

Contents

1 Overview Space Segment	1
1.1 The Space Environment	1
1.1.1 Introduction	1
1.1.2 Launch Vehicle	2
1.1.3 Spacecraft Operational Environment	4
1.2 Space Systems Engineering	13
1.2.1 Definition of System Engineering	13
1.2.2 Objectives and Requirements	15
1.2.3 Design Drivers and Trade-offs	18
1.2.4 Concurrent Engineering	21
1.3 Fundamentals of Space Communications	21
1.3.1 Introduction	21
1.3.2 Baseband	22
1.3.3 Carrier	30
References	34
2 Mission Operations	35
2.1 Mission Operations Preparation	35
2.1.1 Introduction with Examples	36
2.1.2 Driving Factors	38
2.1.3 Personnel, Roles, and Responsibilities	42
2.1.4 Required Data, Products, and Tools	46
2.1.5 Activities, Tasks, and Schedule	48
2.1.6 Review Process	50
2.2 Mission Operations Execution	54
2.2.1 Various Phases During Execution	54
2.2.2 Staffing of the Flight Control Team	60
2.2.3 Interactions within the Flight Control Team and Flight Procedures	64
2.2.4 The Mission Type Defines the Operational Concept	68
2.2.5 Summary	74

- 2.3 Flight Experience 75
 - 2.3.1 Statistics 75
 - 2.3.2 Interpretation of Telemetry 77
 - 2.3.3 Failure Probability Vs. Operational Experience 80
 - 2.3.4 Contingency Handling 81
 - 2.3.5 Mission Example TV-SAT 1 84
- References 89
- 3 Communication and Infrastructure 91**
 - 3.1 Control Center Design 91
 - 3.1.1 Infrastructure 93
 - 3.1.2 Control Center Network 97
 - 3.1.3 Control Center Software 100
 - 3.1.4 Outlook 106
 - 3.2 Ground Station Network 106
 - 3.2.1 Station Selection 107
 - 3.2.2 Station Communication 111
 - 3.2.3 LEOP and Routine Operations 115
- 4 Flight Dynamic Operations 119**
 - 4.1 Orbital Dynamics 119
 - 4.1.1 Introduction 119
 - 4.1.2 Theoretical Aspects 120
 - 4.1.3 Flight Dynamics Tasks 133
 - 4.2 Attitude Dynamics 144
 - 4.2.1 Introduction 144
 - 4.2.2 Disturbances 147
 - 4.2.3 Attitude Determination 148
 - 4.2.4 Attitude Propagation 153
 - 4.2.5 Attitude Control 155
 - 4.2.6 Tasks of AOCS (Attitude and Orbit Control System) 159
- References 165
- 5 Mission Planning 167**
 - 5.1 The Planning Problem 167
 - 5.1.1 Introduction 167
 - 5.1.2 General Overview of a Mission Planning System 168
 - 5.1.3 Techniques for Timeline Generation 171
 - 5.1.4 Summary 185
 - 5.2 Mission Planning for Unmanned Systems 185
 - 5.2.1 Introduction 185
 - 5.2.2 Mission Planning System Example 186
 - 5.2.3 Considerations on Designing a Mission Planning System 188
 - 5.2.4 Mission Planning at Various Time Scales 189
 - 5.2.5 Conclusions and Outlook 190

- 5.3 Mission Planning for Human Spaceflight Missions 192
 - 5.3.1 Introduction 192
 - 5.3.2 Basic Considerations 195
 - 5.3.3 Planning Teams 196
 - 5.3.4 Concept of Crew Flexibility 197
 - 5.3.5 Planning Phases Overview 198
 - 5.3.6 Planning Products and Processes 199
 - 5.3.7 Planning Tools 209
 - 5.3.8 Conclusion 210
- References 210
- 6 Spacecraft Subsystem Operations 213**
 - 6.1 Telemetry, Commanding and Ranging Subsystem 213
 - 6.1.1 Definition of Subsystem 213
 - 6.1.2 Signal Characteristics 214
 - 6.1.3 Design 216
 - 6.1.4 Monitoring and Commanding 222
 - 6.1.5 Operational Situations 225
 - 6.1.6 Outlook to Future Developments 228
 - 6.2 On-Board Data-Handling Subsystem Operations 228
 - 6.2.1 Definition of Subsystem 228
 - 6.2.2 Fundamentals 228
 - 6.2.3 Space to Ground Data Streams 234
 - 6.2.4 OBDH Management 240
 - 6.2.5 Summary and Outlook 249
 - 6.3 Power and Thermal Operations 250
 - 6.3.1 PTS Design Aspects 250
 - 6.3.2 Operations 265
 - 6.3.3 Contingency Operations 274
 - 6.4 Propulsion Subsystem Operations 276
 - 6.4.1 Principle of Propulsion 276
 - 6.4.2 Configurations of Propulsion System 279
 - 6.4.3 Real-Time Operations 282
 - 6.4.4 Off-line Operations 287
 - 6.5 Attitude and Orbit Control Subsystem Operations 290
 - 6.5.1 Introduction and Overview 291
 - 6.5.2 Subsystem Description 292
 - 6.5.3 AOCS-Related Ground Operations 302
 - 6.5.4 Experience from Previous Missions 307
 - 6.5.5 Summary 311
 - 6.6 Repeater Operations 311
 - 6.6.1 Repeater Subsystem 312
 - 6.6.2 Repeater Operations 316
- References 322

7 Special Topics	325
7.1 Human Spaceflight Operations	325
7.1.1 Introduction	325
7.1.2 Manned and Unmanned Missions	326
7.1.3 From a Satellite to a Living Place	326
7.1.4 Crew: Another Subsystem to Operate	333
7.1.5 Ground Support Operations	336
7.1.6 Future	339
7.2 Operations of On-Orbit Servicing Missions	340
7.2.1 Introduction	340
7.2.2 Examples of On-Orbit Servicing Missions	342
7.2.3 Challenges Operating Robotic OOS Missions	350
7.2.4 Satellite Rendezvous	352
7.2.5 Satellite Capture	364
7.2.6 Verification and Test Facilities	368
7.2.7 Summary and Outlook	369
7.3 Interplanetary Operations	370
7.3.1 Types of Interplanetary Missions	370
7.3.2 The Challenges of Interplanetary Flight	373
7.3.3 Mission Control Approach	378
7.3.4 Special Operations	390
7.3.5 Conclusions	394
7.4 Lander Operations	395
7.4.1 Overview	395
7.4.2 Landing Insertion	399
7.4.3 Various Landing Strategies	400
7.4.4 Surface Operations	407
7.4.5 Conclusions	413
References	413
Index	417
