Contents

Development of Integral Molding of Functionally-Graded Syntactic Foams ................................................................. 1
Tadaharu Adachi and Masahiro Higuchi

Dynamic Instabilities of Simple Inelastic Structures Subjected to Earthquake Excitation .................................................... 11
Christoph Adam and Clemens Jäger

Nonlinear Dynamics and Control of Ultrasonic Technology Processes and Systems ................................................................. 19
V.K. Astashev

Experimental Studies of Thermoviscohyperelastic Behaviour of Filled Elastomers .............................................................. 27
T.A. Beliakova, E.V. Lomakin, and Yu.P. Zezin

Example of Instability in Drive Mechanisms ................................................. 35
A.K. Belyaev

Positioning Systems: Global Versus Local .............................................. 43
Fabio Casciati and Li Jun Wu

Real-Time Multi-channel Cable Replacement for Structural Control ..... 53
Sara Casciati, Lucia Faravelli, and ZhiCong Chen

Flatness-Based MPC and Global Path Planning Towards Cognition-Supported Pick-and-Place Tasks of Tower Cranes ............... 63
Markus Egretzberger, Knut Graichen, and Andreas Kugi

Stress Focusing Effect of an Elastic Solid in the Context of Generalized Thermoelasticity ....................................................... 73
T. Furukawa
Magnetoelastic Effect as Applied to Estimating Elastic-Plastic Strains in Steels and Optimization of Technological Processes .......... 83
E.S. Gorkunov

On the Potential of Constraints in Nonlinear System Identification ...... 93
Christoph Hametner and Stefan Jakubek

Vibration Control of Linear Elastic Beam Structures with Spatial Local nonlinearities ......................................................... 101
Rudolf Heuer

Energy Optimal Feedforward Control of a Cooling System ........... 109
Anton Hofer and Filip Kitanoski

Vibration Control of a Fluid in Micro- and Nanotubes .................. 119
D.A. Indeitsev, A.K. Abramyan, and B.N. Semenov

A Model Reduction Technique for High Speed Flexible Rotors ........ 127
Hans Irschik, Manfred Nader, Michael Stangl, and Hans-Georg von Garssen

Monitoring of Structural Deformations/ Vibrations Superposed upon Finite Pre-deformations ........................................... 135
Michael Krommer and Yury Vetyukov

Electromechanical and Mathematical Models of Salient-Pole Synchronous Motors .......................................................... 143
G.A. Leonov and N.V. Kondrat’eva

Optimization of Dynamic Characteristics of Electroviscoelastic Systems with External Electric Circuits .............................. 151
V.P. Matveenko, E.P. Kligman, M.A. Yurlov, and N.A. Yurlova

Control of Surface Waviness .................................................. 159
N.F. Morozov and P.E. Tovstik

Nonlinear Finite Element Modelling of Moving Beam Vibrations Controlled by Distributed Actuators ............................... 167
K. Nachbagauer, C. Zehetner, and J. Gerstmayr

Model Based Control of Heating Ventilating and Air-Conditioning Components ......................................................... 175
Jakob Rehrl and Martin Horn

Microsensors Based on Mechanically Vibrating Structures .......... 183
Erwin K. Reichel and Bernhard Jakoby

Flatness Based Control of Linear and Nonlinear Systems ............ 195
Kurt Schlacher, Markus Schöberl, and Martin Staudecker

Wave Radiation from a Stick-Slip-Like Source Motion (SH-Wave) .... 205
Kazumi Watanabe
Derivation of the Instability Potential of Plates by Rigid Body and Equilibrium Considerations .............................................. 215
Y.B. Yang, S.R. Kuo, J.L. Peng, and M.H. Shih

A Novel Base Isolation System for Asymmetric Buildings in Seismic Active Zones: Damping Supplied by Tuned Liquid Column-Gas Dampers .......................................................... 225
Franz Ziegler and Basit Khalid

Index .............................................................................................................. 235
Advanced Dynamics and Model-Based Control of Structures and Machines
Irshik, H.; Krommer, M.; Belyaev, A.K. (Eds.)
2012, XIII, 241 p., Hardcover
ISBN: 978-3-7091-0796-6
