Contents

Part I  Introduction

1  Organohalide-Respiring Bacteria—An Introduction            3
   Lorenz Adrian and Frank E. Löffler

2  Natural Production of Organohalide Compounds
   in the Environment                                      7
   James A. Field

3  Energetic Considerations in Organohalide Respiration       31
   Jan Dolfing

Part II  Diversity of Organohalide-Respiring Bacteria

4  Discovery of Organohalide-Respiring Processes
   and the Bacteria Involved                                 51
   Perry L. McCarty

5  Overview of Known Organohalide-Respiring Bacteria—
   Phylogenetic Diversity and Environmental Distribution    63
   Siavash Atashgahi, Yue Lu and Hauke Smidt

6  The Genus Dehalococcoides                                107
   Stephen H. Zinder

7  The Genus Dehalogenimonas                                137
   William M. Moe, Fred A. Rainey and Jun Yan

8  The Genus Dehalobacter                                    153
   Julien Maillard and Christof Holliger

9  The Genus Desulfitobacterium                             173
   Taiki Futagami and Kensuke Furukawa

10 The Genus Sulfurospirillum                                209
    Tobias Goris and Gabriele Diekert

## Part VI  Applications

21 Redox Interactions of Organohalide-Respiring Bacteria (OHRB) with Solid-State Electrodes: Principles and Perspectives of Microbial Electrochemical Remediation  
Federico Aulenta, Simona Rossetti, Bruna Matturro, Valter Tandoi, Roberta Verdini and Mauro Majone  
499

22 Current and Future Bioremediation Applications: Bioremediation from a Practical and Regulatory Perspective  
Robert J. Steffan and Charles E. Schaefer
