List of Tables XXI
List of Symbols XXV
List of Abbreviations XXVII

1 Introduction 1
  1.1 Transport Protocols in Logistics 3
  1.2 Contributions of this Thesis 4
  1.3 Outline of this Thesis 5

2 Motivation 7

3 Transport Protocols 11
  3.1 Transmission Control Protocol (TCP) 13
    3.1.1 TCP Tahoe and TCP Reno 14
    3.1.2 TCP New-Reno and TCP SACK 15
    3.1.3 TCP Vegas 16
    3.1.4 TCP BIC and TCP Cubic 17
  3.2 Router-Feedback Based Protocols 18
  3.3 Recent Transport Protocol Proposals 19
  3.4 Model-Driven Congestion Protocols 20

4 Channel Measurements and Channel Traces 23
  4.1 Measurement Description 24
    4.1.1 Channel Measurements 24
    4.1.2 Channel Traces 28
  4.2 Measurement Insights 30
    4.2.1 Stationary Measurements 30
    4.2.2 Mobile Measurements 35
    4.2.3 Stationary and Mobile Measurements on 3G and LTE 42
    4.2.4 Competing Traffic 44
7.2.3 Summary of the Model Assumptions .......... 110
7.3 Evaluation of the Model .......................... 112
  7.3.1 Evaluation Setup and Methodology ........... 112
  7.3.2 Implementation of the Model .................. 114
  7.3.3 Example of the Guided Random Walk .......... 116
  7.3.4 Effect of Quantization ....................... 117
  7.3.5 Training with a Non-Matching User Model ..... 125
  7.3.6 Training with a Matching User Model ......... 127
  7.3.7 Training with a Combined User Model ........ 132
  7.3.8 Evaluation with ON/OFF Traffic Model ........ 134
7.4 Conclusions ........................................ 137
7.5 Extensions to the Model .......................... 139

8 Conclusions and Outlook .......................... 141
  8.1 Conclusions ....................................... 141
  8.2 Outlook .......................................... 143

A Time Series of Channel Measurements .......... 145

B Jain’s Fairness Index ............................... 147

C Overview Bandwidth-Delay Products ............... 149

D Numerical Results of Verus ....................... 151
  D.1 Summary of Throughput for Multiple Flows ..... 151
  D.2 Cellular Network Experiments .................. 152
    D.2.1 Statistical Evaluation ....................... 152
    D.2.2 Numerical results .......................... 152

E Example of Transition Probability Matrix ........ 159

F Numerical Results of Model ....................... 161
  F.1 Effect of Quantization .......................... 161
  F.2 Training with a Non-Matching User Model ..... 163
    F.2.1 Channel Trace #1 .......................... 163
    F.2.2 Channel Trace #2 .......................... 164
    F.2.3 Channel Trace #3 .......................... 166
    F.2.4 Channel Trace #4 .......................... 168
    F.2.5 Channel Trace #5 .......................... 170
  F.3 Training with a Matching User Model .......... 172
    F.3.1 Two Users .................................. 172
Future Mobile Transport Protocols
Adaptive Congestion Control for Unpredictable Cellular Networks
Pötsch, Th.
2016, XXIX, 195 p. 64 illus., 19 illus. in color., Softcover
