# Table of Contents

Foreword .................................................................................................................. V  
Acknowledgments ................................................................................................. XI  
Table of Contents ................................................................................................. XIII  
Figures .................................................................................................................. XVII  
Tables ................................................................................................................... XIX  
Nomenclature ........................................................................................................ XXI  

1 Chapter One: Introduction .................................................................................. 1  
    1.1 Background .................................................................................................. 1  
    1.2 Statement of Purpose ............................................................................... 5  
    1.3 Research Questions .................................................................................. 5  
    1.4 Delimitations ............................................................................................. 5  

2 Chapter Two: Literature Review ........................................................................ 7  
    2.1 Knowledge Needed for Teaching ............................................................. 7  
    2.2 Mathematics Knowledge for Teaching .................................................. 9  
    2.3 Teachers' Knowledge of Algebra for Teaching ....................................... 12  
    2.4 Mathematics Knowledge for Teaching Some Key Concepts in Algebra .................................................................................. 16  
        2.4.1 Teaching and Learning of the Concept of Function ..................... 16  
        2.4.2 Teaching and Learning of Expressions and Equations ......... 19  
        2.4.3 Two Perspectives about the Concept of Function:  
            A Case Study of Quadratic Function ............................................ 20  
        2.4.4 Flexibility in Learning the Concept of Function:  A Case Study of Quadratic Function ........................................ 22  
    2.5 Mathematics Teacher Education Systems in China and the U.S. ....... 28  
        2.5.1 Mathematics Teacher Education in China .................................. 28  
        2.5.2 Mathematics Teacher Education in the U.S. ............................. 31
### Chapter Three: Methodology

#### 3.1 Instrumentation

- 3.1.1 Content Appropriateness
- 3.1.2 Translation Equivalence
- 3.1.3 Appropriateness of the Survey from Teachers’ Perspectives
- 3.1.4 Measuring Knowledge for Teaching the Concept of Function

#### 3.2 Data Collection

- 3.2.1 Chinese Data Collection
- 3.2.2 U.S. Data Collection
- 3.2.3 Interview of the Selected U.S. Participants

#### 3.3 Data Analysis

- 3.3.1 Quantifying the Data
- 3.3.2 Inter-Rater Reliability
- 3.3.3 Developing Categories of Different Strategies of Solving Open-ended Items
- 3.3.4 Quantitative Analysis
- 3.3.5 Interview Data Analysis

#### 3.4 Framework for Data Analysis

#### 3.5 Conclusion

### Chapter Four: Results

#### 4.1 Comparison of KAT between China and the U.S.

- 4.1.1 Reliability of the Instrument
- 4.1.2 The Mean Differences of Items and Components between China and the U.S.

5.2.1 Can Knowledge for Teaching Mathematics be Measured across Cultures? ................................................................. 129
5.2.2 Do Chinese Teachers Have Sound Knowledge for Teaching? ....................................................................................... 131
5.2.3 Basic Knowledge and Skills and Flexibility in Problem Solving.................................................................................. 132
5.2.4 What Can We Learn from the Study? ........................................ 133
5.3 Limitation .................................................................................. 134
5.4 Recommendations .................................................................. 135
  5.4.1 Study on the Meaning of Mathematics Knowledge Needed for Teaching .............................................................. 135
  5.4.2 Teachers’ Knowledge for Teaching Other Topics in China and the U.S. .............................................................. 136
  5.4.3 Are There Some Teaching Strategies Effective for Developing Flexibility? .......................................................... 136
5.5 Coda .......................................................................................... 136
