1	Number Systems	1
1.1	Introduction	1
1.1.1	Additional Notation	2
1.1.2	Positional Notation	3
1.2	Positional Notation Using One Base	3
1.2.1	Most Efficient Radix	4
1.2.2	Base Conversion	5
1.2.3	Bases Power of Two	8
1.2.4	Modular Arithmetic	11
1.2.5	Fractional Numbers: Fixed Point Representation	13
1.3	Multiple Radix Representations	15
1.3.1	Double Radix	15
1.3.2	Mixed Radix	15
1.4	Negative Integer Numbers	18
1.4.1	SM Representation	19
1.4.2	Complement Representations	20
1.4.3	Biased Representation	33
1.4.4	Advantages and Disadvantages of the Different Representations	36
1.5	Binary Numbers Multiplication	36
1.5.1	SM Representation	36
1.5.2	Complement Representations	37
1.6	Division and Square Root of Binary Integer Numbers	40
1.6.1	Division	40
1.6.2	Square Root	42
1.7	Decimal Numbers	43
1.7.1	BCD Sum	44
1.7.2	Negative Decimal Numbers	47
1.7.3	Packed BCD Codification (CHC)	49
1.8	Signed Digits	53
1.8.1	Negative Digits	53
1.8.2	Conversion Between Representations	55
1.8.3	Binary Signed Digits (BSD)	56

1.9	Redundant Number Systems	65
1.9.1	Carry Propagation	66
1.9.2	Binary Case	69
1.10	Conclusion	70
	References	70
2	Basic Arithmetic Circuits	71
2.1	Introduction.	71
2.1.1	Serial and Parallel Information	71
2.1.2	Circuit Multiplicity and Pipelining.	72
2.2	Binary Adders	74
2.2.1	Parallel Adders	74
2.2.2	Pipelined Adders	77
2.2.3	Serial Adders	77
2.3	Binary Subtractors	78
2.4	Multipliers	80
2.4.1	Combinational Multipliers	80
2.4.2	Sequential Multipliers	83
2.4.3	Multiplying by a Constant	87
2.5	Exponentiation.	89
2.5.1	Binary Methods.	91
2.5.2	Additive Chains.	95
2.6	Division and Square Root	98
2.6.1	Combinational Divisors	98
2.6.2	Sequential Divisors	99
2.6.3	Dividing by a Constant.	101
2.6.4	Modular Reduction	102
2.6.5	Calculating the Quotient by Undoing the Multiplication	105
2.6.6	Calculating the Quotient by Multiplying by the Inverse of the Divisor.	106
2.6.7	Modular Reduction (Again)	110
2.6.8	Square Root	111
2.7	BCD Adder/Subtractor	112
2.8	Comparators	113
2.9	Shifters	116
2.9.1	Shifters Built with Shift Registers	118
2.9.2	Combinational Shifters.	118
2.10	Conclusion	120
