1 Introduction

2 Mathematical preliminaries
   2.1 Notation
   2.2 Vector measures and vector-valued functions of bounded variations
   2.3 Variational methods
      2.3.1 \( \Gamma \)-convergence
      2.3.2 Embedding theorems and inequalities
      2.3.3 Approximations of \( W^{1,p}(\Omega) \) and \( L^q(0,T;W^{1,p}(\Omega)) \)-functions
      2.3.4 Characterization of certain variational inequalities
   2.4 Shrinking sets and admissible subsets
      2.4.1 Covering and representation results
      2.4.2 Local Sobolev spaces on shrinking sets

3 PDE modeling and thermodynamic consistency
   3.1 Phase separation and coarsening processes
   3.2 Partial damage processes
   3.3 Complete damage processes
   3.4 Phase separation coupled with damage processes

4 Cahn-Hilliard systems with polynomial chemical potentials coupled with damage processes and homogeneous elasticity
   4.1 Assumptions
   4.2 Weak formulations and existence results
### CONTENTS

4.2.1 Regularization ........................................... 55
4.2.2 Limit problem ............................................. 60
4.3 Proofs of the existence theorems ................................. 61
   4.3.1 Existence of weak solutions for the regularized system ..... 61
   4.3.2 Existence of weak solutions for the limit system .......... 83

5 Cahn-Hilliard systems with logarithmic chemical potentials coupled with damage processes and inhomogeneous elasticity 91
   5.1 Assumptions .................................................. 92
   5.2 Weak formulations and existence results ........................ 93
   5.3 Proofs of the existence theorems ................................ 98
      5.3.1 Existence of weak solutions for the regularized system ...... 98
      5.3.2 Existence of weak solutions for the limit system - polynomial case 107
      5.3.3 Higher integrability of the strain tensor ..................... 110
      5.3.4 Existence of weak solutions for the limit system - logarithmic case 115

6 Complete damage processes ........................................ 119
   6.1 Assumptions .................................................. 120
   6.2 Weak formulations and existence results ........................ 120
   6.3 Proofs of the existence theorems ................................ 126
      6.3.1 $\Gamma$-limit of the regularized energy ......................... 126
      6.3.2 Degenerate limit of the regularized system ................... 131
      6.3.3 Local- and global-in-time existence results .................. 138

7 Cahn-Hilliard systems coupled with complete damage processes and homogeneous elasticity 145
   7.1 Assumptions .................................................. 146
   7.2 Weak formulations and existence results ........................ 147
   7.3 Proofs of the existence theorems ................................ 150
      7.3.1 $\Gamma$-limit of the regularized energy ......................... 150
      7.3.2 Degenerate limit of the regularized system ................... 152
      7.3.3 Local- and global-in-time existence results .................. 160

8 Conclusion ......................................................... 163

References ......................................................... 167
