## Contents

1 **Introduction** ................................................................. 1  
   1.1 Motivating Examples ....................................................... 1  
   1.2 Book Structure ............................................................ 4  
   1.3 Useful Notation ........................................................... 9  

2 **Order Relations and Ordering Cones** .................................. 11  
   2.1 Order Relations ............................................................ 11  
   2.2 Cone Properties Related to the Topology and the Order .......... 17  
   2.3 Convexity Notions for Sets and Set-Valued Maps ................. 22  
   2.4 Solution Concepts in Vector Optimization ........................ 28  
   2.5 Vector Optimization Problems with Variable Ordering Structure ............................................................. 43  
   2.6 Solution Concepts in Set-Valued Optimization .................... 45  
     2.6.1 Solution Concepts Based on Vector Approach .............. 45  
     2.6.2 Solution Concepts Based on Set Approach ............... 48  
     2.6.3 Solution Concepts Based on Lattice Structure .......... 55  
     2.6.4 The Embedding Approach by Kuroiwa .................... 65  
     2.6.5 Solution Concepts with Respect to Abstract Preference Relations ......................................................... 67  
     2.6.6 Set-Valued Optimization Problems with Variable Ordering Structure ............................................................. 70  
     2.6.7 Approximate Solutions of Set-Valued Optimization Problems ............................................................. 73  
   2.7 Relationships Between Solution Concepts .......................... 74  

3 **Continuity and Differentiability** ....................................... 77  
   3.1 Continuity Notions for Set-Valued Maps ............................ 77  
   3.2 Continuity Properties of Set-Valued Maps Under Convexity Assumptions ............................................................. 90  
   3.3 Lipschitz Properties for Single-Valued and Set-Valued Maps ... 96  
   3.4 Clarke’s Normal Cone and Subdifferential .......................... 102  

xiii
3.5 Limiting Cones and Generalized Differentiability .......... 103
3.6 Approximate Cones and Generalized Differentiability ...... 107

4 Tangent Cones and Tangent Sets .................................. 109
4.1 First-Order Tangent Cones ....................................... 110
  4.1.1 The Radial Tangent Cone and the Feasible Tangent Cone ........ 110
  4.1.2 The Contingent Cone and the Interiorly Contingent Cone .... 112
  4.1.3 The Adjacent Cone and the Interiorly Adjacent Cone ......... 120
4.2 Modified First-Order Tangent Cones ............................ 123
  4.2.1 The Modified Radial and the Modified Feasible Tangent Cones ... 124
  4.2.2 The Modified Contingent and the Modified Interiorly Contingent Cones 124
  4.2.3 The Modified Adjacent and the Modified Interiorly Adjacent Cones .... 126
4.3 Miscellaneous Properties of First-Order Tangent Cones ...... 129
4.4 First-Order Tangent Cones on Convex Sets .................... 132
  4.4.1 Connections Among First-Order Tangent Cones on Convex Sets ... 132
  4.4.2 Properties of First-Order Tangent Cones on Convex Sets ........ 137
4.5 First-Order Local Cone Approximation .......................... 143
4.6 Convex Subcones of the Contingent Cone ....................... 147
4.7 First-Order Inversion Theorems and Intersection Formulas ... 156
4.8 Expressions of the Contingent Cone on Some Constraint Sets ................ 161
4.9 Second-Order Tangent Sets .................................... 169
  4.9.1 Second-Order Radial Tangent Set and Second-Order Feasible Tangent Set 170
  4.9.2 Second-Order Contingent Set and Second-Order Interiorly Contingent Set 170
  4.9.3 Second-Order Adjacent Set and Second-Order Interiorly Adjacent Set .... 173
4.10 Generalized Second-Order Tangent Sets ....................... 175
4.11 Second-Order Asymptotic Tangent Cones ...................... 181
  4.11.1 Second-Order Asymptotic Feasible Tangent Cone and Second-Order Asymptotic Radial Tangent Cone 182
  4.11.2 Second-Order Asymptotic Contingent Cone and Second-Order Asymptotic Interiorly Contingent Cone .... 183
4.11.3 Second-Order Asymptotic Adjacent Cone
and Second-Order Asymptotic Interiorly
Adjacent Cone ............................................. 185
4.12 Miscellaneous Properties of Second-Order Tangent
Sets and Second-Order Asymptotic Tangent Cones .......... 187
4.13 Second-Order Inversion Theorems .......................... 192
4.14 Expressions of the Second-Order Contingent Set
on Specific Constraints .......................................... 197
4.15 Miscellaneous Second-Order Tangent Cones .............. 202
4.15.1 Second-Order Tangent Cones of Ledzewicz
and Schaettler ............................................. 202
4.15.2 Projective Tangent Cones of Second-Order .......... 204
4.15.3 Second-Order Tangent Cone of N. Pavel ............. 206
4.15.4 Connections Among the Second-Order
Tangent Cones ............................................. 207
4.16 Second-Order Local Approximation .......................... 207
4.17 Higher-Order Tangent Cones and Tangent Sets ............. 210

5 Nonconvex Separation Theorems ................................. 213
5.1 Separating Functions and Examples ............................ 213
5.2 Nonlinear Separation ........................................... 217
5.2.1 Construction of Scalarizing Functionals ................. 217
5.2.2 Properties of Scalarization Functions ................. 219
5.2.3 Continuity Properties ...................................... 224
5.2.4 Lipschitz Properties ....................................... 225
5.2.5 The Formula for the Conjugate
and Subdifferential of for Convex .......... 231
5.3 Scalarizing Functionals by Hiriart-Urruty and Zaffaroni ... 232
5.4 Characterization of Solutions of Set-Valued
Optimization Problems by Means of Nonlinear
Scalarizing Functionals ........................................ 236
5.4.1 An Extension of the Functional ................................ 236
5.4.2 Characterization of Solutions of Set-Valued
Optimization Problems with Lower Set Less
Order Relation by Scalarization ...................... 240
5.5 The Extremal Principle ........................................... 244

6 Hahn-Banach Type Theorems ....................................... 249
6.1 The Hahn–Banach–Kantorovich Theorem ........................ 250
6.2 Classical Separation Theorems for Convex Sets .......... 258
6.3 The Core Convex Topology ...................................... 261
6.4 Yang’s Generalization of the Hahn–Banach Theorem ...... 264
6.5 A Sufficient Condition for the Convexity of  .......... 271
