Part I The Year in Space 2015

1	European Space Activities in the Global Context	3
	Cenan Al-Ekabi	
1.1	Global Political and Economic Trends	3
1.1.1	Global Economic Outlook	3
1.1.2	Political Developments	4
1.1.3	Main Science and Technology Indicators Relevant for Space Activities	14
1.2	Worldwide Space Policies and Strategies	16
1.2.1	The United Nations System	16
1.2.2	The Group on Earth Observation	28
1.2.3	Europe	28
1.2.4	The United States	41
1.2.5	Canada	47
1.2.6	Russia	48
1.2.7	Japan	49
1.2.8	China	50
1.2.9	India	53
1.2.10	Brazil	55
1.3	Worldwide Space Budgets and Revenues	56
1.3.1	Overview of Institutional Space Budgets	57
1.3.2	Overview of Commercial Space Markets	62
1.3.3	Developments in the Space Industry	69
1.3.4	Industrial Overview	83
1.4	The Security Dimension	92
1.4.1	The Global Space Military Context	92
1.4.2	Europe	93
1.4.3	The United States	94
1.4.4	Russia	95

1.4.5	Japan	96
1.4.6	China	98
1.4.7	India	99
2	Developments in Space Policies, Programmes and Technologies Throughout the World and in Europe	101
	Cenan Al-Ekabi	
2.1	Space Policies and Programmes	101
2.2	Space Transportation	101
2.2.1	Europe	101
2.2.2	United States	104
2.2.3	Russia	105
2.2.4	Japan	106
2.2.5	China	107
2.2.6	India	107
2.3	Space Science and Exploration	109
2.3.1	Human Spaceflight Activities	109
2.3.2	Lunar Science	115
2.3.3	Mars Science	118
2.3.4	Saturn Science	123
2.3.5	Venus Science	125
2.3.6	Mercury Science	126
2.3.7	Jupiter Science	127
2.3.8	Solar Observation	128
2.3.9	Solar System Science	131
2.3.10	Outer Solar Science	134
2.4	Satellite Applications	137
2.4.1	Space-Based Communications	137
2.4.2	Space-Based Positioning, Navigation and Timing Systems	139
2.5	Technology Developments	141
2.5.1	Propulsion	141
2.5.2	Spacecraft Operations and Design	141
2.5.3	Suborbital Activities	143
2.5.4	Other Technologies	144

Part II Views and Insights Edited by Arne Lahcen

3	Issues and Perspectives on Space Launch Vehicles' Development	147
	Jean-Marc Astorg	
3.1	Introduction	147
3.2	The Current Range of European Launcher: Ariane 5, Soyuz and Vega	148
3.3	The Current Global Context: Fierce Competition and a Guaranteed Captive Market for Ariane's Competitors	149

3.4	The Luxembourg Decision of December 2014	150
3.5	A Long-Term Trend: The Reduction of Costs for Accessing Space	151
4	Space at a Crossroads: Government Programmes Can Benefit from Commercial Space and Other Changes If Long-Standing Challenges Are Addressed	153
	Cristina T. Chaplain and Laura D. Hook	
4.1	Introduction	153
4.2	The GAO and Space	154
4.3	“Going Commercial” Is Becoming an Attractive Option for the U.S. Government	155
4.4	Industry Changes Also Make “Going Commercial” More Attractive	159
4.5	Without Addressing Long-Standing Challenges, Going Commercial Could Have Negative Consequences	161
4.6	GAO’s Recommendations Can Help Remove Some Barriers	164
4.7	Agencies Will Still Need to Fix Problems That Go Beyond Acquisition Management	165
5	Virgin Galactic: Creating Safe, Reliable, and Frequent Access to Space	167
	Richard DalBello	
5.1	Introduction	167
5.2	SpaceShipTwo	167
5.3	Human Spaceflight	170
5.4	Microgravity Research	171
5.5	LauncherOne	172
6	The Future of Satellite Applications: The End-User Perspective	175
	Stefaan De Mey	
6.1	Benefits from Space Revisited	175
6.2	Space Serving Society: Understanding Demand Is Key to Becoming Part of the Solution	176
6.2.1	Looking Beyond the Space Segment Downstream Value-Added Chain: The User Perspective	176
6.2.2	Serving User Communities Better: Horizontal Integration at the Level of the Offer	179
6.3	The Big Data and Interconnectivity Gordian Node	182
6.3.1	Volume, Velocity and Variety: Satellite Data Is Big Data	182
6.3.2	Data to the User or User to the Data?	184
6.3.3	From Big Data to Connected Data and IoT	185
6.4	Public Authorities: Main Users of Satellite Applications?	186

