## Contents

Analysis of Relationship Between Modes of Intercomputer Communications and Fault Types in Redundant Computer Systems .......................... 1  
   *Refik Samet and Nermin Samet*

Efficient Circuit Design of Reversible Square ........................................ 33  
   *H.V. Jayashree, Himanshu Thapliyal, and Vinod Kumar Agrawal*

Methods of Registration of Weak Radio Signals ........................................ 47  
   *Stanislav Klimenko, Andrey Klimenko, Kira Konich, Igor Nikitin, Lialia Nikitina, Valery Malofeev, and Sergey Tyul’bashev*

A Novel Multiple Antennas Based Centralized Spectrum Sensing Technique .................................................. 64  
   *Jyotshana Kanti, Geetam Singh Tomar, and Ashish Bagwari*

ImatiSTL - Fast and Reliable Mesh Processing with a Hybrid Kernel .............. 86  
   *Marco Attene*

Processing Large Geometric Datasets in Distributed Environments .................. 97  
   *Daniela Cabiddu and Marco Attene*

Decision Fusion for Classification of Content Based Image Data .................... 121  
   *Rik Das, Sudeep Thepade, and Saurav Ghosh*

**Author Index** .................................................................................................. 139
