Table of Contents

Acknowledgements .............................................................................................................. V

Table of Contents .............................................................................................................. VII

List of Figures ..................................................................................................................... XIII

List of Tables ...................................................................................................................... XV

List of Acronyms ................................................................................................................. XVII

1 Introduction ........................................................................................................................................... 1

1.1 The Challenge of the Fast-Changing Environment ....................................................... 1

1.2 The Relevance of the Dynamic Capabilities Framework ............................................. 2

1.3 Introduction to the Research Field “Sensing” .............................................................. 3

1.4 Concepts of the Study and Main Research Questions .................................................. 5

1.4.1 Concept of Model 1 – The Sensing Capability ......................................................... 5

1.4.2 Concept of Model 2 – Differences between Sensing Opportunities and Sensing Threats ................................................................. 8

1.5 Structure of the Dissertation .......................................................................................... 10

2 Frameworks and Theories around Dynamic Capabilities ........................................... 13

2.1 Introduction to Organization and Strategic Management Theories around Dynamic Capabilities Addressing Adaptability or Sustainable Competitive Advantages ................................................................. 13
2.2 Prominent Organization Theories and Strategic Management Theories Addressing Sustainable Competitive Advantages and Adaptability

2.2.1 Prominent Organization Theories Addressing Adaptability

2.2.1.1 Behavioral Theory

2.2.1.2 Organizational Learning Theory

2.2.1.3 Contingency Theory

2.2.1.4 Strategic Choice Theory

2.2.1.5 Population Ecology Theory

2.2.1.6 Evolutionary Management Theory

2.2.1.7 Institutional Theory

2.2.2 Prominent Strategic Management Theories Addressing Sustainable Competitive Advantages and Adaptability

2.2.2.1 Porter’s Market-Oriented Model

2.2.2.2 Resource-Based View

2.2.2.3 Capability-Based Theory

2.3 Conclusion from the Frameworks and Theories Presented

3 Theoretical Introduction to the Models

3.1 Literature Review on Dynamic Capabilities

3.2 Theoretical Foundations of the DC Framework

3.3 The Sensing Capability
### Table of Contents

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>

5.1.1 Basics of Structural Equation Modeling ..................................... 85
5.1.2 Formative vs. Reflective Measurement ....................................... 85
5.1.3 Covariance-Based vs. Variance-Based Approaches ................... 89
5.2 Measures and Operationalization ..................................................... 90

6 A New Empirical Study ................................................................................. 97

6.1 Research Design of the Study .......................................................... 97
   6.1.1 Survey Development and Questionnaire Concept ....................... 97
   6.1.2 Sample Selection and Description .............................................. 99
6.2 Empirical Evaluation of the Structural Equation Models .......... 100
   6.2.1 Model 1 – The Sensing Capability ........................................... 100
      6.2.1.1 Data Analysis ............................................................... 100
      6.2.1.2 Quality Assessment of the Measurement Model – Validity and Reliability Measures ..................................................... 103
      6.2.1.3 Quality Assessment of the Structural Equation Model ....... 104
      6.2.1.4 Results of Model 1 ............................................................... 106
      6.2.1.5 Discussion of Model 1 ......................................................... 110
   6.2.2 Model 2 – Environmental Sourcing Differences between Sensing Opportunities and Sensing Threats .......... 121
      6.2.2.1 Data Analysis ............................................................... 121
      6.2.2.2 Quality Assessment of the Measurement Model - Validity and Reliability Measures ..................................................... 121
Table of Contents

6.2.2.3 Quality Assessment of the Structural Equation Model ........ 122
6.2.2.4 Results of Model 2 ............................................................... 122
6.2.2.5 Discussion of Model 2 ......................................................... 125

6.3 Research Limitations and Future Research................................. 129

7 Overall Summary and Contribution.................................................. 133
7.1 Summary of the Dissertation .......................................................... 133
7.2 Research Contribution .................................................................. 137
7.3 Implications for Practice ............................................................... 140
7.4 Concluding Remarks .................................................................... 145
