Contents

Decidability of $k$-Soundness for Workflow Nets with an Unbounded Resource ........................................... 1
   Vladimir A. Bashkin and Irina A. Lomazova

Modeling Distributed Private Key Generation by Composing Petri Nets ................................................. 19
   Luca Bernardinello, Görkem Kılınç, Elisabetta Mangioni, and Lucia Pomello

Software Engineering with Petri Nets: A Web Service and Agent Perspective ........................................... 41
   Tobias Betz, Lawrence Cabac, Michael Duvigneau, Thomas Wagner, and Matthias Wester-Ebbinghaus

Modeling Organizational Structures and Agent Knowledge for Mulan Applications ........................................ 62
   Lawrence Cabac, David Mosteller, and Matthias Wester-Ebbinghaus

A Canonical Contraction for Safe Petri Nets ........................................... 83
   Thomas Chatain and Stefan Haar

Symbolic Termination and Confluence Checking for ECA Rules ........................................... 99
   Xiaoqing Jin, Yousra Lembachar, and Gianfranco Ciardo

Tissue Systems and Petri Net Synthesis ........................................... 124
   Jetty Kleijn, Maciej Koutny, and Marta Pietkiewicz-Koutny

A Coloured Petri Net Approach to the Functional and Performance Analysis of SIP Non-INVITE Transaction ........................................... 147
   Junxian Liu and Lin Liu

Author Index ........................................... 179
Transactions on Petri Nets and Other Models of Concurrency IX
Koutny, M.; Haddad, S.; Yakovlev, A. (Eds.)
2014, XIII, 179 p. 84 illus., Softcover
ISBN: 978-3-662-45729-0
