Contents

Part I  Studying Vibrational Communication:  
Ideas, Concepts and History

1  Fostering Research Progress in a Rapidly Growing Field  ....... 3  
Reginald B. Cocroft, Matija Gogala, Peggy S. M. Hill  
and Andreas Wessel

2  Stretching the Paradigm or Building a New? Development  
of a Cohesive Language for Vibrational Communication  ....... 13  
Peggy S. M. Hill

3  Sound or Vibration, an Old Question  
of Insect Communication  ................................ 31  
Matija Gogala

4  Hildegard Strübing: A Pioneer in Vibrational  
Communication Research  ..................................... 47  
Andreas Wessel

5  Sound Production: The Crucial Factor for Mate Finding  
in Planthoppers (Homoptera: Auchenorrhyncha)  
(Preliminary Communication)  .................................. 53  
Hildegard Strübing

Part II  The State of the Field: Concepts and Frontiers  
in Vibrational Communication

6  Interactions Between Airborne Sound and Substrate  
Vibration in Animal Communication  ......................... 65  
Michael S. Caldwell
7 Vibrational Communication Networks: Eavesdropping and Biotic Noise
Meta Virant-Doberlet, Valerio Mazzoni, Maarten de Groot, Jernej Polajnar, Andrea Lucchi, William O. C. Symondson and Andrej Čokl

8 Active Space and the Role of Amplitude in Plant-Borne Vibrational Communication
Valerio Mazzoni, Anna Eriksson, Gianfranco Anfora, Andrea Lucchi and Meta Virant-Doberlet

9 Mutual Behavioral Adjustment in Vibrational Duetting
Rafael L. Rodríguez and Flavia Barbosa

10 Communication Through Plants in a Narrow Frequency Window
Andrej Čokl, Maja Zorovic, Alenka Žunič Kosi, Nataša Stritih and Meta Virant-Doberlet

Part III Practical Issues in Studying Vibrational Communication

11 Physical Aspects of Vibrational Communication
Axel Michelsen

12 The Role of Wave and Substrate Heterogeneity in Vibratory Communication: Practical Issues in Studying the Effect of Vibratory Environments in Communication
Damian O. Elias and Andrew C. Mason

13 Vibrational Playback Experiments: Challenges and Solutions
Reginald B. Cocroft, Jennifer Hamel, Quang Su and Jeremy S. Gibson

Part IV Vibration Detection and Orientation

14 Functional Morphology and Evolutionary Diversity of Vibration Receptors in Insects
Reinhard Lakes-Harlan and Johannes Strauß

15 Echolocation in Whirligig Beetles Using Surface Waves: An Unsubstantiated Conjecture
Jonathan Voise and Jérôme Casas
