

Contents

Part I Subjective Utility

1 Levels of Decision Analysis	3
1.1 The Idea of Subjective Utility	3
1.2 Descriptive and Normative Theories	9
1.3 Constructs, Definitions, and Scientific Measurement	10
1.4 Postulates and Axioms	12
1.5 Three Levels of Decision Analysis	14
References	19
2 Utility and Rationality	21
2.1 The von Neumann–Morgenstern View on Economic Motivation.	21
2.2 Axioms and a Theorem in Expected Utility Theory	24
2.3 Evolution of the Theory: Allais’ Paradox.	27
2.4 New Issues	31
2.5 Empirical Assessment of Utility	34
2.6 Arrow–Pratt Formula for the Price of Risk	36
2.7 Experienced Utility and Future Utility.	43
2.8 Rationality Principles and Their Violation	44
2.8.1 Rational Behaviour in Context.	46
2.8.2 The Dire Straits of Decision Analysis.	49
References	50

Part II Psychological Insights

3 Prospect Theory—A Milestone 55

3.1 Two Cognitive Systems 55

3.2 Prospect Theory and Intuitive Thinking. 57

3.2.1 Three Cognitive Features 57

3.2.2 A Utility Function with Weighted Probabilities 59

3.2.3 Cumulative Prospect Theory 62

3.3 Methodological Issues. 68

References 70

4 Intuitive Judgements. 73

4.1 Analytical Means to Manage Uncertainty 73

4.2 Explaining Cognitive Phenomena 78

4.3 Quantifying Everyday Intuitions 80

References 87

Part III Intuition and Decisions

5 The Decision Maker’s Neural Apparatus 91

5.1 A Need for a New Scientific Method 91

5.2 Neurobiology for Modelling Cognition 93

5.3 From Neurons to Behaviour—A Brief Note Without
Formulae. 96

5.4 Analytical Account of the Neurobiological Method. 97

5.4.1 Three Micro Mechanisms 97

5.4.2 The Decision Maker’s Emotions 101

5.5 Emotional Balance and Economic Decisions 104

5.6 Reflex Conditioning and Consumer Behaviour. 106

5.7 A Mix of Old and New Decision Science 108

5.7.1 An Experiment in Economic Psychology 109

5.7.2 An Unorthodox Utility Function 112

5.8 We Are Homo Aequanimus. 115

References 116

6 Choice by Intuition. 119

6.1 Experimental Advances. 119

6.2 Rendezvous Between Theory and Experiment 119

6.3 The Omnium Bonum Economy 120

- 6.4 A Model for Each Individual 124
 - 6.4.1 Solving the Differential Equations 128
 - 6.4.2 Making Decisions with a Hybrid Neural Model of Intuition 132
 - 6.4.3 Solutions by Stochastic Optimization 135
- 6.5 Intuition and Predictability. 140
- 6.6 How Humans Think They Take Decisions. 143
- 6.7 Speculative Axioms and Analytical Principles 144
- References 146

- 7 Adaptive Resonances Across Scales 149**
 - 7.1 Social and Neural Networks 149
 - 7.2 A Fractal-Type Analogy 152
 - 7.3 Socioeconomic Fractality. 154
 - References 155

- Index 157**
