... 295
Lingyun Wu

36 Sea Ice Simulations of FGOALS ........................................ 303
Mirong Song, Lijuan Li and Jiping Liu

37 Madden–Julian Oscillation in Boreal Winter ......................... 311
Wenting Hu and Chongbo Zhao

Part III Model Development and Improvements Beyond CMIP5

38 High-Resolution LICOM ............................................. 321
Hailong Liu, Yongqiang Yu, Pengfei Lin and Fuchang Wang

39 Brief Introduction to the High-Resolution Grid-Point Atmospheric Model .................................................. 333
Bin Wang, Lijuan Li, Li Liu, Li Dong, Fabo Zhang, Guodong Yuan and Wenqi Sun

40 High-Resolution FAMIL ............................................. 339
Linjiong Zhou, Qing Bao and Haiyang Yu

41 Improvements on the Representation of Moist Process in a Spectral Atmospheric Model ............................. 351
Xiaocong Wang, Qing Bao, Yimin Liu and Guoxiong Wu
