## Contents

1 **Future Trends of Virtual, Augmented Reality, and Games for Health** ................................................ 1  
Minhua Ma, Lakhmi C. Jain and Paul Anderson  
1.1 Introduction .............................................. 1  
1.2 Chapters Included in the Book ......................... 2  
1.3 Future Trends of VR, AR, and Games for Health .... 5  
  1.3.1 Location-Based Excergaming ....................... 5  
  1.3.2 Mobile Apps ....................................... 5  
  1.3.3 Social Media Gaming for Public Health .......... 5  
References .................................................. 6

Part I Applications in Healthcare Education

2 **Healthcare Training Enhancement Through Virtual Reality and Serious Games** .................................... 9  
Sandrine de Ribaupierre, Bill Kapralos, Faizal Haji, Eleni Stroulia, Adam Dubrowski and Roy Eagleson  
2.1 Introduction: Games and Simulation in Medical Education ... 10  
2.2 Does Video Game Proficiency Correlate with Surgical Skill? ... 17  
2.3 Serious Games for Patient Education .................... 17  
2.4 Games and Play: Structured Learning Versus Entertainment ... 18  
2.5 Hierarchical Task Analysis for Game Scenario Design ....... 21  
2.6 Knowledge Level, Procedural Levels, and Basic Skills Level ... 22  
2.7 Conclusions ............................................. 23  
References .................................................. 24

3 **A Haptic-Based Virtual Reality Head and Neck Model for Dental Education** ................................. 29  
Paul Anderson, Minhua Ma and Matthieu Poyade  
3.1 Introduction .............................................. 30  
3.2 Haptics in Dental Training ............................... 32  
3.3 Development of Head and Neck Anatomy ............... 34  
  3.3.1 Data Construction ................................... 36  
  3.3.2 Data Acquisition ................................... 37
