## Contents

Preface ................................................................. ix

*Andrew Acker*
  One-Layer Free Boundary Problems with Two Free Boundaries ...... 1

*Catherine Bandle and Simon Stingelin*
  New Numerical Solutions for the Brezis-Nirenberg Problem on $S^n$ .................. 13

*H. Beirão da Veiga*
  On some Boundary Value Problems for Incompressible Viscous Flows with Shear Dependent Viscosity ............. 23

*A. Bermúdez, R. Leira, M.C. Muñiz and F. Pena*
  Radiative Heat Transfer in Silicon Purification .................. 33

*Said Berrimi and Salim A. Messaoudi*
  A Decay Result for a Quasilinear Parabolic System ........... 43

*S.I. Betelú, M.A. Fontelos and U. Kindelán*
  The Shape of Charged Drops: Symmetry-breaking Bifurcations and Numerical Results ................................. 51

*A. Blanchet, J. Dolbeault and R. Monneau*
  On the One-dimensional Parabolic Obstacle Problem with Variable Coefficients .................. 59

*Lucio Boccardo*
  Hardy Potentials and Quasi-linear Elliptic Problems
  Having Natural Growth Terms ........................................ 67

*Bernard Brighi and Jean-David Hoernel*
  Recent Advances on Similarity Solutions Arising During Free Convection .................. 83

*R. Brossard, J.-P. Lohéac and M. Moussaoui*
  Rellich Relations for Mixed Boundary Elliptic Problems .......... 93

*A. Cañada, J.A. Montero and S. Villegas*
  Lyapunov-type Inequalities and Applications to PDE ............. 103
A. Cañada and D. Ruiz
Gaeta 2004. Elliptic Resonant Problems
with a Periodic Nonlinearity ........................................ 111

Raffaela Capitanelli
Harnack Inequality for \(p\)-Laplacians on Metric Fractals .......... 119

Ana Carpio
Wave Propagation in Discrete Media .................................... 127

Thierry Cazenave, Flávio Dickstein and Fred B. Weissler
A Solution of the Heat Equation with
a Continuum of Decay Rates ........................................ 135

Claire Chainais-Hillairet and Yue-Jun Peng
Finite Volume Scheme for Semiconductor
Energy-Transport Model ............................................ 139

Michel Chipot and Yitian Xie
Asymptotic Behavior of Nonlinear Parabolic Problems
with Periodic Data .................................................. 147

Gabriel Peyré and Laurent Cohen
Geodesic Computations for Fast and Accurate
Surface Remeshing and Parameterization ................................ 157

M. Comte
On the Newton Body Type Problems ........................................ 173

Jean-Michel Coron
Some Open Problems on Water Tank Control Systems .............. 179

Juan Dávila and Marcelo Montenegro
Hölder Estimates for Solutions to a Singular
Nonlinear Neumann Problem ........................................... 189

U. De Maio and T.A. Mel’nyk
Asymptotic Analysis of the Neumann Problem for the
Ukawa Equation in a Thick Multi-structure of Type 3:2:2 ........... 207

J.I. Díaz
On the Haïm Brezis Pioneering Contributions on the Location
of Free Boundaries ...................................................... 217

Jérôme Droniou
Fractal Conservation Laws: Global Smooth Solutions and
Vanishing Regularization ........................................... 235

M. Escobedo
Stationary and Self-similar Solutions for Coagulation
and Fragmentation Equations ........................................... 243
Contents

Alberto Fiorenza
Orlicz Capacities and Applications to PDEs
and Sobolev Mappings .............................................. 259

Uta Renata Freiberg and Maria Rosaria Lancia
Energy Forms on Non Self-similar Fractals .................... 267

Thierry Gallouët
Measure Data and Numerical Schemes for Elliptic Problems ..... 279

Yuxin Ge
Brezis-Nirenberg Problem and Coron Problem
for Polyharmonic Operators ......................................... 291

Mohammed Guedda
Local and Global Properties of Solutions
of a Nonlinear Boundary Layer Equation ....................... 299

M.A. Herrero
Mathematical Models of Aggregation:
The Role of Explicit Solutions ........................................ 309

S. Kamin, H. Berestycki, L. Kagan and G. Sivashinsky
Metastable Behavior of Premixed Gas Flames ................. 319

Satyanad Kichenassamy
Recent Progress on Boundary Blow-up ............................ 329

Jean Mawhin
Maximum Principle for Bounded Solutions of the
Telegraph Equation: The Case of High Dimensions ............ 343

Andrea Pascucci
Kolmogorov Equations in Physics and in Finance ............. 353

Sergio Polidoro
Harnack Inequalities and Gaussian Estimates for
a Class of Hypoelliptic Operators ................................. 365

Augusto C. Ponce
How to Construct Good Measures .................................... 375

Vicențiu Rădulescu
Bifurcation and Asymptotics for Elliptic Problems
with Singular Nonlinearity ............................................ 389

Marc Oliver Rieger
A Model for Hysteresis in Mechanics Using Local Minimizers
of Young Measures .................................................. 403

Carlo Sbordone
The Precise $L^p$-theory of Elliptic Equations in the Plane .... 415
