Contents

Multi-Constrained Multi-Path Routing for Server-Centric Data Center Networks .................................................. 1
   Kun Qian, HuanZhao Wang, ChengChen Hu, Che Zhang, and Yadong Zhou

An Efficient Short Null Keys Based Scheme for Securing Network Coding Against Pollution Attacks .......................... 16
   Junsheng Wang, Jin Wang, Yanqin Zhu, and Chengjin Jia

Mirror Data to the Ceiling: A New Completely Wireless Data Center .......................................................... 32
   Yawei Zhao, Honghui Chen, Jia Xu, Hanlin Tan, and Tao Chen

A Personalized k-Anonymity with Fake Position Generation for Location Privacy Protection .................................. 46
   Zhi Luo and Xiaohong Huang

A Localization Algorithm for Wireless Sensor Networks .................................................................................. 56
   Zhi Li, Yingyou Wen, Yinghui Meng, and Hong Zhao

Multi-dimensional Forwarding Tables ........................................................................................................ 68
   Gautier Bayzelon, Shu Yang, Mingwei Xu, and Qi Li

Performance Evaluation of Routing Schemes in Data Center Clos Networks ...................................................... 80
   Yi Wang, Chen Tian, Shengjun Wang, and Wenyu Liu

Hierarchical Adaptive Recovery Algorithm in Mobile ALM ........................................................................ 95
   Jianqun Cui, Wenlin Zhang, Feng Huang, and Libing Wu

Multicast Storage and Forwarding Method for Distributed Router .................................................................. 106
   Yubao Liu and Wenlong Chen

P2P Traffic Identification Using Support Vector Machine and Cuckoo Search Algorithm Combined with Particle Swarm Optimization Algorithm .................................................. 118
   Zhiwei Ye, Mingwei Wang, Chunzhi Wang, and Hui Xu

Author Index ............................................................................................................................................... 133
Frontiers in Internet Technologies
Third CCF Internet Conference of China, ICoC 2014,
Shanghai, China, July 10-11, 2014, Revised Selected Papers
2015, XI, 133 p. 57 illus., Softcover
ISBN: 978-3-662-46825-8
