1	Epidermolysis Bullosa (EB) – the Condition	1
	<i>Hedwig Weiß and Florian Prinz</i>	
1.1	Definition	2
1.2	Pathology of EB	2
1.2.1	EB Simplex (EBS)	3
1.2.2	Junctional EB (JEB)	4
1.2.3	Dystrophic EB (DEB)	4
1.3	The Most Common Sub-Types and Their Signs and Symptoms	6
1.4	The Most Common Cutaneous and Extracutaneous Complications	8
1.5	Diagnosis	10
1.6	Therapy	10
2	Motor Development in Early Childhood	11
	<i>Florian Prinz</i>	
2.1	Motor Development Screening	12
2.1.1	Typical Development of Motor Ability	12
2.1.2	Assessment of Children with EB	15
2.1.3	Parental Questionnaire Focusing on the Early Motor Development	18
2.2	Results from Motor Development Screening	19
2.3	Occupational Therapy	22
2.3.1	Advising Parents	22
2.3.2	OT Intervention Focusing on the Early Motor Development	22
3	Treatment of the Tactile, Vestibular and Proprioceptive Perception	27
	<i>Florian Prinz</i>	
3.1	Hypotheses Concerning Perception	28
3.1.1	The Relevance of Tactile, Vestibular and Proprioceptive Perception to Child Development ..	28
3.2	Assessment of Perception	29
3.2.1	Clinical Observation of Children with EB – Considerations	30
3.2.2	Useful Additions for Children with EB	31
3.3	Assessment Results	33
3.3.1	Discussion of the Results	33
3.4	Occupational Therapy	34
3.4.1	Occupational Therapy Intervention Focusing on the Development of Perception	34
4	Development of Hand Functions	41
	<i>Florian Prinz</i>	
4.1	Development of Prehension (Grasp)	42
4.2	Assessment of Children with EB	44
4.3	Assessment Results	46
4.4	Occupational Therapy	46

Contents

5	Graphomotor Skills	49
	<i>Florian Prinz</i>	
5.1	Development of Pencil Grasp and of Drawing Skills	50
5.2	Assessment of Children with EB	51
5.2.1	Graphomotorische Testbatterie	51
5.2.2	Observation of Drawing and Writing	52
5.2.3	The Mann-Zeichen-Test	53
5.3	Assessment Results	53
5.4	Occupational Therapy	55
5.4.1	Occupational Therapy Intervention Focusing on Drawing and Graphomotor Skills	55
6	Independence in Everyday Life and Provision of Assistive Devices	59
	<i>Hedwig Weiß and Florian Prinz</i>	
6.1	Assessment of Children with EB	60
6.1.1	Parental Questionnaire Focusing on the Coping Skills of Children with EB in Everyday Life..	62
6.2	Occupational Therapy Intervention Focusing on Everyday Life and Use of Assistive Devices	71
6.2.1	Self-Care	71
6.2.2	Mobility/Locomotion	80
6.2.3	Leisure/Hobbies	83
6.2.4	Kindergarten (Nursery)/School/Work	86
6.2.5	Barrier-Free Living	90
7	Client-Directed Therapy Using the COSA	95
	<i>Florian Prinz</i>	
7.1	Client-Directed Practice	96
7.2	What is COSA?	96
7.2.1	Contents and Structure of the COSA	96
7.3	Client-Directed Assessment and Therapy for Children with EB Using the COSA	99
7.3.1	Additions to the Intended Meaning Reference Guide for Children with EB	99
7.3.2	Additional Items for Children with EB	100
7.3.3	Formulating Goals	101
8	Rehabilitation of the Hand	103
	<i>Hedwig Weiß</i>	
8.1	Pathophysiology of the Hand	104
8.2	Contractures and Deformities	104
8.2.1	Fingers	105
8.2.2	Thumb	107
8.2.3	Palm and Arches of the Hand	108
8.2.4	Wrist	108
8.2.5	Interdigital Spaces	109
8.2.6	Causes of Contractures and their Relevance to Daily Life	110

Contents

8.2.7	Pathological Changes to the Joints Due to Contractures	110
8.3	Radiological Changes	111
8.4	Surgical Procedures	112
8.5	Occupational Therapy Process	113
8.6	Occupational Therapy Intervention	114
8.7	Occupational Therapy Assessment	114
8.7.1	Assessment Form for the Hand – Using the AO Neutral-0 Method	114
8.7.2	Assessment Form for the Hand – Range of Motion/Sensibility/Pain/Grip forms/Dexterity ..	116
8.7.3	Assessment Form for the Hand – Longitudinal Growth and Pseudosyndactyly	120
8.7.4	Assessment Form for the Hand – Abduction of the Digits	121
8.8	Occupational Therapy	122
8.8.1	Aims of Intervention	122
8.8.2	Bandaging and Compression Gloves	122
8.8.3	Splinting for Contracture Prophylaxis	122
8.8.4	Types of Splint for Contracture Prophylaxis	124
8.8.5	Exercises to Prevent Deformities	126
8.9	Postoperative Occupational Therapy after Digital Separation	135
8.9.1	Aims of Treatment	135
8.9.2	Postoperative Splinting	135
8.9.3	Postoperative Problems	139
8.9.4	Assessment Form for the Hand – Sensibility	139
8.9.5	Training of Sensibility	141
8.9.6	Treatment of Scars	142
8.9.7	Treatment of Oedema	143
8.9.8	Manual Therapy	143
8.9.9	Functional Exercises after Operative Digital Separation	144
8.9.10	Bandaging to Prevent MCP Flexion and Ulnar Deviation	148
9	Rehabilitation of the Foot	151
	<i>Hedwig Weiß</i>	
9.1	The Foot in People with DEB	152
9.2	Comparison of Hand and Foot	153
9.3	Anatomy and Function of the Foot	153
9.3.1	The Cuneiform Principle	153
9.3.2	The Spiral Principle	154
9.3.3	The Transverse Arch	155
9.3.4	How DEB Affects these Principles	155
9.4	The Pelvis and the Axes of the Legs	156
9.4.1	The Pelvis	156
9.4.2	The Axes of the Legs	157
9.5	The Development of the Foot and the Axes of the Legs During Growth	157
9.5.1	The Newborn	157
9.5.2	The Infant	157

Contents

9.5.3	The Toddler	158
9.5.4	The Schoolchild	158
9.5.5	Considerations Relating to the Foot Positions and Leg Axes in People with EB	159
9.6	Malpositions of the Foot	160
9.6.1	Pes (Talipes) Valgus/Varus	160
9.6.2	Fallen Arches, Pes Planus (Flatfoot), Pes Planovalgus	160
9.6.3	Pes Excavatus (High-Arched Foot)	161
9.6.4	Pes Transversoplanus (Splayfoot)	162
9.6.5	Considerations Relating to the Foot in People with DEB	162
9.7	Assessment	163
9.8	Exercises	167
9.8.1	Exercises for the Perception of the Feet	167
9.8.2	General Functional Exercises	170
9.8.3	Mobilisation	172
9.8.4	Functional Exercises for the Malpositions of the Foot	173
9.8.5	Bandaging	177
10	Conclusion	179
	<i>Hedwig Weiß and Florian Prinz</i>	
	Literature	184
	Subject Index	186
