# Contents

1 **Introduction** ........................................ 1
   1.1 Background and Significance of Topics ................. 1
   1.2 Advances in Climate Change Research .................. 10
      1.2.1 The Fact of Climate Change ...................... 10
      1.2.2 The Mechanism of Climate Change ................. 17
      1.2.3 The Impact of Climate Change .................... 20
      1.2.4 The Current Characteristics of the Climate
            Change Research ............................... 23
   1.3 The Main Contents .................................. 25
   References ............................................. 26

2 **Data and Methods** ................................... 37
   2.1 Data .................................................. 37
      2.1.1 The Observation Data ............................ 37
      2.1.2 The Data on Glacier Change ...................... 44
      2.1.3 The Reanalyzed Data ............................ 46
   2.2 Methods .............................................. 47
      2.2.1 The Linear Trend ................................ 47
      2.2.2 Moving Mean .................................... 48
      2.2.3 The Calculation of Regional Trend ............... 48
      2.2.4 The Definition of Urban Station and Rural
            Station and the Basis of Classification .......... 49
      2.2.5 The Division of Sub-regions ..................... 50
      2.2.6 The Changes of Atmospheric Circulation System
            in a Large Scale ............................... 50
      2.2.7 The Definition and Calculation of Extreme
            Event Index ................................. 52

| 3 Spatial and Temporal Variation of Temperature and Precipitation in Southwestern China | 61   |
| 3.1 Temporal Variation of Temperature and Precipitation                | 61   |
| 3.1.1 Mean Temperature and Precipitation                               | 61   |
| 3.1.2 The Annual Change of Temperature                                 | 64   |
| 3.1.3 The Annual Precipitation Variation                               | 66   |
| 3.1.4 Inter-annual Variation of Temperature and Precipitation          | 68   |
| 3.1.5 The Temperature and Precipitation Variation Reflected by Ice Cores and Tree Rings | 71   |
| 3.2 Spatial Variation of Temperature and Precipitation                 | 74   |
| 3.2.1 The Spatial Distribution of Temperature Variation                | 74   |
| 3.2.2 The Spatial Distribution of Precipitation Variation              | 75   |
| 3.2.3 The Spatial Distribution of Temperature and Precipitation        | 77   |
| 3.3 Driving Mechanism for Temperature and Precipitation                | 79   |
| 3.3.1 The Relationship of Temperature and Precipitation Variation      | 79   |
| 3.3.2 The Correlation with Temperature Variation, Radiation, Sea Surface Temperature and Sunshine Hours | 84   |
| 3.3.3 The Correlation of Temperature and Precipitation Variation       | 87   |
| 3.3.4 The Comparison of Variation Magnitude of Temperature in Urban and Rural Stations | 94   |
| 3.4 Summary                                                            | 97   |
| References                                                             | 99   |

| 4 Spatial and Temporal Variation of Climate Extremes in Southwestern China | 101  |
| 4.1 Spatial and Temporal Variation of Climate Extremes                   | 101  |
| 4.1.1 Spatial and Temporal Variation of Indices of Temperature Extremes  | 101  |
| 4.1.2 Spatial and Temporal Variations of Precipitation Extremes          | 106  |
4.2 Comparison Among Climate Extremes Indexes........... 111
  4.2.1 The Consistency of Climate Extremes Indexes ....... 111
  4.2.2 The Regional Difference of Climate Extremes
         Indexes ..................................................... 115
  4.2.3 The Comparison of Coldness and Warmth Indexes ... 117
  4.2.4 The Comparison of This Study and Other Sources ... 119
4.3 Driving Mechanism for Climate Extremes .............. 119
  4.3.1 The Correlation with Climate Extremes
         and Atmospheric Circulation ......................... 119
  4.3.2 The Correlation with Climate Extremes
         and Elevation ............................................ 125
  4.3.3 The Comparison of Temperature Extremes
         Between Urban and Rural Station .................... 131
4.4 Summary .................................................. 133
References ..................................................... 134

