## Contents

**Part I  Peroxisome Biogenesis and Function**

1 History and Discovery of Peroxins ................................. 3  
   Wilhelm Just and Wolf-H. Kunau

2 Mouse Models with Peroxisome Biogenesis Defects ............ 17  
   Myriam Baes, Simon Verheijden, and Paul P. Van Veldhoven

3 Peroxisomes in Humans: Metabolic Functions, Cross Talk with Other Organelles, and Pathophysiology of Peroxisomal Disorders .................................................. 37  
   Ronald J.A. Wanders, Sacha Ferdinandusse, and Hans R. Waterham

**Part II  Peroxisomal Diseases**

4 Human Disorders of Peroxisome Biogenesis: Zellweger Spectrum and Rhizomelic Chondrodysplasia Punctata ........ 63  
   Nancy Braverman, Catherine Argyriou, and Ann Moser

5 Molecular Basis for Peroxisome Biogenesis Disorders .......... 91  
   Y. Fujiki, K. Okumoto, S. Mukai, and S. Tamura

6 Expanding the Clinical Phenotypes of Peroxisome Biogenesis Disorders: PEX11 Function in Health and Disease .......... 111  
   Tom Kettelhut and Sven Thoms

7 Peroxisome Morphology in Pathologies ............................ 125  
   Michael Schrader, Inês Castro, H. Dariush Fahimi, and Markus Islinger

8 Single Peroxisomal Enzyme and Transporter Deficiencies in Human Diseases and Mouse Models ............................ 153  
   Markus Kunze and Johannes Berger
Part III  New Technologies Applied to Study Peroxisomes

10 Live Imaging of Peroxisomes and Peroxules in Plants Kiah A. Barton, Erica-Ashley Jaipargas, Nigel Griffiths, and Jaideep Mathur .......................................................... 233

11 Dissecting Peroxisome-Mediated Signaling Pathways: A New and Exciting Research Field Bo Wang, Oksana Apanasets, Marcus Nordgren, and Marc Fransen .......................................................... 255

12 The Proteomics Toolbox Applied to Peroxisomes Silke Oeljeklaus, Andreas Schummer, and Bettina Warscheid .......................................................... 275

Part IV  Protein Transport Across the Peroxisomal Membrane

13 The Matrix Protein Import Complex in Yeast Daniel Effelsberg, Ralf Erdmann, and Wolfgang Schliebs .......................................................... 305

14 Protein Transport In and Out of Plant Peroxisomes Bonnie Bartel, Sarah E. Burkhart, and Wendell A. Fleming .......................................................... 325

15 The Peroxisomal Exportomer Harald W. Platta, Stefanie Hagen, and Ralf Erdmann .......................................................... 347

16 Factors Involved in Ubiquitination and Deubiquitination of PEX5, the Peroxisomal Shuttling Receptor Tony A. Rodrigues, Tânia Francisco, Andreia F. Carvalho, Manuel P. Pinto, Cláudia P. Grou, and Jorge E. Azevedo .......................................................... 371

Part V  Peroxisome Dynamic

17 Molecular Complex Coordinating Peroxisome Morphogenesis in Mammalian Cells Y. Fujiki, A. Itoyama, Y. Abe, and M. Honsho .......................................................... 391

18 Peroxisome Proliferation: Vesicles, Reticulons and ER-to-Peroxisome Contact Sites Cécile Brocard .......................................................... 403

19 The Functions of Pex11 Family Proteins in Peroxisome Biology Chris Williams and Ida J. van der Klei .......................................................... 425
20 Dynamin-Related Proteins in Peroxisome Division ........... 439
Kyaw Aung, Navneet Kaur, and Jianping Hu

21 Plant Peroxisome Dynamics: Movement, Positioning and
Connections .................................................. 461
Imogen Sparkes and Hongbo Gao

Part VI Specific Degradation Through Pexophagy

22 Molecular Machines Involved in Pexophagy ................. 481
Taras Y. Nazarko and Jean-Claude Farré

23 Pexophagy Sensing and Signaling in the Methylotrophic Yeasts ... 507
Andriy A. Sibirny

Index ................................................................. 529
Molecular Machines Involved in Peroxisome Biogenesis and Maintenance
Brocard, C.; Hartig, A. (Eds.)
2014, XV, 543 p. 51 illus., 34 illus. in color., Hardcover
ISBN: 978-3-7091-1787-3
