

Contents

1	Literature Review and Research Background	1
1.1	Introduction to Graphene	1
1.2	Summary of Graphene Preparation Methods	2
1.3	The Synthesis and Structure of Graphite Oxide	4
1.4	The Formation of Reduced Graphene Oxide	12
1.4.1	Thermal Annealing	14
1.4.2	Chemical Reduction	17
1.5	Application Prospect of Reduced Graphene	21
1.5.1	Paper/Membrane-Like Materials	21
1.5.2	Energy Storage Materials	29
1.5.3	Other Applications	38
1.6	The Proposal of the Topic and the Main Research Contents	38
	References	41
2	Structural Evolution of the Thermally Reduced Graphene Nanosheets During Annealing	51
2.1	Introduction	51
2.2	Experimental	52
2.2.1	Preparation of TRG	52
2.2.2	Sample Characterization	52
2.2.3	Electrochemical Measurements	53
2.3	Results and Discussion	54
2.3.1	Structural Evolution	54
2.3.2	Electrochemical Performance	61
2.4	Conclusions	68
	References	69

3	Hierarchical Amination of Graphene for Electrochemical Energy Storage	73
3.1	Introduction	73
3.2	Experimental.	74
3.2.1	Preparation of Hierarchically Aminated Graphene	74
3.2.2	Sample Characterization.	75
3.2.3	Electrochemical Measurements	75
3.3	Results and Discussion.	76
3.3.1	The Microstructure of AGHs	76
3.3.2	The Surface Chemistry of AGHs	79
3.3.3	The Electrochemical Capacitance of AGH	86
3.4	Conclusions	93
	References	93
4	Free-Standing Graphene Film with High Conductivity by Thermal Reduction of Self-assembled Graphene Oxide Film	97
4.1	Introduction	97
4.2	Experimental.	98
4.3	Results and Discussion.	99
4.4	Conclusions	107
	References	108
5	Template-Directed Macroporous ‘Bubble’ Graphene Film for the Application in Supercapacitors.	111
5.1	Introduction	111
5.2	Experimental.	112
5.2.1	Synthesis of PMMA Latex Spheres.	112
5.2.2	Hard Template Route for Macroporous Graphene Film	112
5.2.3	Structural Characterization	113
5.2.4	Electrochemical Measurements	113
5.3	Results and Discussion.	114
5.4	Conclusions	119
	References	119
6	SnO₂@Graphene Composite Electrodes for the Application in Electrochemical Energy Storage	123
6.1	Introduction	123
6.2	Experimental.	125
6.2.1	Pre-graphenization: SnO ₂ @TRG Hybrids.	125
6.2.2	Post-graphenization: SnO ₂ @CRG Hybrids	125
6.2.3	Sample Characterization.	126
6.2.4	Li-Ion Battery Performance Measurements	126
6.2.5	Supercapacitor Performance Measurements.	127

6.3	Results and Discussion.	127
6.3.1	Pre-graphenization: Structure of TRG and SnO ₂ @TRG Hybrids.	127
6.3.2	Post-graphenization: Structure of SnO ₂ @CRG Hybrids.	129
6.3.3	Electrochemical Performance	133
6.4	Conclusions	138
	References	139
7	Main Conclusions and Plan of Further Work	143
7.1	Conclusions	143
7.2	Primary Innovation Points	145
7.3	Planning of Future Work	146

Surface Chemistry and Macroscopic Assembly of
Graphene for Application in Energy Storage

Chen, C.-M.

2016, XIII, 146 p. 73 illus., 18 illus. in color., Hardcover

ISBN: 978-3-662-48674-0