5 Spatial and Temporal Variation of Sunshine Hours
   in Southwestern China ....................................... 137
  5.1 Temporal Variation of Sunshine Hours ................. 137
    5.1.1 Mean Sunshine Hours ............................... 137
    5.1.2 The Interannual Variation of Sunshine Hours .... 139
  5.2 Spatial Variation of Sunshine Hours ................... 144
    5.2.1 Spatial Distribution of Variation Trends
           in Sunshine Hours During 1961–2008 ............... 144
    5.2.2 Spatial Distribution of Variation Trends
           in Sunshine Hours Between 1961–1990
           and 1991–2008 .......................................... 146
  5.3 Driving Mechanism for Sunshine Hours ................ 150
    5.3.1 Relationship Between Wind Speed
           and Sunshine Hours .................................... 150
    5.3.2 The Relationship Between Relative Humidity
           and Sunshine Hour ..................................... 153
    5.3.3 The Comparison of Sunshine Hours Between
           Urban and Rural Stations .............................. 155
    5.3.4 Correlation with Sunshine Hour and Other
           Meteorological Factors ............................... 161
    5.3.5 Correlation with Sunshine Hour and Altitude ...... 163
  5.4 Summary .................................................. 165
References ..................................................... 167
6 Spatial and Temporal Variation of Wind Speed in Southwestern China ........................................ 169
6.1 Temporal Variation of Wind Speed ......................... 169
  6.1.1 The Mean Wind Speed .................................. 169
  6.1.2 The Interannual Variation of Wind Speed ............. 171
6.2 Spatial Variation of Wind Speed ............................. 174
  6.2.2 Spatial Distribution of Wind Speed Variation ........ 178
6.3 Driving Mechanism for Wind Speed ........................ 180
  6.3.1 Correlation with Wind Speed and Large-Scale Atmospheric Circulation ......................... 180
  6.3.2 Correlation with Wind Speed and Regional Warming ........................................ 186
  6.3.3 Correlation with Wind Speed and Sunshine Hour .... 190
  6.3.4 Correlation with Wind Speed and Altitude ............ 191
  6.3.5 Comparison of Wind Speed Between Urban and Rural Stations .................................. 192
6.4 Summary ...................................................... 194
References ......................................................... 196

7 Glaciers Response to Climate Change in Southwestern China ....... 199
7.1 Characteristics of Glaciers Change ............................ 199
  7.1.1 The Glacier Retreat and Shrinking Areas ............... 199
  7.1.2 Severe Mass Loss of Glacier ............................ 202
  7.1.3 Expansion of Ice Lakes or Lakes Supplied by Ices ... 203
  7.1.4 The Significant Glacier Melt ............................ 205
7.2 Shortening of Glaciers Length ................................ 206
  7.2.1 Characteristics of Stage in Glaciers Length .......... 206
  7.2.2 The Spatial Difference of Glacier Retreat .......... 207
  7.2.3 The Relationship of Glacier Length and Climate Change ........................................ 208
7.3 Negative Balance of Glacier Mass ............................. 212
  7.3.1 Balance of Glacier Mass in Hailuogou Glacier ....... 212
  7.3.2 The Relationship Between Mass Balance Changes in Hailuogou Glacier and Climate Changes ........................................ 213
7.4 Increasing of Glacial Runoff ................................ 215
  7.4.1 Process of Runoff Changes in Yanggong River ...... 215
  7.4.2 Process of Runoff Change in Hailuogou ............... 219
  7.4.3 Possible Effects of Increasing Discharge at High Altitude .................................. 221
7.5 Fragmentation of Glacier Microtopography

7.5.1 Surface Morphology Change of Baishui No. 1

7.5.2 Surface Morphology Change of Hailuogou Glacier

7.5.3 The Changes of Gongba Glacier

7.5.4 The Response of Glacier Surface Morphology Changes to Climate Change

7.6 Summary
