

Contents

Foreword	V
Preface	VII
List of Figures	XIII
List of Tables	XV
List of Abbreviations and Akronyms	XVII
1 Introduction	1
1.1 Motivation	1
1.2 Dissertation outline	3
2 Production planning and steel industry	5
2.1 Supply chain management and production planning	5
2.1.1 The concept of supply chain management	5
2.1.2 Hierarchical structures in production planning	7
2.1.3 Advanced planning systems	9
2.2 Production planning and detailed scheduling	11
2.2.1 Production planning and scheduling process	11
2.2.2 Relevant planning characteristics	13
2.2.3 Production planning principles	15
2.2.4 Quantitative models of lot sizing and scheduling	16
2.2.5 Sequencing rules	22
2.3 Steel production	22
2.3.1 Industry characteristics	22

2.3.2	Current challenges	25
2.3.3	Production setup and processes	30
3	Scheduling concepts with focus on the steel industry	34
3.1	Planning challenges in the steel industry	34
3.1.1	Equipment specific challenges	34
3.1.2	Product portfolio challenges	35
3.1.3	Demand and scheduling characteristics	36
3.1.4	Requirements for quantitative scheduling optimization	37
3.2	Review of batching and scheduling literature with steel industry focus	39
3.2.1	Classification of batching and scheduling models with steel industry focus	39
3.2.2	Review of individual publications	44
3.3	Integrated and separate batching and scheduling	52
3.4	Continuous and discrete representation of time	53
3.5	Block planning principle	54
4	Scheduling of CCs and HSMs in the steel industry	57
4.1	Problem description	57
4.2	Decomposition approach	60
4.3	Model formulations	64
4.3.1	Push-Principle	64
4.3.2	Pull-principle	70
5	Computational Experiments	77

5.1	Experimental design	77
5.2	Results and discussion	82
5.2.1	Results for the push principle	83
5.3	Results for the pull-principle	88
5.4	Comparative analysis of the push and pull-principles	92
5.4.1	Maximum and average waiting times	93
5.4.2	Total production and setup times	97
5.4.3	Analysis of production stops	104
5.4.4	Computational effort	105
6	Conclusion	107
	Appendix	111
	Appendix 1: Discrete time based model formulation	111
	References	113

Integrated Scheduling of Continuous Casters and Hot
Strip Mills

A Block Planning Application for the Steel Industry

Mattik, I.

2014, XVII, 120 p. 39 illus., Softcover

ISBN: 978-3-658-03774-1
