<b>1 Complexity and Emergence</b> . . . . .	1
1.1 The Issue Considered . . . . .	3
1.2 A Basic Viewpoint . . . . .	4
1.2.1 The Main Claim . . . . .	5
1.2.2 Hierarchies . . . . .	6
1.2.3 Emergence . . . . .	7
1.3 Key Points of the Argument . . . . .	8
1.3.1 Multiple Types of Causation . . . . .	9
1.3.2 Hierarchy and Causation . . . . .	10
1.3.3 Types of Top-Down Causation . . . . .	11
1.3.4 The Nature of Variables . . . . .	12
1.3.5 The Causal Efficacy of Non-physical Entities . . . . .	13
1.3.6 Room at the Bottom . . . . .	14
1.3.7 Supervenience . . . . .	15
1.4 Is It Real? Testing the Proposal . . . . .	16
1.4.1 Causal Effects . . . . .	16
1.4.2 Experimental Tests . . . . .	17
1.4.3 Kinds of Data . . . . .	19
1.4.4 There Is No Other Option . . . . .	20
1.5 Significant Implications . . . . .	20
1.5.1 Health Care . . . . .	20
1.5.2 Mental Health . . . . .	21
1.5.3 Education: Learning to Read . . . . .	21
1.6 An Outline of the Book . . . . .	22
1.6.1 The Contents . . . . .	22
1.6.2 What Is New . . . . .	24
1.6.3 What Is Controversial . . . . .	24
1.7 The Necessity of the Conclusion . . . . .	27
1.7.1 The Conclusion . . . . .	28
1.7.2 The Necessity of the Conclusion . . . . .	28
References . . . . .	30

How Can Physics Underlie the Mind?  
Top-Down Causation in the Human Context

Ellis, G.

2016, XXVI, 482 p. 36 illus., Hardcover

ISBN: 978-3-662-49807-1
