## Contents

1 A Century of Black Hole Physics: From Classical Geometry to Hawking Radiation and the Firewall Controversy ....... 1  
   1.1 The Mathematical Discovery of Black Holes ............... 1  
   1.2 The Thermodynamics of Black Holes ....................... 9  
   1.3 Hawking Radiation: Black Holes Are not so Black ....... 11  
   1.4 The Information Loss Paradox and Firewalls ............ 16  
   1.5 There’s Plenty of Room at the Bottom ................... 26  
   1.6 Some Other Approaches to Resolve the Information Loss Paradox and Firewall Controversy .................. 29  
   References ...................................................... 31  

2 General Relativity: Subtle Is the Lord ....................... 37  
   2.1 What is General Relativity? ............................... 37  
      2.1.1 Differential Geometry in a Nutshell ................ 38  
      2.1.2 The Einstein Field Equations ....................... 44  
   2.2 Some Subtleties of General Relativity .................... 47  
   2.3 Is the Metric Just Another Field? ....................... 50  
   2.4 Equivalence Principle, Einstein’s elevator, and All that .... 52  
   2.5 Causal Structure and Penrose Diagrams .................. 54  
   2.6 Anti-de Sitter Spacetime and Holography ................ 59  
      2.6.1 Stereographic Projection and Hyperbolic Geometry . . 60  
      2.6.2 The Geometry of Anti-de Sitter Spacetime .......... 63  
      2.6.3 Holography: The AdS/CFT Correspondence .......... 67  
   References ...................................................... 71  

3 The Positive Mass Theorem, Stability, and Phase Transitions ...... 75  
   3.1 Defining Mass in General Relativity ..................... 75  
   3.2 Positive Mass and Stability .............................. 84  
   3.3 The Euclidean Action ................................... 87  
   3.4 Phase Transitions Between Spacetimes ................... 91  
   References ...................................................... 97
4 Hiscock and Weems: Modeling the Hawking Evaporation of Asymptotically Flat Charged Black Holes ........................................ 101
  4.1 Black Hole Evolution and Cosmic Censorship .......................... 101
  4.2 Reissner–Nordström Black Holes Revisited .............................. 103
  4.3 The Hiscock and Weems Model ............................................. 106
  References ............................................................................... 118

5 Why Hawking Radiation Cannot Be Decoded ............................... 121
  5.1 Information Decoding Versus the Lifetimes of Charged Black Holes ................................................................. 121
  5.2 Evaporating Charged AdS Black Holes .................................... 130
  5.3 Thermodynamics of Charged Evaporating Flat Black Holes ...... 137
  5.4 Fatal Attraction Toward Extremality ...................................... 143
  5.5 Charge Loss (or the Lack Thereof) for AdS Black Holes .......... 150
  5.6 Conclusion: Hawking Radiation Cannot be Decoded .......... 158
  References ............................................................................... 159

6 Slaying Monsters: Do Hyper-Entropic Objects Exist in Quantum Gravity? ................................................................. 163
  6.1 The Large Volume of Black Holes ............................................ 163
  6.2 A Monster Is Born ................................................................ 167
  6.3 Monsters in String Theory ...................................................... 172
  6.4 Collapsing Versus Destabilizing a Monster .............................. 181
  6.5 The Fate of Monsters ............................................................ 182
  References ............................................................................... 185

Appendix A: Epilogue ................................................................. 187

Appendix B: The Path Integral and Thermodynamics .................. 191

Appendix C: Quantum Information ............................................ 201

Appendix D: Brane-Pair Production via Seiberg-Witten Instability ................................................................. 215
Evolution of Black Holes in Anti-de Sitter Spacetime and the Firewall Controversy
Ong, Y.C.
2016, XXIV, 222 p. 48 illus., 6 illus. in color., Hardcover
ISBN: 978-3-662-48269-8
