**Part I  Economic Gene Mapping in China by Electricity Economics**

1  China’s Electricity Economy ................................. 3
   1.1  Electricity Economics ...................................... 4
       1.1.1  The Characteristics of Electricity Data .......... 4
       1.1.2  Production Functions with Electricity .......... 7
       1.1.3  Stages of Economic Development in Terms of Electricity Consumption .......... 10
       1.1.4  The Characteristics of Gene in an Economy .... 12
   1.2  Review of the Economic Development in China by Electricity Economics ................. 15
       1.2.1  Economic Activities of Three Industries .......... 16
       1.2.2  National Economic Development ................... 29
       1.2.3  Stages of Economic Development in China ....... 34
   1.3  Review of China’s Economy in Global Crisis ............ 38
       1.3.1  Electricity Growths of Secondary and Tertiary Industries .................. 39
       1.3.2  Electricity Growths for Some Sectors ............ 40
       1.3.3  Electricity Growth Trends .......................... 42
       1.3.4  Employment Analysis ................................. 46
   References .................................................... 47

2  Challenge–Opportunity and Mutations in China’s Economy ............ 49
   2.1  Review of Electricity and Energy Supply in China .......... 50
       2.1.1  Electric Power Supply ............................... 50
       2.1.2  Coal Production and Consumption ................. 56
       2.1.3  Oil Production and Consumption ................... 62
       2.1.4  Natural Gas Production and Consumption .......... 64
2.1.5 Hydro-, Nuclear, and Wind Power Production and Consumption .................... 66
2.1.6 Total Energy Production and Consumption ........ 66
2.2 Emissions ........................................ 71
  2.2.1 Air Pollutions .................................. 71
  2.2.2 Water Pollutions ............................... 73
  2.2.3 People’s Health Problems ....................... 73
2.3 Economic Mutation ................................ 78
  2.3.1 Mutations of the Economy in the USA ............ 79
  2.3.2 Mutations of the Economy in Japan ............... 82
  2.3.3 Mutations of the Economy in China ............... 87
2.4 Findings ........................................ 88
References ........................................ 89

3 Economic Gene Mapping of China ................................ 91
  3.1 Gene Mapping of an Economy ......................... 92
    3.1.1 Economic Gene Mapping ........................ 92
    3.1.2 Economic Gene Maps of the USA ................ 93
    3.1.3 Economic Gene Maps of Japan ................... 94
  3.2 Economic Simulation in China (BAU Scenario) .......... 95
    3.2.1 Production Growths of 42 Sectors ................ 98
    3.2.2 Value-Added Growths of Three Industries ......... 105
    3.2.3 Energy Demand and Supply ........................ 106
  3.3 Economic Simulation of Fiscal and Monetary Policy
    (Policy Scenario) .................................... 108
    3.3.1 Production Growths of 42 Sectors ................ 109
    3.3.2 Value-Added Growths of Three Industries .......... 116
    3.3.3 Energy Demand and Supply ........................ 118
  3.4 Economic Gene Mapping of China ....................... 120
    3.4.1 Economic Gene Maps of China’s National
           Economy .......................................... 120
    3.4.2 Economic Gene Maps for Three Industries ......... 123
    3.4.3 Economic Gene Maps for Sectors .................. 127
  3.5 Comparison of Gene Maps of China and Japan .......... 131
    3.5.1 Economic Development Stage ....................... 133
    3.5.2 A Negative Mutation in the Economic Stage ......... 134
    3.5.3 Similarities and Differences of Gene Maps
           of China and Japan ................................ 137
  3.6 Findings ........................................ 138
References ........................................ 140

Part II Methodology of Agent Response Equilibrium

4 Review of Economic Modeling ............................... 143
  4.1 Economic Activities ................................ 143
  4.2 Input–Output Table ................................ 145

Part III China’s Economic Simulations by Agents
Response Equilibrium

8 China’s Economic Simulation for the Period of Global Crisis .... 233
  8.1 Evaluation Rules of Economic Simulation by the ARE Model .... 234
  8.2 Review of China’s Economy in 2007 .................... 235
  8.3 Economic Simulation for 2008 .......................... 242
    8.3.1 Assumptions ..................................... 242
    8.3.2 Results ......................................... 243
    8.3.3 Calibrations .................................... 251
  8.4 Economic Simulation for 2009 ......................... 253
    8.4.1 Assumptions ..................................... 253
    8.4.2 Results ......................................... 253
    8.4.3 Calibrations .................................... 259
8.5 Economic Simulation for 2010 ........................................ 262
8.5.1 Assumptions .................................................. 262
8.5.2 Results ...................................................... 263
8.5.3 Calibrations .................................................. 269
8.6 Update of Input–Output Table ................................. 272

9.1 Summary of Evaluation Rules on Economic Simulation of ARE Model ........................................ 275
9.2 Economic Simulation for 2011 by ARE Model .......... 276
  9.2.1 Fiscal and Monetary Policies ............................ 276
  9.2.2 Simulation Results ...................................... 277
  9.2.3 Error Analysis ............................................. 284
9.3 Economic Simulation for 2012 by ARE Model .......... 285
  9.3.1 Fiscal and Monetary Policies ............................ 285
  9.3.2 Simulation Results ...................................... 285
  9.3.3 Error Analysis ............................................. 294
9.4 Economic Simulation for 2013 by ARE Model .......... 296
  9.4.1 Fiscal and Monetary Policies ............................ 296
  9.4.2 Simulation Results ...................................... 296
  9.4.3 Error Analysis ............................................. 304
9.5 Economic Simulation for 2014 by ARE Model .......... 305
  9.5.1 Fiscal and Monetary Policies ............................ 305
  9.5.2 Simulation Results ...................................... 306
  9.5.3 Error Analysis ............................................. 314
9.6 Summary and Conclusion ..................................... 315

10 China’s Input–Output Tables of 2011–2025 Simulated by ARE ........................................ 317
  10.1.1 Input–Output Tables .................................... 319
  10.1.2 Analysis .................................................. 319
10.2 Input–Output Tables of 2015–2025 (BAU Scenario) .... 345
  10.2.1 Input–Output Tables .................................... 345
  10.2.2 Analysis .................................................. 412
10.3 Input–Output Tables of 2015–2025 (Policy Scenario) ... 418
  10.3.1 Input–Output Tables .................................... 418
  10.3.2 Analysis .................................................. 486
China's Economic Gene Mutations
By Electricity Economics and Multi-agent
