

# Contents

<b>1 Introduction</b> . . . . .	1
1.1 Short Introduction to Graph Theory . . . . .	1
1.2 Distance in Graphs . . . . .	2
1.3 Harary Index of a Graph . . . . .	2
1.4 Harary Matrix of a Graph . . . . .	4
1.5 Modified Harary Index . . . . .	8
References . . . . .	10
<b>2 Extremal Graphs with Respect to Harary Index</b> . . . . .	13
2.1 General Graphs . . . . .	13
2.2 Trees . . . . .	19
2.3 Generalized Trees . . . . .	23
References . . . . .	25
<b>3 Relation Between the Harary Index and Related Topological Indices</b> . . . . .	27
3.1 Relation Between the Harary Index and Reciprocal Wiener Index . . . . .	27
3.2 Relation Between the Harary Index and Zagreb Indices . . . . .	31
References . . . . .	33
<b>4 Some Properties and Applications of Harary Index</b> . . . . .	35
4.1 Some Properties of Harary Index . . . . .	35
4.2 Application of Harary Index in Pure Graph Theory . . . . .	39
4.3 Application of Harary Index in Mathematical Chemistry . . . . .	40
4.4 Application of Harary Index to Structure–Property Modeling . . . . .	48
References . . . . .	53

- 5 The Variants of Harary Index . . . . . 55**
  - 5.1 Extremal Graphs with Respect to  $H_A$  and  $H_M$  . . . . . 56
  - 5.2 Some Properties of Additively Weighted Harary Index . . . . . 63
  - References . . . . . 67
  
- 6 Open Problems . . . . . 69**
  - 6.1 Determining the Minimal Harary Index in a Given Set . . . . . 69
  - 6.2 Other Attractive Open Problems . . . . . 70
  - References . . . . . 73

The Harary Index of a Graph

Xu, K.; Das, K.C.; Trinajstić, N.

2015, XV, 74 p. 35 illus., Softcover

ISBN: 978-3-662-45842-6
