Contents – Part II

Haptic Illusion and Rehabilitation

Experimental Validation of a Rapid, Adaptive Robotic Assessment of the MCP Joint Angle Difference Threshold ........................................ 3
  Mike D. Rinderknecht, Werner L. Popp, Olivier Lambercy, and Roger Gassert

Friction Sensation Produced by Laterally Asymmetric Vibrotactile Stimulus . . .
  Akihiro Imaizumi, Shogo Okamoto, and Yoji Yamada

Enhancing the Simulation of Boundaries by Coupling Tactile and Kinesthetic Feedback ..................................................... 19
  Yi Yang, Yuru Zhang, Betty Lemaire-Semail, and Xiaowei Dai

Find the Missing Element! Haptic Identification of Incomplete Pictures by Sighted and Visually Impaired Children ............................ 27
  Anaïs Mazella, Jean-Michel Albaret, and Delphine Picard

The Haptic Analog of the Visual Aubert-Fleischl Phenomenon .......... 34
  Alessandro Moscatelli, Meike Scheller, Gabriele Joanna Kowalski, and Marc O. Ernst

Making Gestural Interaction Accessible to Visually Impaired People . . . 41
  Anke Brock, Philippe Truillet, Bernard Oriola, and Christophe Jouffrais

Collaborative Pseudo-Haptics: Two-User Stiffness Discrimination Based on Visual Feedback .................................................... 49
  Ferran Argelaguet, Takuya Sato, Thierry Duval, Yoshifumi Kitamura, and Anatole Lécuyer

Centralizing Bias and the Vibrotactile Funneling Illusion on the Forehead . .
  Hamideh Kerdegari, Yeongmi Kim, Tom Stafford, and Tony J. Prescott

Haptic Rendering for Under-Actuated 6/3-DOF Haptic Devices ............ 63
  Petr Kadlecék, Petr Kmoch, and Jaroslav Křivánek

A Change in the Fingertip Contact Area Induces an Illusory Displacement of the Finger ............................................................... 72
  Alessandro Moscatelli, Matteo Bianchi, Alessandro Serio, Omar Al Atassi, Simone Fani, Alexander Terekhov, Vincent Hayward, Marc O. Ernst, and Antonio Bicchi
Contents – Part II

Illusory Rotations in the Haptic Perception of Moving Spheres and Planes . . . 80
   Astrid M.L. Kappers and Wouter M. Bergmann Tiest

Distinct Pseudo-Attraction Force Sensation by a Thumb-Sized Vibrator
   that Oscillates Asymmetrically . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 88
   Tomohiro Amemiya and Hiroaki Gomi

Obstacle Identification and Avoidance Using the ‘EyeCane’: a Tactile Sensory
   Substitution Device for Blind Individuals . . . . . . . . . . . . . . . . . . . . . . . . 96
   Galit Buchs, Shachar Maidenbaum, and Amir Amedi

Assessment of Tactile Languages as Navigation Aid in 3D Environments . . 104
   Victor Adriel de J. Oliveira and Anderson Maciel

Altering Distance Perception from Hitting with a Stick by Superimposing
   Vibration to Holding Hand . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 112
   Ryuta Okazaki and Hiroyuki Kajimoto

Passive Mechanical Skin Stretch for Multiple Degree-of-Freedom
   Proprioception in a Hand Prosthesis . . . . . . . . . . . . . . . . . . . . . . . . . . . 120
   Aadeel Akhtar, Mary Nguyen, Logan Wan, Brandon Boyce,
   Patrick Slade, and Timothy Bretl

Robotics or Medical Applications

A Visual-Haptic Multiplexing Scheme for Teleoperation Over
   Constant-Bitrate Communication Links . . . . . . . . . . . . . . . . . . . . . . . . . 131
   Burak Cizmeci, Rahul Chaudhari, Xiao Xu, Nicolas Alt,
   and Eckehard Steinbach

