Figures and tables .................................................................................................................. 13

1 Introduction: Social mobility perspective and intergenerational downward mobility in educational attainment ............................................................................................................. 17

2 Research on intergenerational mobility ........................................................................... 23
   2.1 Research on social mobility and educational inequality ........................................... 23
   2.2 Research on intergenerational downward mobility ................................................... 33

3 Theoretical approaches: The life-course perspective and rational-choice-based theories of educational decisions ......................................................... 41
   3.1 The life-course perspective ...................................................................................... 41
   3.2 Educational decisions ............................................................................................ 44
      3.2.1 Primary and secondary effects ......................................................................... 45
      3.2.2 Decision parameters: basic concepts and variations ......................................... 47
      3.2.3 Status maintenance .......................................................................................... 52
      3.2.4 The Mare model of sequential educational decisions ......................................... 53
      3.2.5 Critique of rational choice theory and limitations of rationality ....................... 55
   3.3 Combining the life-course approach and rational-choice-based theories of educational decisions .................................................................................................................. 58

4 Data: The sub-study Adult Education and Lifelong Learning of the National Educational Panel Study .................................................................................................................. 61

5 Empirical analysis 1: Educational downward mobility over time in Germany ............... 63
   5.1 Theoretical considerations and hypotheses .............................................................. 63
   5.2 Data .......................................................................................................................... 67
   5.3 Variables ................................................................................................................. 68
   5.4 Methods .................................................................................................................. 70
   5.5 Results ..................................................................................................................... 73
      5.5.1 Educational pathways and the education of parents ......................................... 78
      5.5.2 Duration of education by education of parents .................................................. 81
      5.5.3 Development of downward mobility over cohorts .......................................... 83
   5.6 Summary and conclusion on educational downward mobility over time in Germany ............................................................................................................................... 86
## 6 Empirical analysis 2: Re-entering the academic pathway after starting vocational training in Germany

### 6.1 Social selectivity before and after the tertiary education entrance certificate

Social selectivity before and after the tertiary education entrance certificate.

### 6.2 Theoretical considerations and hypotheses

#### 6.2.1 Decreasing effects of social origin at late educational transitions due to growing independence

Persisting differences in educational decisions by social origin in adult age.

#### 6.2.2 Persisting differences in educational decisions by social origin in adult age

Path dependence.

#### 6.2.3 Path dependence

Age norms and competing life-course roles.

#### 6.2.4 Age norms and competing life-course roles

Opportunity costs and type of vocational training.

#### 6.2.5 Opportunity costs and type of vocational training

Change in transition probabilities over cohorts.

### 6.3 Data

Data.

### 6.4 Variables

#### 6.4.1 Characteristics of the school career

Competing life-course roles.

#### 6.4.2 Competing life-course roles

Characteristics of the vocational training programme.

### 6.5 Methods

Methods.

### 6.6 Results

#### 6.6.1 Selectivity of school leavers with tertiary education entrance certificate choosing vocational training

Descriptive results on activities in the first 5 years after obtaining a tertiary education entrance certificate.

#### 6.6.2 Descriptive results on activities in the first 5 years after obtaining a tertiary education entrance certificate

Multivariate results.

### 6.7 Summary and conclusion on re-entering the academic pathway after starting vocational training in Germany

Summary and conclusion on re-entering the academic pathway after starting vocational training in Germany.

## 7 Empirical analysis 3: Access to tertiary education and dropout in Germany

### 7.1 Selection processes prior to tertiary education in the German education system

Selection processes prior to tertiary education in the German education system.

### 7.2 Descriptive results on access to tertiary education

Descriptive results on access to tertiary education.

### 7.3 Theoretical considerations and hypotheses on dropout from tertiary education

#### 7.3.1 Mechanisms linking pre-tertiary pathways and dropout from higher education

The role of social origins.

#### 7.3.2 The role of social origins

The role of time.

### 7.4 Data

Data.

### 7.5 Sample, variables and methods of the analysis on dropout from tertiary education

Sample, variables and methods of the analysis on dropout from tertiary education.

### 7.6 Results on dropout from tertiary education

Results on dropout from tertiary education.

### 7.6.1 Descriptive results of dropout from tertiary education

### 7.6.2 Multivariate results

### 7.7 Summary and conclusion on access to tertiary education and dropout in Germany

Summary and conclusion on access to tertiary education and dropout in Germany.
8 Intergenerational downward mobility in educational attainment in Germany: Summary of the main results and conclusions .............................. 157
8.1 Summary of the main results................................................................. 157
8.2 Limitations of the present study ............................................................. 162
8.3 Conclusions on the utility of studying downward mobility for sociological research .................................................................................................................. 163
8.4 How do the findings connect to previous and future research? ................. 166
