Preface

In 1981, under the directing of the great scientist Xuesen Qian, an integrated frontier science—Man–Machine–Environment System Engineering (MMESE)—came into being in China. Xuesen Qian gave high praise to this emerging science. In the letter to Shengzhao Long, he pointed out, “You are creating this very important modern science and technology in China!” in October 22, 1993.

In the congratulation letter to the commemoration meeting of 20th anniversary of establishing the MMESE, the great scientist Xuesen Qian stated, “You have made active development and exploration in this new emerging science of MMESE, and obtained encouraging achievements. I am sincerely pleased and hope you can do even more to make prosper development in the theory and application of MMESE, and make positive contribution to the progress of science and technology in China, and even in the whole world” in June 26, 2001.

October 22nd, which is the day that the great scientist Xuesen Qian gave high praise to MMESE, was determined to be Foundation Commemoration Day of MMESE by the second conference of the fifth MMESE Committee on October 22, 2010. On this very special day, the great scientists Xuesen Qian pointed out in the letter to Shengzhao Long, “You are creating this very important modern science and technology in China!” And the conference also determined that the annual Conference on MMESE would be held from October 21st to 24th to cherish the memory of the great contributions that the great scientist Xuesen Qian had made to the MMESE!

The 14th International Conference on MMESE will be held in Guilin, China on October 21st–24th of this year; hence, we will dedicate Proceedings of the 14th International Conference on Man–Machine–Environment System Engineering to our readers.

Proceedings of the 14th International Conference on Man–Machine–Environment System Engineering is the academic showcases of the 14th International Conference on MMESE joint held by MMESE Committee of China and Beijing KeCui Academe of MMESE in Guilin, China. The conference proceedings is
consisted of 52 more excellent papers selected from more than 400 papers. Due to limitations on space, some excellent papers have been left out, we feel deeply sorry for that. Crudeness in contents and possible incorrectness are inevitable due to the somewhat pressing editing time and we hope you kindly point them out promptly, and your valuable comments and suggestions are also welcomed.

Proceedings of the 14th International Conference on Man–Machine–Environment System Engineering will be published by Springer-Verlag, German. Springer-Verlag is also responsible for the related matters on index of Index to EI and CPCI-S (ISTP), so that the world can know the research quality and development trend of MMESE theory and application. Therefore, the publication of Proceedings of the 14th International Conference on Man–Machine–Environment System Engineering will greatly promote the vigorous development of MMESE in the world, and realize the grand object of making positive contribution to the progress of science and technology in China, and even in the whole world proposed by Xuesen Qian.

We would like to express our sincere thanks to Springer-Verlag, German for their full support and help of during the publishing process.

Beijing, July 2014

Shengzhao Long
Proceedings of the 14th International Conference on Man-Machine-Environment System Engineering