Low-Cost 5-DOF Haptic Stylus Interaction Using Two Phantom
   Omni Devices . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 139
   Mats Isaksson, Ben Horan, and Saeid Nahavandi

The Effects of Force Feedback on Surgical Task Performance:
   A Meta-Analytical Integration . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 150
   Bernhard Weber and Sonja Schneider

Switching Robust Control Synthesis for Teleoperation via Dwell
   Time Conditions . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 158
   César A. López Martínez, René van de Molengraft, and Maarten Steinbuch

Performance Evaluation of a Surgical Telerobotic System Using Kinematic
   Indices of the Master Hand-Controller . . . . . . . . . . . . . . . . . . . . . . . . . 167
   Yaster Maddahi, Michael Greene, Liu Shi Gan, Tomas Hirmer,
   Rachael L’Orsa, Sanju Lama, Garnette Roy Sutherland,
   and Kourosh Zareinia
Development of Two-Handed Multi-finger Haptic Interface SPIDAR-10

Lanhai Liu, Satoshi Miyake, Naoki Maruyama, Katsuhito Akahane, and Makoto Sato

A Human-Like Bilateral Tele-Handshake System: Preliminary Development

Sungjun Park, Sangsoo Park, Sang-Yun Baek, and Jeha Ryu

Evaluation of Stretchable Conductor for Measuring Clothing Pressure

Katsunari Sato, Sayasa Otsubo, Teppei Araki, Tohru Sugahara, and Katsuaki Suganuma

The LegoPress: A Rehabilitation, Performance Assessment and Training Device Mechanical Design and Control

Jeremy Olivier, Maxime Jeanneret, Mohamed Bouri, and Hannes Bleuler

Receiver-Based Hybrid Sample Prediction for Error-Resilient Haptic Communication

Fernanda Brandi and Eckehard Steinbach

Multi-digit Softness: Development of a Tactile Display to Render Softness Feeling on Multiple Fingers

Toshiki Kitazawa, Fuminobu Kimura, and Akio Yamamoto

Haptic Rendering on Deformable Anatomical Tissues with Strong Heterogeneities

Guillaume Kazmitcheff, Hadrien Courtecuisse, Yann Nguyen, Mathieu Miroir, Alexis Bozorg Grayeli, Stéphane Cotin, Olivier Sterkers, and Christian Duriez

Grasping Control in Three-Fingered Robot Hand Teleoperation Using Desktop Haptic Device

Lingzhi Liu, Guanyang Liu, and Yuru Zhang

A High-Fidelity Surface-Haptic Device for Texture Rendering on Bare Finger

Michaël Wiertlewski, Daniele Leonards, David J. Meyer, Michael A. Peshkin, and J. Edward Colgate

Task-Oriented Approach to Simulate a Grasping Action Through Underactuated Haptic Devices

Leonardo Meli and Domenico Prattichizzo

Integration of a Particle Jamming Tactile Display with a Cable-Driven Parallel Robot

Andrew A. Stanley, David Mayhew, Rikki Irwin, and Allison M. Okamura

Humanoid Robot Teleoperation with Vibrotactile Based Balancing Feedback

Anais Brygo, Ioannis Sarakoglou, Nadia Garcia-Hernandez, and Nikolaos Tsagarakis
Comparison of Multimodal Notifications During Telesurgery

Rachael L’Orsa, Kourosh Zareinia, Chris Macnab, and Garnette Roy Sutherland

A Multi-DOF Haptic Representation Using Suction Pressure Stimuli on Finger Pads

Daiki Maemori, Lope Ben Porquis, Masashi Konyo, and Satoshi Tadokoro

Evaluating the BioTac’s Ability to Detect and Characterize Lumps in Simulated Tissue

Jennifer C.T. Hui and Katherine J. Kuchenbecker

Modeling and Simulation

A Genetic Algorithm Approach to Identify Virtual Object Properties for Sharing the Feel from Virtual Environments

