## Contents

**Part I  National/Local Science Education Standards**

1  **History and Challenges of Integrated Science Curriculum Implementation in Zhejiang Province, China** .................................................. 3  
   Xiao Huang

2  **Policies for Broadening Implementation of Research-Based Pedagogy in Undergraduate STEM Education: Possible Models, Limitations, and Solutions** ................................................ 15  
   Gavin W. Fulmer

3  **Commonalities and Trends in High School Chemistry Curriculum Standards: By Comparison of International Curriculum Standards** ...................................................... 27  
   Lei Wang, Mingchun Huang, Weizhen Wang, Yanxia Jiang,  
   Lina Zhang, and Ronghui Zhang

**Part II  Public Science Education**

4  **Search for SEAMEO Young Scientists (SSYS) – RECSAM’s Initiative for Promoting Public Science Education: The Way Forward** .......................................................... 45  
   Dominador Dizon Mangao and Ng Khar Thoe

5  **Structure of Student Interest in Science and Scientific Literacy: Using the Latent Class Analysis** .............................................................. 57  
   Takuya Matsuura

6  **The Tentativeness of Scientific Theories: A Study of Views from Different Educational Levels in Malaysia** ........................................ 59  
   Jasmine Jain, Nabilah Abdullah, and Beh Kian Lim

xv
7 The Study of Koreans’ View of Nature .................................................. 73
Yumi Lee and Yeon-A Son

Part III Science Teacher Education

8 New Curriculum Structure of High School in China ......................... 85
Boqin Liao, Juan Yang, and Yannan Shao

9 An Experimental Study on the Integrated Mode
of the Computer Simulation in Scientific Discovery
Learning in Middle School Physics Education ................................. 93
Taihua Li, Lingmin Yuan, Qinling Wang, and Boqin Liao

10 An Empirical Study of Factors Influencing the Professional
Development Levels of Elementary Science Teachers ...................... 105
Chang-chun Lin and Xin Shou

11 Impact Analysis of Student-Centered Inquiry-Based
Project and Implications on Standards of Science
Curriculum in Pakistan .................................................................. 119
Alyas Qadeer Tahir

12 A Long-Term Student Teaching Program in Promoting
Practical Knowledge for Preservice Science Teachers ...................... 139
Koichi Furuya

13 Suggesting a Flow Map of the Nature of Science
for Sciences Education .................................................................. 149
Jun-Young Oh

Part IV Other Topics

14 Relationship Between Learning Quality and Learning Approaches
of High School Students on the Subject of Chemistry ....................... 163
Li-Hua Zou, Jia Li, Wen-Chu Chen, Ming-Li Zhong, and Zhao-Yang Wang

15 Laboratory-Based Scaffolding Strategies for Learning
School Science .................................................................................. 175
Au Sau Kheng and Tan Kok Siang

16 Argumentation in University Chemistry Education:
A Case Study of Practical Investigations from Activity
Theory Perspective ........................................................................ 187
Xiaomei Yan

17 An Energy Education Curriculum for Children Based
on Fostering Creativity in Elementary Schools ............................... 197
Rasool Abdullah Mirzaie and Neda Zerafatdoost
18 Effects of Different Contexts on Lower Secondary School Students’ Scientific Reasoning ............................................................... 207
Hiroshi Unzai

19 Exploration of High School Students’ Concepts About Climate Change Through the Use of an Issue Concept Map (IC-Map) ............ 209
Kongju Mun, Jinhee Kim, Sung-Won Kim, and Joseph Krajcik
International Conference on Science Education 2012 Proceedings
Science Education: Policies and Social Responsibilities
Zhang, B.; Fulmer, G.; Liu, X.; Hu, W.; Peng, S.; Wei, B. (Eds.)
2014, XXIX, 222 p. 50 illus., 25 illus. in color., Softcover
ISBN: 978-3-642-54364-7