6.4.1	Satellite Applications in Support of a Public Mission	186
6.4.2	Public Authorities a Junior Partner for the Satapps Industry?	188
6.5	The Stars Are the Limit	190
7	Efficient Access to Space: Implications for Space Astronomy	193
	Shuang-Nan Zhang	
7.1	Introduction	193
7.2	Telescopes on the Ground and in Space	194
7.2.1	Optical (Visible Light) Telescopes on Ground and in Space	194
7.2.2	Cost Comparison	196
7.3	Why Are Space Telescopes So Expensive?	197
7.4	Serendipity Is the Nature of Exploration	198
7.4.1	Major Astronomy Discoveries	198
7.4.2	Expensive Access to Space Limits Our Discoveries	199
7.5	Efficient Access to Space	200
8	Potentially Transformative Technologies for Twenty-First Century Space	203
	Leopold Summerer	
8.1	Introduction	203
8.2	Potentially Transformative Themes for the Space Sector	206
8.2.1	Autonomy	206
8.2.2	Ionising Radiation	208
8.2.3	In Space Resource Utilisation: Very Large Structures	210
8.2.4	Further, Potential Game Changing Technologies	212
8.3	Conclusions	213
9	Big Data from Outer Space: Opportunities and Challenges for Crisis Response	215
	Nina Witjes, Philipp Olbrich, and Isabella Rebasso	
9.1	Introduction	215
9.2	Crisis Response in a Commercial Space Age	217
9.2.1	Satellite Technology: New Actors, New Opportunities	217
9.2.2	The Rise of Digital Humanitarianism	218
9.3	Risks of Big Data in Humanitarian Action	221
9.3.1	Data Control	221
9.3.2	Digital Divide	222
9.3.3	Misuse of Open-Source and Personal Data	223
9.4	Conclusion: Geospatial Big Data and the Way Forward	224

10	Some Ethical Constraints on Near-Earth Resource Exploitation	227
	James S.J. Schwartz and Tony Milligan	
10.1	Introduction	227
10.2	NERs and Scarcity	229
10.2.1	NEAs	229
10.2.2	Lunar Polar Real Estate	231
10.2.3	Lunar He3	231
10.2.4	Orbital Allocations	232
10.3	Rawls in Space	233
10.4	Existing Frameworks	236
10.4.1	ITU Orbital Allocation Regulations	236
10.4.2	ISA Deep Sea Mining Regulations	237
10.5	Conclusion	239
11	Governance, Strategies and Approaches in 2030: “European Options”	241
	Jesse Phaler	
11.1	Inspired Human Mind	241
11.2	The Role of the Public Domain	242
11.3	Revisiting Roles	243
11.4	Courage	245
11.5	Mind-Set	245
11.6	Vision and Heritage	246
12	The Economics of Launch Vehicles: Towards a New Business Model	247
	Keith Hayward	
12.1	Introduction	247
12.2	Launch Vehicle Economics: The Traditional Business Model	247
12.3	The “Quasi” Commercial Launcher Industry	249
12.3.1	Technology Transfer Controls and the Launcher Market	249
12.4	A New Business Model?	250
12.4.1	SpaceX and the U.S. Launcher Market	250
12.4.2	The SpaceX Approach	251
12.5	Ariane and Arianespace	253
12.6	Transformational Possibilities	254
12.6.1	Hypersonic Vehicles	254
12.7	The Impact of Low Cost Access to Space	255
12.8	Conclusions	256

Part III Facts and Figures

13 Chronology: 2015 259
Cenan Al-Ekabi and Arne Lahcen
13.1 Access to Space 259
13.2 Space Science and Exploration 263
13.3 Applications 266
13.4 Policy and International Cooperation 273
13.5 Country Profiles 2015 275

14 Bibliography of Space Policy Publications 2015 291
Blandina Baranes
14.1 Monographs 291
14.2 Articles 295

Biographies 303