Yongyao Yan, Greg S. Ruthenbeck, and Karen J. Reynolds

Estimation of Finger Pad Deformation Based on Skin Deformation Transferred to the Radial Side

Yoichiro Matsuura, Shogo Okamoto, and Yoji Yamada

Haptic Rendering of Tissue Stiffness by the Haptic Enhanced Reality Method

Yoshihide Otsuru, Toshio Tsuji, and Yuichi Kurita

Simulation of Soft Finger Contact Model with Rolling Effects in Point-Contact Haptic Interfaces

Gionata Salvietti, Monica Malvezzi, and Domenico Prattichizzo

Haptics Processing Unit Software Architecture for Transportable High Dynamics Force-Feedback Coupling

Annie Luciani, Nicolas Castagne, and James Leonard

Geometrically Limited Constraints for Physics-Based Haptic Rendering

Thomas Knott and Torsten Kuhlen

Vibration and Subsequent Collision Simulation of Finger and Object for Haptic Rendering

Shoichi Hasegawa, Yukinobu Takehana, Alfonso Balandra, Hironori Mitake, Katsuhito Akahane, and Makoto Sato

Computational Modeling Reinforces that Proprioceptive Cues May Augment Compliance Discrimination When Elasticity Is Decoupled from Radius of Curvature

Yuxiang Wang and Gregory J. Gerling

Electrovibration Modeling Analysis

Eric Vezzoli, Michel Amberg, Frédéric Giraud, and Betty Lemaire-Semail
Contents – Part II

Functional Microanatomical Model of Meissner Corpuscle .......................... 377
  Teja Vodlak, Zlatko Vidrih, Primoz Pirih, Ales Skorjanc, Janez Presern, and Tomaz Rodic

Modeling Pneumatic Actuators for a Refreshable Tactile Display ................. 385
  Alexander Russomanno, R. Brent Gillespie, Sile O’Modhrain, and James Barber

Modeling the Weber Fraction of Vibrotactile Amplitudes Using Gain Control Through Global Feedforward Inhibition .................................................. 394
  Ken E. Friedl, Yao Qin, Daniel Ostler, and Angelika Peer

Device for Estimation of Weight and Material of Contents by Shaking ............ 403
  Takeshi Yamamoto and Koichi Hirota

Erratum to: Performance Evaluation of a Surgical Telerobotic System Using Kinematic Indices of the Master Hand-Controller ........................................... E1
  Yaser Maddahi, Michael Greene, Liu Shi Gan, Tomas Hirmer, Rachael L’Orsa, Sanju Lama, Garnette Roy Sutherland, and Kourosh Zareinia

Demo Papers

Demonstration: Passive Mechanical Skin Stretch for Multiple Degree-of-Freedom Proprioception in a Hand Prosthesis ................................. 413
  Aadeel Akhtar, Mary Nguyen, Logan Wan, Brandon Boyce, and Patrick Slade, Timothy Bretl

The PROTOTOUCH Project: an FP7 EU Marie Curie Initial Training Network ................................................................. 416
  Mario Amante, Sérëna Bochereau, Mariama Dione, Brygida Maria Dzidek, David Gueorguiev, Andreas Heinrich, Athanasia Moungon, Thomas Sednaoui, Eric Vezzoli, Zlatko Vidrih, Teja Vodlak, and Michael Wand

Distinct Pseudo-Attraction Force Sensation by a Thumb-Sized Vibrator that Oscillates Asymmetrically ......................................................... 419
  Tomohiro Amemiya, and Hiroaki Gomi

Analysis of the Adapted Inclusive Haptic Rigs for Non-sighted People Using Duration and Collision Metrics ............................................. 421
  Lisa Bowers, and Farshid Amriabdollahian

Haptic Music Player .................................................................................... 423
  Alfonso Balandra, Hironori Mitake, and Shoichi Hasegawa
