# Contents

1 Definition of Comparative Medicine: History and New Identity  
Erika Jensen-Jarolim

2 Smallest Unit of Life: Cell Biology  
Isabella Ellinger and Adolf Ellinger

3 Supporting Apparatus of Vertebrates: Skeleton and Bones  
Wolfgang Sipos, Ursula Föger-Samwald, and Peter Pietschmann

4 Locomotor Principles: Anatomy and Physiology of Skeletal Muscles  
Josef Finsterer

5 Lifeblood Flow: The Circulatory Systems  
Claudia Stöllberger

6 Steering and Communication: Nervous System and Sensory Organs  
Josef Finsterer, Hanna Schöpper, and Sabine Breit

7 Surface, Barrier, and Interface Zone: Comparative Aspects of the Skin  
Lucia Panakova and Krisztina Szalai

8 Body Messaging: The Endocrine Systems  
Florian K. Zeugswetter and Erika Jensen-Jarolim

9 Alimentation and Elimination: The Principles of Gastrointestinal Digestion  
Georg A. Roth, Hanna Schöpper, and Kirsti Witter

10 Volume and Clearance: Kidneys and Excretory Systems  
Erika Jensen-Jarolim, Hanna Schöpper, and Simone Gabner

11 Breathing: Comparative Aspects of the Respiratory System  
Hanna Schöpper, Cordula Bartel, and Krisztina Szalai

12 Propagation: Mammalian Reproduction  
Christine Aurich and Isabella Ellinger

## List of Figures

<p>| Fig. 1.1 | Armée de terracotta à Xi’an—China. | 5 |
| Fig. 1.2 | Edward Jenner. | 9 |
| Fig. 1.3 | Louis Pasteur, nineteenth-century scientist. | 12 |
| Fig. 2.1 | The different levels of organization in multicellular organisms. | 20 |
| Fig. 2.2 | The classification levels of organisms. | 21 |
| Fig. 2.3 | Principal structures of prokaryotic and eukaryotic cells | 22 |
| Fig. 2.4 | Three different phenotypes out of the 230 specialized human cell types | 23 |
| Fig. 2.5 | Illustration of the steps of cell differentiation | 24 |
| Fig. 2.6 | Comparison of eukaryotic cells, prokaryotic cells and multicellular organisms | 25 |
| Fig. 2.7 | Some major ubiquitously used cellular molecules | 25 |
| Fig. 2.8 | Principal components of the cell membrane | 28 |
| Fig. 3.1 | Micro-computed tomography of bone of <em>Sus scrofa</em> | 36 |
| Fig. 3.2 | Comparison of skeletons. | 39 |
| Fig. 3.3 | The RANK-RANKL-OPG axis is the key regulatory pathway for osteoclastogenesis | 41 |
| Fig. 4.1 | A muscle fibre | 47 |
| Fig. 4.2 | The making of a neuromuscular end plate and a spinal reflex arc | 52 |
| Fig. 4.3 | The three muscle types, and smooth muscle function | 57 |
| Fig. 5.1 | The closed circulatory system in humans, mammals and fish | 63 |
| Fig. 5.2 | Graph summarizing hemolymph circulation | 64 |
| Fig. 5.3 | The pathway of blood flow through the heart, autoptic specimen of a human heart and electrocardiogram (ECG, EKG) | 65 |
| Fig. 6.1 | Brain of a sheep and human. | 74 |
| Fig. 6.2 | Schemes showing cranial nerves, visual projection pathway, and auditory pathway. | 78 |
| Fig. 6.3 | Different types of neurons and electroencephalogram (EEG). | 80 |
| Fig. 6.4 | The sympathetic and parasympathetic nervous system | 81 |
| Fig. 6.5 | The building of eyeball and inner ear of a vertebrate organism | 82 |</p>
